November 2017, Revised August 2018
File No. 01217280.00

This Phase I Environmental Site Assessment Report for a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California, dated November 2017, was prepared by Justin Rauzon and reviewed by Kevin Green.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. The resumes for the individuals below are included in **Appendix F**. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

SCS Engineers (SCS) was retained by Howard Industrial Partners to prepare a Phase I Environmental Site Assessment (Phase I ESA) of a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California (the “Property”). Although associated with a Riverside, California mailing address, the Property is actually in unincorporated San Bernardino County, immediately north of the Riverside-San Bernardino County line. This assessment was performed in conformance with 40 CFR 312, Standards for Conducting All Appropriate Inquiries, and in general conformance with ASTM E1527-13.

The Property is located on the eastern side of Holly Street beginning approximately 550 feet north of the intersection between Holly Street and Wilson Street. It comprises two land parcels. The smaller parcel (12777 Holly Street) is located on the southwestern portion of the Property and encompasses 7.40 acres. It is developed with a residence, horse stables, a few rural outbuildings, and a trailer home. The larger parcel (12685 Holly Street) encompasses 57.40 acres, most of which is developed with the Milestone MX Park, consisting of dirt motocross tracks. Prior to being converted to a motocross park, this portion of the Property was a rural equestrian facility. A ranch house, smaller mobile homes, horse stables, a workshop, and other small outbuildings are located on the northwestern and central-western portions of the Property.

The Property was undeveloped land located to the west of the main course of the Santa Ana River from at least 1896 through the 1930s. The lower portion of the Property was historically within the Santa Ana River floodplain and natural vegetation on it was periodically removed by heavy river flow that crossed the Property. A small adobe house was constructed on the southwestern portion of the Property around 1940 (12777 Holly Street). A few additional structures were added at 12777 Holly Street in the 1950s and 1960s, during which time this rural residential site was developed with equestrian stables and small agricultural fields. The northern portion of the Property was developed with equestrian training facilities beginning in the 1960s (12685 Holly Street). As it developed, this portion of the Property expanded to include stables, a training race track, corals, a workshop, and rural ranch-style and trailer residences. By 2006, the equestrian race track began to be converted to motocross tracks. Milestone MX Park Inc. has operated at the Property since the mid-2000s.

Small quantities of hazardous substances, including turbine oil, paints, and household cleaning supplies are stored at 12777 Holly Street. No indications of spills or stains were noted at this parcel. Motocross bike racing fuel, oil, antifreeze, lubricants, etc. are used and stored at 12685 Holly Street. In general, most of the motocross park visitors are responsible for bringing in and removing any containers of oil or fuel that they use. Heavy equipment used in track upkeep are maintained at a workshop located on the northwestern side of the Property. A red dye diesel aboveground storage tank (AST) is located outside the southern end of the workshop. Several old 55-gallon drums and other chemical containers were noted at the workshop and other outbuildings on the northwestern side of the Property. A few small oil stains were noted on soil, but they were generally superficial, small in size, and are considered *de minimis* in nature. A parts washer that did not appear to be in use was observed at the workshop. No indications of the chemical used in the parts washer was noted. The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts

washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business.

The San Bernardino County Fire Department (SBCFD) has repeatedly cited the Milestone MX Park for poor management of hazardous materials and hazardous waste. In most cases, the citations were for failure to have completed the necessary paperwork, but there were also reports of small spills and stains of hydrocarbons and vehicle fluids. The SBCFD files reviewed did not contain indications of large releases that necessitated remedial excavation.

Regulatory database information did not identify any adjoining or nearby sites likely to have negatively affected the environmental condition of the Property.

Conclusions

In summary, SCS performed a Phase I Environmental Site Assessment of a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California, in conformance with the scope and limitations of 40 CFR 312 and ASTM E1527-13. Any exceptions to, or deletions from, this practice are described in Section 5 of this report.

In the opinion of the Environmental Professionals, this assessment has revealed no evidence of conditions indicative of releases or threatened releases of hazardous substances. Further investigation is not recommended.

Data Gaps

The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business. This data gap may be considered a business environmental risk.

1 INTRODUCTION

SCS Engineers (SCS) was retained by Howard Industrial partners (the “User”) to prepare a Phase I Environmental Site Assessment (Phase I ESA) of a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California (the “Property”). Although associated with a Riverside, California mailing address, the Property is actually in unincorporated San Bernardino County, immediately to the north of the Riverside-San Bernardino County line. A location map for the Property is presented as **Figure 1** in **Appendix A**. This assessment was performed in conformance with 40 CFR 312, Standards for Conducting All Appropriate Inquiries, and in general conformance with ASTM E1527-13.

2 PURPOSE

This Phase I ESA is intended to constitute appropriate inquiry into the previous ownership and uses of the Property, as required to support the assertion of the innocent landowner, contiguous property owner, and/or bona fide prospective purchaser defenses to liability (collectively the landowner liability protections, or LLPs) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA a.k.a. Superfund), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), and the Small Business Liability Relief and Brownfields Revitalization Act of 2002.

The purpose of this investigation was to identify conditions indicative of releases or threatened releases of hazardous substances as defined in CERCLA Section 101, and petroleum products, on, at, in, or to the Property.

If known or suspected contamination is identified, Users seeking to maintain LLPs have responsibilities in addition to completion of an AAI-compliant Phase I ESA. These “continuing obligations” include taking “appropriate care” and “reasonable steps” with respect to known or suspected releases of hazardous substances during the term of property ownership. In addition to these requirements under federal law, there are different requirements under state law with respect to liability protections. On request, SCS can provide support for clients with continuing obligations, as appropriate.

3 SCOPE OF SERVICES

This Phase I ESA is based on:

- Interviews with past and/or present owners, operators, and/or occupants of the Property.
- Reviews of federal, tribal, state, and local government records.
- Visual inspections of the Property and adjoining properties performed on October 5, 2017.
- Review of historical Property use information (topographic maps, aerial photographs, fire insurance maps, existing reports, etc.).
- Commonly known or reasonably ascertainable information about the Property (e.g., interviews with appropriate regulatory agency personnel and review of agency files review of available documents, interviews with other knowledgeable persons).

- Degree of obviousness of the presence or likely presence of contamination at the Property, and the ability to detect the contamination by appropriate investigation.
- Information provided as a result of the additional inquiries conducted by the User.

4 SPECIAL TERMS AND CONDITIONS

This Phase I ESA for a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California has been prepared specifically for Howard Industrial Partners. The report has been prepared in accordance with the care and skill generally exercised by reputable professionals, under similar circumstances, in this or similar localities. No other warranty, express or implied, is made as to the professional opinions presented herein.

No other party, known or unknown to SCS, is intended as a beneficiary of this work product, its content, or information embedded therein. Third parties use this report at their own risk. Third party reliance letters may be issued on request to SCS subject to approval of Howard Industrial Partners and payment to SCS of a fee for such letters.

5 LIMITATIONS AND ASSUMPTIONS

The investigation focused on releases and threatened releases of hazardous substances or petroleum products that could be considered a recognized environmental condition (REC) and/or a liability due to their possible presence in significant concentrations (e.g., above acceptable limits set by the Federal or state government) or due to the potential for contaminant migration through exposure pathways (e.g., soil vapor inhalation or groundwater ingestion). Materials that may contain substances which are not currently deemed hazardous by the federal or state of California EPA were not considered as part of this study.

