

## Arrowhead Regional Medical Center Video Transcript

Arrowhead Regional Medical Center is the County hospital for San Bernardino. It's a 373-bed hospital. We have an Acute Trauma Unit, a fantastic ER. We also have a psychiatric facility adjacent to the main facility. In the hospital, you have several opportunities for employment. There is radiology, there is X-ray tech. We actually have an X-ray school in-house which is really unique. Not too many hospitals have that. We have nutrition services. We have the cleaning services. We have people who do the landscaping and the laboratory. There's just hundreds of things you can do in the hospital. A lot of people say oh we have the great benefits; we have a good retirement program, we have a good insurance. We have holiday and vacation pay which are all great benefits through the county. But I've found just by doing some interviewing, exit interviewing, through the County is that the people, the number one retention tool here is the teamwork. So it's quite a wonderful, dynamic place to work.
