Tattoo Procedure information

These are the procedure on how tattooing is done.

1. Before the artist gets busy tattooing the skin, the area in where the tattoo will be applied should be first cleaned using rubbing alcohol then shaved the area if necessary. Shaving must be done with a new disposable razor for the sake of sanitary conditions. It must be used by a single tattoo client only. After shaving is done, the skin must be cleaned again.

2. When the area is already clean, the tattoo image is now ready to be traced onto the surface of the skin. The artist can draw the desired tattoo design freehanded or use a thermal paper traced pattern. At this moment the inks and tattoo machine will be set up and prepared by the artist. The tubes and the needles should be removed from their sterile packaging in front of the client.

3. Before the tattoo artist begins injecting ink into the skin, a Vaseline-type ointment will be put onto the skin area to make the tattoo needle move along the skin more easily.

4. The outline of the design on the skin will be inked first then the filling of colors or shadings will begin. Only the amount needed will be put by the artist. A needle called magnum at this point will be used because it is more suited to coloring and shading.

5. Once the tattoo is finished, an ointment will be applied by the tattoo artist to prevent the open wound from the infiltration of airborne bacteria. The artist will explain the after care process and answer any questions you may have.

6. The next step after a new tattoo is finished, it is the clients' responsibility to take good care of the tattoo area.

Tattooing is a painful process. However, the aspect of tattooing has not prevented this ancient and painful practice from becoming popular. For people who decide to have a tattoo, the pain is just a part of the process of enhancing their physical appearances and expressions.

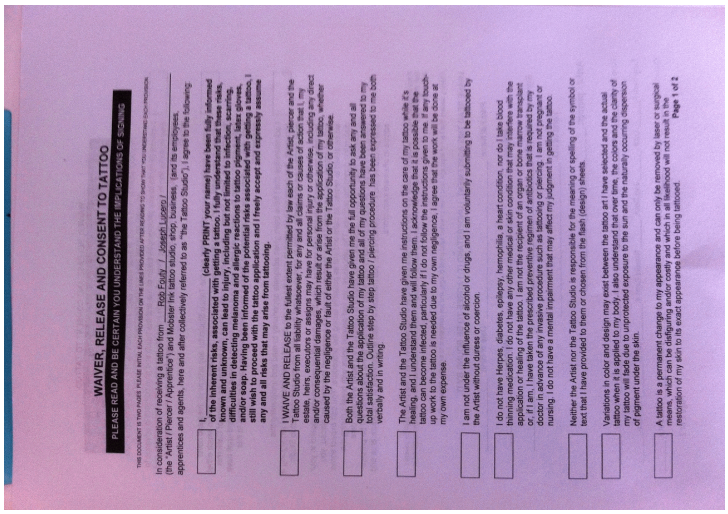
Artist _____ Date _____



WAIVER, RELEASE AND CONSENT TO TATTOO

PLEASE READ AND BE CERTAIN YOU UNDERSTAND THE IMPLICATIONS OF SIGNING

THIS DOCUMENT IS TWO PAGES. PLEASE INITIAL EACH PROVISION ON THE LINES PROVIDED AFTER ACCURATELY TO INDICATE THAT YOU UNDERSTAND EACH PROVISION.

In consideration of receiving a tattoo from _____ (the "Artist / Piercer / Apprentice") and Mobster Ink (collectively referred to as "the Tattoo Studio"), I agree to the following:

_____ I, _____ (clearly PRINT your name) have been fully informed of the inherent risks associated with getting a tattoo. I fully understand that these risks, known and unknown, can lead to injury, permanent scarring, disfigurement, difficulties in detecting melanoma and allergic reactions to tattoo pigment, tattoo gloves, and/or other tattoo materials. Having been informed of the potential risks associated with getting a tattoo, I still wish to proceed with the tattoo and I freely accept and expressly assume any and all risks that may arise from tattooing.