Unless specifically included in our scope of services, formal surveys for asbestos-containing materials, lead-based paints, fire safety, vapor intrusion, indoor air quality, mold, and similar matters were not part of this assessment. The Property was not evaluated for compliance with land use, zoning, wetlands, or similar laws. This report is not intended to be an environmental compliance audit.

Hazardous substances naturally occurring in plants, soils, and rocks (e.g., heavy metals, naturally occurring asbestos, or radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete, asphalt) is not considered to be of concern unless observations suggest that hazardous substances are likely to be present in significant concentrations.

Unless otherwise noted, sampling and laboratory analyses of soil, water, air, building materials, or other media, were not performed as part of this investigation. Positive identification of hazardous substances can only be accomplished through sampling and appropriate laboratory analysis.

SCS Engineers assumes no responsibility for the accuracy of information obtained from, compiled by, or provided by third-party sources, such as regulatory agency listings. Unless obviously inaccurate or if information exists to the contrary, SCS Engineers assumes that information collected during this environmental site assessment is accurate and correct. Unless warranted, information collected has not been independently validated as part of this assessment.

The following information is the responsibility of the User (40 CFR 312.22) and is not included in this Phase I ESA:

- Specialized knowledge or experience of the User.
- The relationship of the purchase price to the fair market value of the Property. The purchaser of a Property is required to consider whether any differential between the purchase price and the fair market value of the Property is due to the presence of releases or potential releases of hazardous substances at the Property.

Certain other limitations could affect the accuracy and completeness of this report, as follows:

- Site Access Limitations – None.
- Physical Obstructions to Observations – None.
- Outstanding Information Requests – None.
- Historical Data Sources Failure – The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business. This data gap may be considered a business environmental risk.
- Other Limitations – None.

6 GENERAL SITE CHARACTERISTICS

SITE LOCATION

The Property is located on the eastern side of Holly Street beginning approximately 550 feet north of the intersection between Holly Street and Wilson Street. It comprises two adjoining addresses assigned assessor's parcel numbers (APNs) 0260-131-14 and -15. An APN map is provided as **Figure 2** in **Appendix A**.

GENERAL SITE DESCRIPTION

The smaller parcel (0260-131-15) is located on the southwestern portion of the Property and encompasses 7.40 acres. It is developed with a residence, horse stables, a few rural outbuildings, and a trailer home. The larger parcel (0260-131-14) encompasses 57.40 acres, most of which is developed with the Milestone MX Park, consisting of dirt motocross tracks. Prior to being converted to a motocross park, this portion of the Property was a rural equestrian facility. A ranch house, smaller mobile homes, horse stables, a workshop, and other small outbuildings are located on the northwestern and central-western portions of the Property.

ADJOINING PROPERTY USE

- North – Living Spaces occupies two warehouse/distribution center buildings immediately to the north and northeast of the Property (3994 and 3996 South Riverside Drive).
- East – The Santa Ana River adjoins the Property to the east.
- South – A rural residential and equestrian site adjoins the Property immediately to the south (19754 Wilson Street). A sign in front of this site identified it by the name Down River Ranch LLC. The Santa Ana River adjoins the Property to the southeast.
- West – Holly Street adjoins the Property immediately to the west. Imperial Pipe Services (12375 Brown Avenue) and the Boremann Metal Center (12790 Holly Street) occupy industrial sites across the street to the west. The Justice Urban Waste Recycling Center (5190 Wilson Street) is located across the street to the southwest of the Property. Simpson Strong-Tie Company Inc. (12246 Holly Street) occupies an industrial building across the street to the northwest of the Property.

7 PHYSICAL SETTING

PHYSIOGRAPHIC SETTING

The Property is located in the Upper Santa Ana Valley, a broad downwarped area encompassing approximately 50 square miles. The Upper Santa Ana Valley is bordered to the north by the Transverse Ranges (the San Gabriel and San Bernardino Mountains), to the south by the Jurupa Mountains and other ranges of the Perris Block, to the east by the San Jacinto Fault, and to the west by the Chino Fault. According to the U.S. Geological Survey (USGS), San Bernardino South, California 7.5-minute topographic maps, the main portion of the Property is located at an elevation of approximately 830 to 840 feet above mean sea level (amsl). The portions of the Property along the eastern edge of Holly Street are situated at 880 to 900 feet amsl. The upslope on the western side of the Property rises approximately 60 feet above the majority of the parcels. Site topography on the lower portion of the Property is generally flat, with a slight slope to the east.

GEOLOGY AND SOILS

Geologic mapping indicates that surface soil in the area of the main portion of the Property consists of Quaternary alluvial sand, gravel, and clay (Dibblee, 2003). The upslope on the western side of the Property is mapped as older alluvial fan deposits of sand with minor gravel. In the vicinity of the Property, surficial sediments appear to consist of sand, gravel, and cobble fluvial deposits from nearby historical drainage channels. Underlying the surficial units are early Pleistocene-age Older Alluvium consisting of sand, silty-sand, and gravel. The alluvial sediments range in thickness from 350 to 500 feet.

GROUNDWATER

The Property lies in the Riverside-Arlington subbasin of the Upper Santa Ana Valley. First groundwater in the region is approximately 190 to 200 feet below ground surface in the Older Alluvium. The direction of groundwater flow in the area is anticipated to be to the east-southeast, towards the Santa Ana River. Groundwater conditions and quality can change rapidly

in the Chino sub-basin. Based on a review of information for nearby sites on the State Water Resources Control Board (SWRCB) GeoTracker website, first groundwater occurs between 30 and 50 feet below ground surface (bgs). Based on proximity, groundwater is anticipated at a similar depth beneath the Property.

RADON

According to the California Department of Public Health's February 2016 Radon Program report, screening in the area of the Property (92509 zip code) found no locations (out of 14) where buildings had radon levels greater than or equal to 4 picocuries per liter (pCi/L), the EPA action level. The maximum radon result for the Property's zip code was 3.3 pCi/L. The alluvial geology of the Property area is not normally associated with elevated radon levels. Note that elevated radon levels may also be attributed to other radon sources such as leaking natural gas or numerous building products such as drywall, cinderblock, concrete floors, brick, or stone products. Based on the available information, therefore, elevated radon gas is not expected in the area of the Property.

8 SITE INSPECTION

Justin Rauzon of SCS conducted an inspection of the Property and surrounding area on October 5, 2017. An aerial photo and photographs of the Property are provided in **Appendix B**.

Access to the Property was arranged by Michael Tyre of Howard Industrial Partners. Mr. Michael Bradvik, the owner of 12777 Holly Street directed the tour of the southwestern portion of the Property. There are two residences situated along the eastern side of Holly Street, one an old adobe structure built around 1940 and another built in the 1960s. A mobile home and a few outbuildings, including horse corals are located on the lower portion of 12777 Holly Street. An old, out-of-service, concrete irrigation water cistern was observed to be filled with cleared vegetation on the north-central portion of the 12777 Holly Street parcel. Most of this parcel is covered with sparse vegetation and corals for keeping horses. No areas of environmental concern were observed on this parcel during the site inspection.

The 12685 Holly Street portion of the Property was mostly operating as the Milestone motocross park at the time of the site inspection. One small building near the entrance housed a Creative Graphix retail store. The main offices for the park are located inside a converted equestrian building on the western-central portion of the Property. This building also houses a small retail store and motocross repair shop.

There are seven motocross race tracks covering most of the Property. These include a Pee-Wee course, a super cross course, a "Vet" course, the main track, an amateur track, a flat oval track, and the Geico Honda track. There are a few parking areas under shade trees at the center and eastern sides of the Property.

