Board of Supervisors Approve Creation of Two MACs

Two new Municipal Advisory Councils were created by the Board of Supervisors at today's meeting. One will include the communities of Lucerne Valley and Johnson Valley. The other will include the communities within the Morongo Basin.

These are two large regional MACs that Supervisor Ramos thought would be the best way to serve many of the distinct Third District desert communities. Supervisor Ramos drew these MAC boundaries after holding discussions with community leaders. Within each MAC, the Supervisor plans to appoint smaller community advisory committees to further focus on the individual needs of each community.

The Lucerne Valley and Johnson Valley MAC will consist of seven seats and the Morongo Basin MAC will consist of nine members. Supervisor Ramos is looking for interested citizens to serve on these MACs.

Part of the creation of these councils was to direct the Clerk of the Board to post a notice of vacancy for members for the councils. Those interested in becoming a member can find the application at the link below. Follow this link to BCC Vacancies to apply to be a member.
