

Industry Guidance for Tree Lots

- Tree lots may operate as outdoor retail sales locations under the State retail guidance, <https://files.covid19.ca.gov/pdf/guidance-retail--en.pdf>.
- The State currently **does NOT** allow amusement park rides of any kind or other high-touch/close contact attractions, including animal rides, petting zoos, slides, bounce houses, and ball pits.
- The County Department of Public Health will not permit the operation of Temporary Food Facilities. Mobile food facilities with permits could be considered as an option. These would include food trucks, catering, sidewalk vending, and farmers' markets certified by the County Agricultural Commissioner.
- State orders require dining areas to be established outdoors and follow State guidance for outdoor dining, <https://files.covid19.ca.gov/pdf/guidance-outdoor-restaurants--en.pdf>.
- Outdoor games, mazes, and other activities will be evaluated on a case-by-case basis by the County Environmental Health Services Division.
- Operators are encouraged to develop a plan to have employees tested regularly. Visit <https://sbcovid19.com/testing-sites> to see COVID-19 testing sites throughout the county.
- Municipalities have the ability to implement stricter standards. Tree lot operators are urged to consult with County Public Health by calling 909-387-3911 before opening to ensure their plans are in compliance with State Health Orders. The County will address violations of State Health Orders within the County's jurisdiction.
- Violations of State Health Orders can be reported by calling 909-387-3911 or visiting the County's COVID-19 website at <https://sbcovid19.com>.