A ranch-style house, former quarter horse equestrian building, a breeding barn, horse stalls housing horses or dogs, and a few other small, mobile home residences are located on the northwestern portion of the Property. Some old vehicles, old boats, and junk, including a refrigerator, barbecues, old ATVs, household trash, empty 55-gallon drums, fencing, irrigation pipe, old tires, etc. were observed near the residences and other outbuildings on the northwestern

portion of the Property. Trash, including tires, bottles, empty 5-gallon containers, crates, etc. were also present inside some of the old equestrian building stalls. Bags of trash, bags of recyclable bottles, and empty 5-gallon containers of motocross fuel were also observed outside one of the buildings on the northwestern side of the Property.

A workshop building is also located on the northwestern portion of the Property. Heavy equipment used in the maintenance of the tracks are parked near the workshop. A concrete pit for working on the underside of vehicles was observed at the workshop. The bottom of the pit and the concrete pavement in the workshop had minor staining.

A pile of tires and cleared vegetation are located on the southern side of the Property.

HAZARDOUS SUBSTANCES

Small containers (less than five gallons) of hazardous substances are stored at 12777 Holly Street. The containers include canisters of gasoline and diesel, small cans of paint, creosote oil, carpet and pad adhesive, grease, and household cleaning supplies are stored at 12777 Holly Street. There were no indications of spills or staining observed anywhere on the 12777 Holly Street parcel during the site inspection.

Park visitors are permitted to refuel and perform minor maintenance on their motocross bikes in the parking areas, but the management company does not allow on-site disposal of any empty hazardous materials containers. Canisters of racing fuel are sold in the retail store at the Property. Containers of new oil and lubricant sprays are also stored inside a small maintenance shop at the main Milestone Park building.

Several 55-gallon drums were observed in the area of the outbuildings on the northwestern side of the Property and in the workshop area. Many of the drums were empty. One oil-stained drum was observed on its side, but the ground near it did not appear to have been affected. Some small oil stains were observed on bare soil near the workshop area, but they were generally small in size and are considered *de minimis* in nature. Red dye diesel is stored in an aboveground storage tank near the workshop building. Smaller canisters for gasoline and diesel, containers of antifreeze and oil, paints, etc. were also observed at the workshop. One old parts washer, not apparently in use, was observed at the workshop. No indications of the chemical used in the parts washer was noted. Waste oil was observed in an open-top dumpster-type container on the northwestern side of the Property.

In general, there were no indications of significant spills or releases of chemicals. As discussed in Section 11, the facility has repeatedly been cited for poor management of its hazardous materials and hazardous waste. The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business.

NATURAL DRAINAGE

Natural waterways are not currently located on the Property. Runoff from the Property infiltrates into the ground or flows overland towards the Santa Ana River.

DISTURBED AREAS

There is no indication that wastes have been landfilled at the Property. As discussed above, there are large bermed motocross tracks on the Property. Some of the soil used in the race tracks was reportedly imported from other sites. Imported soil is sometimes considered an environmental concern, given the potential that the source material may have been affected by the release of a hazardous substance prior to being imported. As discussed in Section 11, some of the soil was imported from an undeveloped site located across the Santa Ana River and some was reportedly imported from a site in the San Bernardino Mountains. According to the geotechnical information provided for review (discussed in Section 11) and reports from the motocross business personnel who arranged and witnessed the soil import, no indications of contaminants were noted in imported soil materials. Based on the available information, SCS does not consider it likely that the imported soil would be a concern to a regulatory agency and, therefore, does not consider it to be a REC.

ELEVATORS AND OTHER HYDRAULIC EQUIPMENT

No elevators or other hydraulic equipment were observed at the Property.

WELLS

There are three water supply wells on the Property. One is located inside an outbuilding on the center of the 12777 Holly Street portion of the Property, presumably for the equestrian facility. The second and third are located between the super cross and main motocross tracks. Water from the second and third wells is used for dust control across the motocross tracks and parking areas.

One water supply well was also observed outside the southeastern corner of the Property (off-site).

ELECTRICAL EQUIPMENT

A few pole-mounted, Southern California Edison (SCE) electrical transformers servicing the buildings were noted on the Property. SCE has stated that they have never specified the purchase of distribution transformers utilizing PCBs as the insulating/cooling fluid. SCE transformers utilize mineral oil exclusively. In a statistically valid test of over 20,000 SCE distribution transformers, SCE determined that the concentrations of PCBs in the mineral oils was less than 50 parts per million (ppm) in over 96 percent of the units. Based on the available information, no significant environmental impact to the Property is anticipated from this transformer.

WASTEWATER

Industrial wastewater is not generated at the Property. Sanitary wastewater is directed to at least three septic systems at the Property.

DRINKING WATER

Drinking water is supplied to the Property by the West Valley Water District. All large public water suppliers in California have been required to test their water and comply with federal and state drinking water standards since the mid-1980s. Consequently, lead and other contaminants of concern are not expected to be present above applicable primary and secondary drinking water standards.

STORAGE TANKS

In addition to water storage tanks, the following aboveground storage tanks (ASTs) were observed at the 12685 Holly Street portion of the Property:

- Two approximately 300-gallon propane gas tanks are located at the northwestern portion of the Property.
- An approximately 2,000-gallon red dye diesel tank is located outside the southern end of the workshop at the northwestern corner of the Property. It is situated inside a secondary containment rupture basin. No indications of spills were noted near the tank.

No evidence (fill ports, vent lines, or dispensers) of underground storage tanks (USTs) was observed on the Property.

VISUAL INSPECTION OF ADJOINING SITES

No obvious evidence of recognized environmental conditions or indications of contamination (e.g. remediation equipment, staining, USTs, etc.), were observed on adjoining sites during the site inspection.

9 INTERVIEWS

SCS interviewed Mr. Bradvik and Milestone Park personnel during the site inspection. They provided historical and operational information during the site inspection. Mr. Bradvik noted that the adobe residence at 12777 Holly Street was first constructed around 1939 or 1940 and that that parcel had been in his family as an equestrian ranch since 1965. The larger parcel (12685 Holly Street) has been owned by the Ellsworth family, a well-known quarter horse racing family, since at least the 1960s. SCS interviewed Mr. Aaron Cooke, the General Manager of Milestone MX. Mr. Cooke and Mr. Bradvik also completed Operator Questionnaires included in **Appendix G**.

10 SITE HISTORY

Site history was evaluated from the following sources:

- Historical USGS topographic maps provided by Environmental Data Resources (EDR) (September 28, 2017).
- Historical aerial photographs provided by EDR (September 28, 2017).
- A search was made of EDR-Sanborn collection and no maps of the Property were found (September 28, 2017).
- A City Directory review report provided by EDR (September 30, 2017).

Copies of topographic maps, historical aerial photographs, city directories, and the EDR document showing no Sanborn map coverage for the Property are included in **Appendix C**.

