- Participation for the entire class period is required to qualify for continuing education credit; no partial credit will be awarded. CE Credit is only awarded for actual instructional time.

Course Description:

The purpose of this full-day training is to provide participants with a detailed overview of medications that have been shown to be effective as a component of the treatment of alcohol and opioid addiction. Topics will include: the context for medication-assisted treatment (positive and negative perceptions), the epidemiology of alcohol and opioid dependence (user demographics), a review of alcohol and the various classes of opioids, an overview of each medication, its indication, to whom it is administered, and how it works, and treatment settings for medication-assisted treatment.

Objectives:

1. Describe at least three (3) acute and chronic effects of alcohol and opioids.
2. Describe the prevalence of and key populations impacted by alcohol and opioids use, abuse, and dependence.
3. Provide examples of at least two (2) medications that are available to treat alcohol and opioid addiction.
4. List and explain at least two strategies that can be used to address health disparities through access to medication-assisted treatment.
