I. Results of Vacuum/Pressure Monitoring Equipment Testing

This page should be used to document testing and servicing of vacuum and pressure interstitial sensors. A copy of this form must be included with the Monitoring System Certification Form, which must be provided to the tank system owner/operator. The owner/operator must submit a copy of the Monitoring System Certification Form to the local agency regulating UST systems within 30 days of test date.

Manufacturer:	**Model:**	**System Type:** ☐ Pressure; ☐ Vacuum
Sensor ID		
	Component(s) Monitored by this Sensor:	
	Sensor Functionality Test Result: ☐ Pass; ☐ Fail	Interstitial Communication Test Result: ☐ Pass; ☐ Fail
	Component(s) Monitored by this Sensor:	
	Sensor Functionality Test Result: ☐ Pass; ☐ Fail	Interstitial Communication Test Result: ☐ Pass; ☐ Fail
	Component(s) Monitored by this Sensor:

How was interstitial communication verified?
☐ Leak Introduced at Far End of Interstitial Space;[1] ☐ Gauge; ☐ Visual Inspection; ☐ Other *(Describe in Sec. J, below)*

Vacuum was restored to operating levels in all interstitial spaces: ☐ Yes ☐ No *(If no, describe in Sec. J, below)*

J. Comments: ______________________________

____

[1] If the sensor successfully detects a simulated vacuum/pressure leak introduced in the interstitial space at the furthest point from the sensor, vacuum/pressure has been demonstrated to be communicating throughout the interstice.