Year	Description	Source
1896 to 1901	The Property was undeveloped land located immediately to the west of the Santa Ana River. The adjoining sites were also undeveloped.	Topographic maps
1931	<p>The Property was undeveloped land. Much of the Property appeared to be within the Santa Ana River floodplain and was covered with vegetation. A water course channel crossed the Property. The bluffs were visible on the western edge of the Property, with no obvious access points to the lower portion of the Property.</p> <p>Holly Street was a dirt road adjoining the Property to the west. Orchards and agricultural row crops were located across the road to the west and northwest. The areas to the north and south were undeveloped and similarly part of the Santa Ana River floodplain, though mostly dry and covered with vegetation. A few dirt pathways were visible to the south of the Property. The Santa Ana River was present to the east of the Property.</p>	Aerial photo
1938	<p>No significant changes from the 1931 aerial photo were noted on the Property or adjoining sites, with the exception that wider river flows had cleared some of the vegetation on the Property and adjoining sites to the north and south.</p> <p>The topographic map showed the dirt pathways on the adjoining site to the south.</p>	Aerial photo and Topographic map
1942	No significant changes from the 1938 topographic map were noted on the Property or adjoining sites. The Santa Ana River was depicted crossing the eastern side of the Property.	Topographic map
1943	One small structure was depicted along the western edge of the Property, likely corresponding to the adobe house Mr. Bradvik indicated was built around 1939-1940. Parts of the eastern side of the Property were depicted as wetland, to the west of the main Santa Ana River water course.	Topographic map

Year	Description	Source
1949	<p>A few small structures associated with 12777 Holly Street were developed on the southwestern portion of the Property. The area to the east and southeast of the buildings was cultivated agricultural land. The rest of the Property remained undeveloped.</p> <p>A small, rural structure was also present to the north of the dirt pathways to the south of the Property.</p>	Aerial photo
1953 and 1954	<p>Two small structures were present on the southwestern portion of the Property (12777 Holly Street). The wetlands boundary on the eastern side of the Property was altered from the 1943 map. This area was widely covered with floodplain vegetation again. A small area at the southwestern portion of the Property remained an agricultural field.</p> <p>The agricultural orchards were depicted across the street to the west of the northern side of the Property. A few small structures were also depicted to the south of the Property. A dirt road was depicted to the northeast of the Property, along the western edge of the Santa Ana River.</p>	Aerial photo and Topographic map
1959	<p>Floodplain vegetation was largely cleared from the Property and most of it appeared to be undeveloped. The rural farmhouse structures were still present on the southwestern part of the Property and the associated agricultural fields in this area were expanded.</p> <p>A few rural structures were present to the south of the Property.</p>	Aerial photo
1966	<p>A large horse racing training track was developed on the eastern side of the Property. A dirt access road was developed from Holly Street down onto the northern portion of the Property. Equestrian stables, corals, workshop, and the rural ranch-type structures currently at 12685 Holly Street were developed on the northwestern and central-western portions of the Property. An expanded residential building and a few additional outbuildings were noted at the southwestern portion of the Property (12777 Holly Street).</p> <p>The areas to the north and west were agricultural land and the rural structures were still present to the south.</p>	Aerial photo

2012	The 2012 topographic map does not include site-specific details. No significant changes from the 1980 topographic map or 2010 aerial photo were noted on the Property or adjoining sites.	Aerial photo and Topographic map

HISTORICAL USE SUMMARY

The Property was undeveloped land located to the west of the main course of the Santa Ana River from at least 1896 through the 1930s. The lower portion of the Property was historically within the Santa Ana River floodplain and natural vegetation on it was periodically removed by heavy river flow that crossed the Property. A small adobe house was constructed on the southwestern portion of the Property around 1940 (12777 Holly Street). A few additional structures were added at 12777 Holly Street in the 1950s and 1960s, during which time this rural residential site was developed with equestrian stables and small agricultural fields. The northern portion of the Property was developed with equestrian training facilities beginning in the 1960s (12685 Holly Street). As it developed, this portion of the Property grew to include stables, a training race track, corals, a workshop, and rural ranch-style and trailer residences. By 2006, the equestrian race track began to be converted to motocross tracks. Milestone MX Park Inc. has operated at the Property since the mid-2000s.

The existence of past agricultural activities on the Property and in adjacent areas indicates a potential for pesticide and/or heavy metal (associated with dusting powders) contamination. In SCS's experience, it is not uncommon to find trace levels of pesticides in soils at former agricultural areas in Southern California. However, these trace concentrations are rarely cause for environmental concern. It is our opinion that, without specific evidence of pesticide storage or mismanagement on the Property, past use for agricultural purposes is considered to be a *de minimis condition* and collection and analysis of soil samples for pesticides is unwarranted.

HISTORICAL USE OF ADJOINING SITES

The adjoining sites were undeveloped or agricultural land from at least 1896 through the 1940s. A few small, rural structures were developed to the south of the Property by 1949. A horse race track, stables, and other structures were developed to the north of the Property in the 1980s. Around this time, the site to the south was also further developed as a rural equestrian/residential site. The area across the street to the west was developed with an outdoor pipe yard and industrial warehouse buildings in the mid-2000s. By 2009, two large industrial warehouse buildings replaced the horse racing track and structures to the north of the Property.

1.1 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

In order to identify commonly known or reasonably ascertainable information about the Property, SCS reviewed previous environmental reports and various regulatory agency files and interviewed regulatory agency personnel. The following information was identified.

PREVIOUS ENVIRONMENTAL REPORTS

Howard Industrial Partners provided the following two geotechnical investigation reports, which are reportedly the sites from which soil was imported to the Property to construct the motocross tracks and berms. The seller of the Property provided these two reports in response to Howard Industrial Partners' request for documentation of the source of the imported soil.

Strata-Tech, Inc., July 19, 2005. *Preliminary Geotechnical Engineering Investigation: Tentative Tract 3253, NWC of River (sic) Street & Alamo Street, Riverside, California.*

Tetra Tech Inc., January 12, 2016. *GeoTechnical Engineering Report: Seismic Rehabilitation, Lake Gregory Dam, City of Crestline, California.*

Neither of these reports specifically discusses exporting soil to the Property. These are geotechnical reports and do not contain environmental laboratory sampling data. However, the Strata-Tech report indicates that the source of some of the imported soil to the Property was located across the river to the east-southeast of the Property (note that it is “Rivera Street” not “River Street” as described in the title of the report). It was reportedly a vacant parcel of land, a portion of which can be seen on the historical aerial photos shown in **Appendix C**. This source area was undeveloped, vacant land prior to the mid-2000s when it was developed with industrial tilt-up buildings. The soil described in the Strata-Tech report was described as artificial fill in the upper 1 to 3 feet, with underlying native soils. Groundwater was encountered at 16 feet bgs. Based on a review of historical aerial photos and this report, no indications of environmental contamination from this source material is anticipated.

The Tetra Tech project site is considered a source of a less significant amount of the imported fill soil, since the motocross tracks were largely developed by 2016. This report describes a seismic rehabilitation study of a dam project area in Crestline, San Bernardino. No further information about how this report relates to soil imported to the Property was provided to SCS. However this report also did not include any indications of potentially contaminating substances in soils that may have been imported to the Property.

Copies of these report are provided in **Appendix C**.

REGULATORY AGENCY RECORDS

Local regulatory agencies and other sources were contacted in an effort to identify any known or suspected contamination sites or incidents of hazardous waste storage or disposal which might have resulted in soil and/or groundwater contamination, or VOC (volatile organic compound) vapor migration to the Property. Generally, this includes records for the Property and adjacent parcels, although relevant information for other sites of possible interest in the area (up to one mile) may also be included. Within the unincorporated areas of the County of San Bernardino, the San Bernardino County Fire Department (SBCFD) generally acts as the lead enforcement agency for underground storage tank compliance. If a tank has leaked and groundwater contamination is suspected, the Santa Ana Regional Water Quality Control Board (SARWQCB) generally becomes the lead agency in supervising contaminant characterization and cleanup.

California Environmental Protection Agency Files

The Property is not a listed site on the California Environmental Protection Agency (CalEPA) Regulated Site Portal website (**Appendix D**).

