Trauma Resiliency Model (TRM)

Level 1

Basic TRM Training

About This Course:

The Trauma Resiliency Model (TRM) training is a **3-day course** designed to teach skills to stabilize one's nervous system to reduce and/or prevent the symptoms of traumatic stress. This model has been used successfully with adults and children and is being utilized at Juvenile Hall, triage, CCRT, disaster response, FSP, outpatient therapy, and CWIC. TRM is an integrative (mind-body approach), which focuses on the biological foundation of trauma and the reflexive, defensive ways the body responds to threat and fear. Although this training does not directly address alcohol and drug treatment, trauma often results in substance use/abuse.

Learning Objectives

1. Identify the way shock, trauma, developmental trauma, and cumulative trauma affect the nervous system.
2. Utilize the 6 basic skills of the TRM to stabilize the nervous system.
3. Understand how to integrate the skills of TRM into their current work setting and therapeutic approach.
4. Identify 3 ways to use TRM for self-care.
5. Demonstrate effective practice skills using the TRM Method

Additional learning objectives may be obtained by phone or email at:
800-722-9866 or
training@dbh.sbcounty.gov

All presenters are approved TRM trainers. Names and credentials are available 4 weeks prior to training date, please call 800-722-9866 for information.

Please note that all participants attending this training must be in accordance with DBH Dress Code Policy
