Violation Reference - HSC - 113984(e), 114097, 114099

Inspector Comments: Observed dishwasher dispensing chlorine sanitizer at 0 ppm. Dishwasher was allowed to run 3x and a reading of 0 ppm was observed each time. Per operator, machine had already been used throughout the morning to wash/sanitize breakfast trays. Operator stated that she had verified sanitizer in machine approximately one week prior, and that the test strip indicated a proper sanitizing concentration.
Recommended to test sanitizing solution at the start/end of each day.
Repair/replace dishwashing unit to ensure that sanitizer solution is dispensed at 50 ppm.

Until unit is repaired, operator will use the 2-compartment sink in the kitchen to manually dip equipment and utensils into sanitizing solution.
Central Kitchen and Ecolab were both contacted immediately to check in on the issue - Ecolab will be coming in before lunch time.
Inspector will return within one week to confirm that the dishwashing unit is repaired and able to dispense the appropriate sanitizer concentration.

Violation Description: All food contact surfaces of utensils and equipment shall be clean and sanitized. (113984(e), 114097, 114099.1, 114099.4, 114099.6, 114101 (b-d), 114105, 114109, 114111, 114113, 114115 (a, b, d), 114117, 114125(b), 114135, 114141)