Santa Ana Regional Water Quality Control Board Files

The Property does not appear in the SWRCB’s GeoTracker website. Recent SARWQCB case files, if any, would be listed on this website (**Appendix D**).

Department of Toxic Substances Control Files

The Property does not appear in the California Department of Toxic Substances Control (DTSC) EnviroStor website. Recent DTSC case files, if any, would be listed on this website (**Appendix D**).

South Coast Air Quality Management District Files

SCS reviewed South Coast Air Quality Management District (AQMD) files through the online Facility INformation Detail (FIND) website.

In October 2012, Milestone MX (Facility ID: 172894 – address mistakenly listed as 16685 Holly Street) was issued a notice of violation for fugitive dust beyond the property line. No permits for the facility were listed. The follow up status is listed as “In Compliance” and the case was closed on July 1, 2014. The AQMD files are not indicative of a significant release to the environment.

San Bernardino County Fire Department Files

SCS requested SBCFD files for both addresses associated with the Property. The SBCFD does not have files related to 12777 Holly Street. A copy of the file information provided for 12685 Holly Street is provided in **Appendix D**. In 2005, the Rialto City Fire Department contacted SBCFD regarding a fire that occurred at 12685 Holly Street. A barn at the Property had reportedly burned down, but utility pole and railroad tie supports in the barn were not completely consumed. The SBCFD indicated to the ranch owner that the poles would need to be handled separately from the other debris and which landfill could receive them.

The SBCFD file also includes information about the Milestone Ranch MX Park, Inc. A hazardous materials business plan (HMBP) was first submitted to the agency for the motocross business in 2006. The facility reported the use and storage of oxygen, acetylene, diesel fuel, waste oil, antifreeze, parts cleaner, automotive batteries, and motor oil. No chemical composition of the parts cleaner was provided in the materials.

In 2008, the SBCFD responded to a request regarding two abandoned containers of waste oil at the Property. One of the containers, a 55-gallon drum was tipped over and leaking its contents along the Holly Street gutter. A 150-foot trail of waste oil went downhill from the point of origin into a storm drain. There was “minor contamination” observed in the storm drain. The San Bernardino County Department of Public Works was contacted regarding the incident and to oversee the cleanup. Starlite Environmental was reportedly contracted for the cleanup.

The facility was also inspected in 2009, 2013, and 2016 and the SBCFD noted that the facility had a maintenance shop used for equipment used to maintain and repair the motocross tracks. The business was cited for various issues, including not having a current Hazardous Materials Business Plan (HMBP), for not having adequate employee training and other paperwork issues relating to the management of hazardous waste, for having sixteen 5-gallon containers of waste liquid around the horse stables, for failure to remove hazardous waste in a timely manner, and again for failure to prevent the release of a hazardous material (containers of used oil were not properly sealed). The facility was also cited for not operating to prevent a spill or release, because spilled oily absorbent was observed on the floor near 55-gallon drums in the

maintenance shop. Used oil was not being stored properly and hazardous waste was being stored for more than 180 days. Photos included with the report showed the 20-gallon parts washer in the maintenance shop and 55-gallon drums of new and used parts washer, but the drums were not properly labeled. The file also contains copies of hazardous waste disposal manifests submitted as verification of proper disposal following the notices of violations. The facility was again cited in 2017 for failure to have a current HMBP.

In general, while the SBCFD files indicate poor management, with the exception of the oil release in 2008, the file did not contain obvious indications of releases to the environment. The release in 2008 was reported to be waste oil and it was cleaned up at the time it was discovered.

1.2 REVIEW OF FEDERAL, STATE, TRIBAL, AND LOCAL GOVERNMENT DATABASES

A database search for sites listed on various federal, state, tribal, and local databases in the area around the Property was obtained from EDR (September 28, 2017). A description of each of the databases searched is included in the report, which is attached as **Appendix E**. Among the databases included in the EDR report are NPL (federal, tribal, and state-equivalent), proposed and delisted NPL, CORRACTS (RCRA facilities subject to corrective actions), hazardous waste sites identified for investigation or remediation (SEMS [Superfund Enterprise Management System, formerly known as CERCLIS], State CERCLIS, VCP, Brownfields Calsites, etc.), LUST, sites with engineering controls, former CERCLIS (NFRAP), RCRA and state hazardous waste generators, ERNS, SWLF, USTs, and Toxic Pits.

Review of these records satisfies all requirements as set forth in 40 CFR Section 312.26 (b) and (c) with regard to the review of federal, tribal, and state government records of databases of such government records and local government records and databases of such records pertaining to both the Property and the nearby or adjoining properties. Further, the search distances for each particular database are as specified in 40 CFR 312.26 and ASTM E1527-13.

Any known or suspected contaminated sites included on these lists within 0.25 miles of the Property are discussed in the following text. As a general rule, sites beyond 0.25 miles are not anticipated to impact a site significantly. Any sites beyond 0.25 miles with a high potential to impact the Property are also discussed. (Please note: the distances and directions listed in this report have been field verified and might not always match those in the EDR report.)

Sites such as TSD facilities, hazardous waste generators, HAZNET, FINDS, SQGs, LQGs, USTs, HIST UST, RCRA violations, and TRIS facilities with toxic chemical releases (generally in accordance with permitting requirements - into the air, water, or land as reported under SARA Title III) use or store hazardous materials and thus may pose a potential problem in the event of a spill or leak. However, unless these sites also appear in an agency list of contaminated sites, there is no evidence of any problems at this time. Therefore, sites on these lists will not be discussed unless on or in close proximity to the Property.

Please refer to **Appendix E** for further information on these sites.

PROPERTY LISTINGS

Milestone Ranch MX Park, Inc. and Milestone are listed in the San Bern. Co. Permit and HAZNET databases. The San Bern. Co. Permit listing is associated with the SBCFD file discussed above. The facility reported storing between 1,320 and 10,000 gallons of petroleum products in an AST and storing between four and 10 hazardous materials. The HAZNET database contains facility and manifest data extracted from hazardous waste manifests each year by the DTSC. According to the HAZNET information, Milestone reported generating waste oil and mixed oil and other unspecified wastes between 2009 and 2013. The database report does not include any indications of violations or releases to the environment.

ADJACENT SITE LISTINGS

Pacific Coast Steel Inc. is listed in the San Bern. Co. Permit database at 12790 Holly Street, across the street to the west of the Property. The database information indicates that this facility has between 26 and 50 employees, stores between four and 10 chemicals, and is a conditionally exempt small quantity generator of hazardous waste. This listing does not provide any indications of violations or other issues indicative of a release that could affect the environmental condition of the Property.

Popelino's Recycling Facility is listed in the AST database at 1880 Brown Avenue and Rios Recycling Facility is listed in the SWF/LF, NPDES, and WDS databases at 5190 Wilson Street and 1755 Brown Avenue, across the street to the southwest of the Property. The Rios Recycling Facility is listed as a chipping and grinding composting facility that processes green materials and wood waste. Available information indicates it is not a landfill, but a facility that temporarily receives and processes green waste. There are no details about the size of type of chemical stored in the AST at the Popelino's facility. These facilities are located generally cross-gradient from the Property. Based on the available information, SCS considers it unlikely that these sites have affected the environmental condition of the Property.