_____ I WAIVE AND RELEASE to the fullest extent permitted by law each of the Artist, piercer and the Tattoo Studio, their owners, employees, agents, and/or representatives, and my heirs, executors, estate, heirs, executors or assigns may have for personal injury or otherwise, and/or any other claim and/or consequential damages, which result or arise from the application of my tattoo, whether caused by the negligence or fault of either the Artist or the Tattoo Studio, or otherwise.

_____ Both the Artist and the Tattoo Studio have given me the full opportunity to ask any and all questions about the application of my tattoo and all of my questions have been answered to my total satisfaction. Outline steps by step tattoo / piercing procedure has been expressed to me both verbally and in writing.

_____ The Artist and the Tattoo Studio have given me instructions on the care of my tattoo while it's healing, and I understand them and will follow them. I acknowledge that it is possible that the tattoo may not heal properly if I do not follow the instructions, and that it may be necessary to touch up work to the tattoo is needed due to my own negligence. I agree that the work will be done at my own expense.

_____ I am not under the influence of alcohol or drugs, and I am voluntarily submitting to be tattooed by the Artist without duress or coercion.

_____ I do not have Herpes, diabetes, epilepsy, hemophilia, a heart condition, nor do I take blood thinners or any medication that would interfere with the healing process, or increase the application or healing of the tattoo. I am not the recipient of an organ or bone marrow transplant or, if I am, I have taken the prescribed preventive regimen of antibiotics that is required by my doctor in advance of any invasive procedure such as tattooing or piercing. I am not pregnant or nursing. I do not have a mental impairment that may affect my judgment in getting the tattoo.

_____ Neither the Artist nor the Tattoo Studio is responsible for the meaning or spelling of the symbol or text that I have provided to them or chosen from the flash (design) sheets.

_____ Variations in color and design may exist between the tattoo art I have selected and the actual tattoo when it is applied to my body. I also understand that over time, the colors and the clarity of my tattoo will fade due to unprotected exposure to the sun and the naturally occurring dispersion of pigment under the skin.

_____ A tattoo is a permanent change to my appearance and can only be removed by laser or surgical means, which can be disfiguring and/or costly and which in all likelihood will not result in the restoration of my skin to its exact appearance before being tattooed.

Tattoo after care

- First and most important keep out of the sun, (the sun can damage your fresh tattoo even as little as 5 minutes can affect the overall outcome of your tattoo) second, avoid dogs and cats, (pet hair can cause infection in your fresh tattoo also don't let your pet lick or rub your tattoo.) Third, avoid swimming or soaking in water. Follow these restrictions for the first 2 weeks after receiving your tattoo...
- Step 1, Keep your tattoo clean and free of dirt and hair... Dove bar soap works great for keeping your tattoo clean, wash your tattoo gently 3 to 4 times a day for the first 5 days... after you wash your tattoo pat dry with a clean soft towel and apply a thin coat of lotion over your tattoo. Lubriderm un-scented lotion is good to use on your tattoo, follow this step for 5 days...
- Step 2, It is important to let your tattoo breath... Do not wrap your tattoo if you do you could be trapping in bacteria that can lead to an infection.
- Some swelling and redness will occur after the procedure is finished and depending on the area of the procedure some bruising may occur... Tattoos are a procedure performed by injecting ink by needle so the possibility of your tattoo getting a scab is possible, as long as you don't scratch or pick at the tattoo it will heal on it's own... if your tattoo itches don't scratch it just pat it gently if needed...
- Physical activities such as gardening or contact with animals shall be avoided until which time tattoo is completely healed and minimum of 3 weeks.
- Signs and symptoms of infections, including, but not limited to, redness, swelling, tenderness of the procedure site, red streaks going from the procedure site to the heart, elevated body temperature, or purulent drainage from the procedure site. Signs and symptoms that indicate the need to seek medical attention.
- If you have any questions or concerns contact your artist at 760-374-6807 or stop in and we'll be happy to help in any way we can...
- It is your responsibility to follow these directions to prevent unnecessary damage to your new Tattoo; any concerns do not hesitate to contact us...
