Hello! Welcome to the San Bernardino CANS website.

We are happy to be part of the countywide implementation of a standardized assessment tool so that we all can work towards meeting the needs of children, youth and families through a strength-based needs-driven approach.

The Child and Adolescent Needs and Strengths (CANS) Comprehensive Assessment is being used throughout the United States by many different organizations and individuals.

- The CANS, developed by John S. Lyons, PhD, was modified for use by the Department of Behavioral Health San Bernardino County.
- The CANS is a document that organizes clinical information collected during a behavioral health assessment in a consistent manner to improve communication among those involved in planning care for a child or adolescent.
- The CANS is also used as a decision-support tool to guide care planning and to track changing strengths and needs over time.
- The CANS has three primary uses—as a decision support tool, as a quality improvement tool and as an outcome monitoring tool.
- As an assessment tool, the CANS can be used by child and family teams to develop a plan of care.
- As a quality improvement tool, the CANS can be used with the Treatment Fidelity Index to