Borrmann Metal Center, Inc. is listed in the San Bern. Co. Permit database, at 12771 Brown Avenue, across the street to the west of the Property. The facility is an inactive conditionally exempt small quantity generator of hazardous waste. It reportedly stored between four and 10 chemicals in 2017. Imperial Pipe Services, LLC is also listed in the San Bern. Co. Permit database at 12375 Brown Avenue, to the west of the Property. This facility is reportedly a small quantity hazardous waste generator that stores between 11 and 30 chemicals. These listings contain no indications of violations or releases of hazardous substances.

OTHER DATABASE SITES

The EDR report provides a summary table of regulatory database sites within specified distances of the Property, including standard environmental records, additional environmental records, high risk historical records, and recovered governmental records. This summary table is provided beginning on Page 4 of the EDR report (**Appendix E**).

One other site located within 0.25 miles of the Property (Varner Construction) appears in the LUST database, but it is located cross-gradient and the case status is described as closed. Based on the available information it is not anticipated to negatively affect the environmental condition of the Property. Note that a few sites in the EDR database report are mistakenly described to be approximately 0.19 miles from the Property. The Arco Tank Farm, Chevron Tank Farm, Unocal Tank Farm, and Southern Pacific Pipeline are actually located at addresses along South Riverside Avenue, more than two miles to the north of the Property. While they are listed in the SLIC database and have documented releases, they are not anticipated to affect the Property.

Several sites located within 0.25 miles appear in databases not typically associated with documented releases, such as San Bern. Co. Permit, RCRA-SQG, FINDS, ECHO, HAZNET, AST, UST, SWEEPS UST, CA FID UST, HWT, and NPDES. Based on a review of the database information, none of these sites are known to have any contamination at this time; therefore, none are anticipated to have negatively affected the environmental condition of the Property. Similarly, none of the sites situated beyond 0.25 miles are anticipated to have impacted the Property.

Unmappable or Orphan Sites

Four unmappable sites were identified in the EDR report. Unmappable sites cannot be plotted due to inaccurate or incomplete addresses. Based on review of the provided data, including the estimated locations of the unmappable sites in relation to the Property, it appears unlikely that the unmappable sites have adversely affected the environmental condition of the Property.

LANDFILLS

According to the EDR-provided review of the California Department of Resources Recycling and Recovery (CalRecycle) Solid Waste Information System, the Rios Recycling facility is the only solid waste facility/landfill site located within 0.25 miles of the Property. As previously discussed, this is actually a green waste composting facility, not a landfill. Two other landfill facilities also appear in the database within 0.5 miles of the Property. The Composting-Inland Co. facility is a proposed (not constructed) green waste composting facility actually located in Colton, more than two miles north of the Property. The Kore Infrastructure site is a proposed solid waste transfer facility planned to be located approximately 0.4 miles north of the Property. Since neither of these two facilities has yet been constructed, no impacts to the environmental condition of the Property are anticipated.

OIL AND GAS WELLS

Available oil and gas well maps from the California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) were reviewed to identify oil and gas wells on the Property or in the nearby area. According to the DOGGR Well Finder online database, the property is not located within the boundaries of a delineated oil and gas field.

A map showing the location of the Property relative to nearby oil and gas wells is provided in **Appendix D**. No oil and gas wells are located on the Property or within one mile of the Property.

NATIONAL PIPELINE MAPPING SYSTEM

SCS reviewed the National Pipeline Mapping System (NPMS) website for the Property and surrounding area to identify any hazardous materials pipelines. The NPMS is a geographic information system (GIS) created by the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration (PHMSA), and Office of Pipeline Safety (OPS) in cooperation with other federal and state governmental agencies and the pipeline industry. The NPMS consists of geospatial data, attribute data, public contact information, and metadata pertaining to the interstate and intrastate hazardous liquid trunklines and hazardous liquid low-stress lines as well as gas transmission pipelines, liquefied natural gas (LNG) plants, and hazardous liquid breakout tanks (tanks that receive and store liquids transported by pipeline) jurisdictional to PHMSA. The nominal accuracy of geospatial data in the NPMS is +/-500 feet. The NPMS does not contain information on interconnects, pump and compressor stations, valves, direction of flow, capacity, throughput, or operating pressure. In addition, distribution and gathering pipelines are not included in the NPMS.

The NPMS is built from data submitted by pipeline, LNG plant, and breakout tank facility operators. Since 2002, transmission pipeline and LNG plant facility operators are required to submit mapping information to the NPMS and to update their submissions annually. Breakout tank operators are able to submit data to the NPMS on a voluntary basis.

Based on review of the NPMS website, there are no hazardous materials pipelines within 0.5 miles of the Property (**Appendix D**).

13 USER PROVIDED INFORMATION

A User Questionnaire was not returned to SCS for inclusion in the report. Howard Industrial Partners provided no information beyond what is discussed above.

TITLE RECORDS

No title report was provided to SCS for review.

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

No information regarding environmental liens or activity and use limitations was provided to SCS. No environmental liens or activity/use limitations were identified by SCS during the course of this assessment.

SPECIALIZED KNOWLEDGE

No specialized knowledge regarding the Property was provided to SCS by the User.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No property valuation information was provided to SCS.

14 DEGREE OF OBVIOUSNESS OF THE PRESENCE/LIKELY PRESENCE OF CONTAMINATION ON THE PROPERTY

As discussed above, the Property was undeveloped land located to the west of the main course of the Santa Ana River from at least 1896 through the 1930s. The southwestern parcel has been a rural residential and equestrian ranch since at least 1940. No indications of the presence or likely presence of contamination were noted on that parcel. The larger parcel on the Property was developed with equestrian training facilities beginning in the 1960s (12685 Holly Street). As it developed, this portion of the Property grew to include stables, a training race track, corals, a workshop, and rural ranch-style and trailer residences. By 2006, the equestrian race track began to be converted to motocross tracks. Milestone MX Park Inc. has operated at the Property since the mid-2000s. Red dye diesel fuel, new and used oil, antifreeze, containers of motocross racing fuel, and a parts washer have been used and stored at the northern portion of the Property since 2006. The workshop currently used for upkeep of the track maintenance equipment predates the motocross business. Some small oil stains were observed on bare soil near the workshop area, but they were generally small in size and are considered *de minimis* in nature.

15 DATA GAPS

A data gap represents an inability on the part of the environmental professional to obtain information required by the standards and practices of 40 CFR 312 to fully identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Property.

The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business. This data gap may be considered a business environmental risk.

16 FINDINGS AND OPINIONS

Based on the scope of work performed, SCS finds the following:

The Property is located on the eastern side of Holly Street beginning approximately 550 feet north of the intersection between Holly Street and Wilson Street. It comprises two land parcels. The smaller parcel (12777 Holly Street) is located on the southwestern portion of the Property and encompasses 7.40 acres. It is developed with a residence, horse stables, a few rural outbuildings, and a trailer home. The larger parcel (12685 Holly Street) encompasses 57.40 acres, most of which is developed with the Milestone MX Park, consisting of dirt motocross tracks. Prior to being converted to a motocross park, this portion of the Property was a rural equestrian facility. A ranch house, smaller mobile homes, horse stables, a workshop, and other small outbuildings are located on the northwestern and central-western portions of the Property.

The Property was undeveloped land located to the west of the main course of the Santa Ana River from at least 1896 through the 1930s. The lower portion of the Property was historically within the Santa Ana River floodplain and natural vegetation on it was periodically removed by heavy river flow that crossed the Property. A small adobe house was constructed on the

southwestern portion of the Property around 1940 (12777 Holly Street). A few additional structures were added at 12777 Holly Street in the 1950s and 1960s, during which time this rural residential site was developed with equestrian stables and small agricultural fields. The northern portion of the Property was developed with equestrian training facilities beginning in the 1960s (12685 Holly Street). As it developed, this portion of the Property expanded to include stables, a training race track, corals, a workshop, and rural ranch-style and trailer residences. By 2006, the equestrian race track began to be converted to motocross tracks. Milestone MX Park Inc. has operated at the Property since the mid-2000s.

Small quantities of hazardous substances, including turbine oil, paints, and household cleaning supplies are stored at 12777 Holly Street. No indications of spills or stains were noted at this parcel. Motocross bike racing fuel, oil, antifreeze, lubricants, etc. are used and stored at 12685 Holly Street. In general, most of the motocross park visitors are responsible for bringing in and removing any containers of oil or fuel that they use. Heavy equipment used in track upkeep are maintained at a workshop located on the northwestern side of the Property. A red dye diesel AST is located outside the southern end of the workshop. Several old 55-gallon drums and other chemical containers were noted at the workshop and other outbuildings on the northwestern side of the Property. A few small oil stains were noted on soil, but they were generally superficial and small in size, and are considered *de minimis* in nature. A parts washer that did not appear to be in use was observed at the workshop. No indications of the chemical used in the parts washer was noted. The past use of a parts washer at the workshop with unknown chemical composition is considered a data gap. The motocross business has been operating at the Property since 2006. SCS considers it unlikely that the solvent used in the parts washer post-2006 would contain chlorinated solvents. However, it is unknown if the parts washer pre-dated the motocross business.

The SBCFD has repeatedly cited the Milestone MX Park for poor management of hazardous materials and hazardous waste. In most cases, the citations were for failure to have completed the necessary paperwork, but there were also reports of small spills and stains of hydrocarbons and vehicle fluids. The SBCFD files reviewed did not contain indications of large releases that necessitated remedial excavation.

Regulatory database information did not identify any adjoining or nearby sites likely to have negatively affected the environmental condition of the Property.

In summary, SCS performed a Phase I Environmental Site Assessment of a 64.80-acre site located at 12685 and 12777 Holly Street, Riverside, California, in conformance with the scope and limitations of 40 CFR 312 and ASTM E1527-13. Any exceptions to, or deletions from, this practice are described in Section 5 of this report.

In the opinion of the Environmental Professionals, this assessment has revealed no evidence of conditions indicative of releases or threatened releases of hazardous substances. Further investigation is not recommended.

Photo 1 – Mobile home on the northwestern corner of 12777 Holly Street.

Photo 2 – Old concrete irrigation storage cistern on the 12777 Holly Street portion of the Property.

Photo 3 – Storage building on the northern side of 12777 Holly Street. It is used to store equestrian supplies and personal belongings of the family.

Photo 4 – Covered horse coral on the central-northern portion of the 12777 Holly Street portion of the Property.

Photo 5 – Small outbuilding and piles of vegetation on the 12777 Holly Street portion of the Property.

Photo 6 – Water supply well inside one of the outbuildings at the center of the 12777 Holly Street parcel.

Photo 7 – Small chemical containers observed at 12777 Holly Street.

Photo 8 – Tires and open area at the northeastern portion of the 12777 Holly Street parcel.

Photo 9 – North-central portion of 12777 Holly Street.

Photo 10 – View from eastern side of 12777 Holly Street portion of the Property looking towards the west.

Photo 11 – Horse corals on the southeastern portion of 12777 Holly Street.

Photo 12 – View from the southeastern portion of 12777 Holly Street to the west.

Photo 13 – The south-central portion of 12777 Holly Street.

Photo 14 – Old, empty drums, partial drums, and tires on the southwestern portion of 12777 Holly Street.

Photo 15 – Horse corals on the 12777 Holly Street portion of the Property.

Photo 16 – One of the old outbuildings on 12777 Holly Street housing former horse stalls.

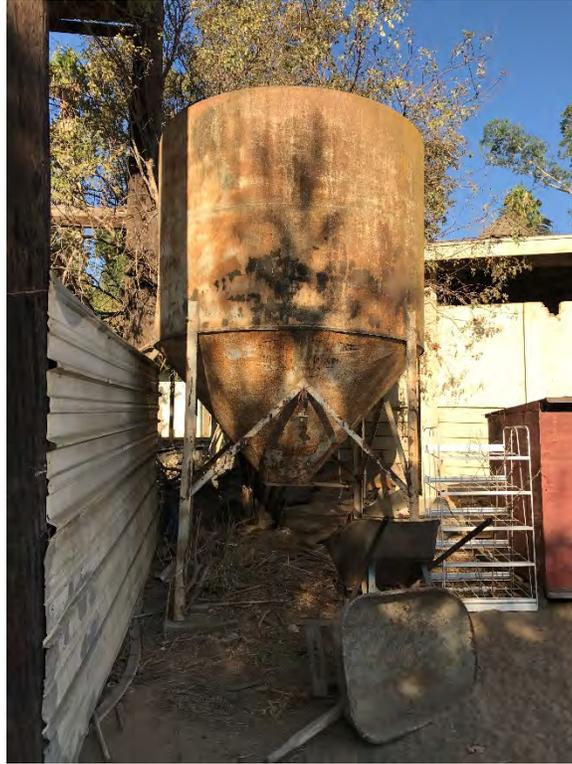

Photo 17 – An old feed storage silo on the 12777 Holly Street portion of the Property.

Photo 18 – The residence on the western portion of 12777 Holly Street.

Photo 19 – View to the west of the Property.

Photo 20 – Old adobe house from the 1940s on the western side of 12777 Holly Street.

Photo 21 – View from the southwestern corner of the Property looking out over 12777 Holly Street.

Photo 22 – View showing the entrance to the Milestone Park portion of the Property, at the bottom of the dirt access road.

Photo 23 – A Creative Graphix retail space on the western portion of the Property.

Photo 24 – The main Milestone offices in an old horse stable building on the central-western portion of the Property.

Photo 25 – The Pee Wee track on western-central portion of the Property.

Photo 26 – Propane gas tank at the northwestern portion of the Property.

Photo 27 – A small residential building on the northwestern portion of the Property.

Photo 28 – Junk storage at the northwestern portion of the Property.

Photo 29 – An old equestrian building on the northwestern portion of the Property.

Photo 30 – View of trash inside equestrian building stalls.

Photo 31 – Super Cross track on the northwestern portion of the Property.

Photo 32 – Equestrian center building at the northwestern portion of the Property.

Photo 33 – Trash, recyclables, and empty fuel canisters on the northwestern portion of the Property.

Photo 34 – Horse stalls at the Property.

Photo 35 – Heavy equipment used in maintaining the tracks.

Photo 36 – Ranch house on the northwestern portion of the Property.

Photo 37 – Old equestrian structure to the north of the ranch house.

Photo 38 – Old horse stalls housing dogs at the time of the site inspection.

Photo 39 – An oil-stained drum on the northwestern portion of the Property.

Photo 40 – A small area of stained soil near the workshop.

Photo 41 – Approximately 2,000-gallon red dye diesel tank outside the southern side of the workshop.

Photo 42 – Work pit in the workshop, for working on the underside of vehicles.

Photo 43 – The workshop.

Photo 44 – Oil and grease containers at the workshop.

Photo 45 – Old parts washer (not apparently in use) at the workshop.

Photo 46 – Junk metal and equipment at the northwestern portion of the Property.

Photo 47 – View to the north of the Property.

Photo 48 – Waste oil storage container on the northwestern portion of the Property.

Photo 49 – One of the berm jumps on the Vet track at the northern end of the Property.

Photo 50 – View from the northeastern corner of the Property looking towards the south. The Santa Ana River is located to the left of this photo.

Photo 51 – The main track.

Photo 52 – Customer parking area at the center of the Property.

Photo 53 – The water supply wells at 12685 Holly Street are reportedly located near the water tanks between the super cross and main tracks at the north-central portion of the Property. The area is overgrown with vegetation. This area is also used to fill dust control trucks.

Photo 54 – The amateur track on the eastern side of the Property.

Photo 55 – Oval track on the southern portion of the Property.

Photo 56 – Geico Honda track at the southern end of the Property.

Photo 57 – A pile of tires and cleared vegetation on the southern side of the Property.

Photo 58 – Old stables on the center of the Property.

Photo 59 – New containers of oil and lubricants at the repair shop in the main Milestone Park building.

Photo 60 – The retail store.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 9E5D-4E73-B6EF

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 9E5D-4E73-B6EF

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

SCS Engineers (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

MAP FINDINGS

MVP RV INC (Continued)

S106387361

Site History:

Site History/Release Information Two 2,000 gallon gasoline USTs were removed along with associated piping and fuel dispensers in November 2003. Soil samples were collected beneath the dispensers at 2 feet and 5 feet bgs, beneath piping, adjacent to and west of the USTs at 6 feet bgs, and within the UST cavity at 2 feet and 6 feet bgs. Maximum concentrations were 3780 ppm TPHg (T2-6), 520 ppb B (T2-6), 52600 ppb T (T2-6), 20000 ppb E (T2-6), 522000 ppb X (T2-6), 46 ppb MTBE (LED2), ND<4000 ppb TBA (T2-6), 9.45 ppm lead (T2-6). Samples were analyzed for TPHg, BTEX and oxygenates. The site was placed into LOP on October 23, 2003 for further assessment. Assessment Two soil borings (SB-1 and SB-2) were advanced to groundwater (approximately 76 feet bgs) in the vicinity of the former USTs on April 16, 2004. Soil samples from SB-1 and SB-2 were collected at five-foot intervals to a maximum explored depth of 76.5 feet bgs. The highest concentrations were observed from soil samples collected from soil boring SB-1 (UST cavity) at the 15 and 20 foot depths. Maximum concentrations: 350 ppm TPHg (SB-1 at 20 feet bgs), 0.13 ppm B (SB-1 at 20 feet bgs), 5.6 ppm T (SB-1 at 20 feet bgs), 3.8 ppm E (SB-1 at 20 feet bgs), 35 ppm X (SB-1 at 20 feet bgs), 0.53 ppm MTBE (SB-1 at 15 feet bgs), 0.36 ppm tert-Butylbenzene (SB-1 at 20 feet bgs), 1.2 ppm Naphthalene (SB-1 at 20 feet bgs), 5.6 ppm 1,2,4-Trimethylbenzene (SB-1 at 20 feet bgs), 2.7 ppm 1,3,5-Trimethylbenzene (SB-1 at 20 feet bgs), ND<0.50 ppm Ethanol and Methanol. SVE Pilot Testing One vapor extraction well (VE-1) was installed on July 8, 2006 near the southeast corner of the former UST location. SVE well VE-1 was installed to 30 feet bgs and screened between 15 and 30 feet bgs. Soil samples were collected at 5 foot intervals and select samples were analyzed for gasoline and VOCs by EPA Method 8260B. Soil samples collected at 10, 20 and 30 feet bgs were analyzed and were ND for all constituents tested. A SVE pilot test was conducted July 12th through 14th, 2006. The SVE test was proposed for 5-days but was terminated after 48 hours due to a VOC breakthrough. PID readings reported during the SVE test were between 92 to >9999 ppmV and were believed to be erroneous. The consultant stated that laboratory analysis results for vapor samples were at relatively low levels and were inconsistent with field PID readings and more consistent with soil data. The overall mass of vapor phase gasoline recovered over the 48-hour duration of system operation was estimated at 34 lbs (average of 0.7 lbs per hour). Flow rates at VE-1 fluctuated between 50 and 75 cfm. Maximum vapor concentrations were: 740 ppmV TPHg (VE1-3), 2.5 ppmV B (VE1-3), 110 ppmV T (VE1-3), 23 ppmV E (VE1-3), 149 ppmV X (VE1-3), ND MTBE, 11 ppmV 1,2,4 TMB (VE1-3), 5.5 ppmV 1,3,5, TMB (VE1-3). Closure was requested based on the results of the pilot test and five quarters of groundwater monitoring RCDEH denied closure and required the 5-day SVE test to be repeated since vapor concentrations increased over time and the test was terminated after two days. A 5-day SVE pilot test using VE-1 was performed February 17th through 23rd, 2009. Flow rates at VE-1 were erroneously reported to fluctuate between 98 and 269.5 cfm and later corrected to range from 84 to 146 cfm. PID readings throughout the SVE test ranged from 40.4 to >15,000 ppmV. The ROI was calculated to include the entire footprint of the former UST cavity and dispensers. MW-1 is screened from 60 to 95 feet bgs and VE-1 is screened between 15 to 30 feet bgs. The overall mass of vapor phase gasoline recovered over the 143-hr duration of system operation was estimated at 233 lbs (avg of 1.6 lbs/hr). Maximum vapor concentrations were: 1100 ppmV TPHg, 0.97 ppmV B, 80 ppmV T, 20 ppmV E, 176 ppmV X, ND<0.28 ppmV MTBE, 0.94 ppmV isopropylbenzene, 2.4

ppmV n-propylbenzene, 0.24 ppmV PCE, 0.20 ppmV sec-butylbenzene, 11 ppmV 1,2,4-TMB, 5.7 ppmV 1,3,5-TMB. Ending vapor concentrations for most constituents detected were higher at the end of the 5-day SVE pilot test than at the beginning of the test. Based on the elevated vapor concentrations detected and mass of vapor phase gasoline recovered during the 5-day SVE pilot test, a 30-day SVE test was required by RCDEH to clearly demonstrate that vapor recovery has reached the point of diminishing returns (asymptotic levels). Soil Excavation Excavation of contaminated soil was proposed in lieu of performing additional SVE testing to expedite site cleanup. Approximately 3200 tons of impacted soil was excavated March 1st through March 23rd, 2010. Twelve (12) confirmation soil samples were collected at the bottom and side walls of the approximately 8192 square feet excavation pit. All soil samples were non-detect for all constituents tested except for 0.006 ppm Xylene and 0.006 ppm 1,2,4 TMB detected in the deep soil sample collected at the west wall of the excavation pit (X24 Deep Wall-W@ approximately 30 feet bgs). Groundwater Monitoring To assess the potential for groundwater impact near the UST, one groundwater monitoring well (MW-1) was installed on July 19, 2004 approximately 20 feet southeast of the former UST cavity that is believed to be downgradient. Soil samples were analyzed at 5 foot intervals from 5 feet to 75 feet bgs. MW-1 was advanced to a depth of 95.5 feet bgs and screened from 56 to 95 feet bgs. Groundwater was encountered at 75 feet bgs. Analytical results for the groundwater sample collected from MW-1 were non-detect for all constituents tested. Maximum soil concentrations were at 65 feet bgs: ND<0.5 ppm TPHg, ND<0.001 ppm B, 0.004 ppm T, 0.002 ppm E, 0.012 ppm X, 0.011 ppm MTBE, ND<0.002 ppm tert-BBNZ, ND<0.002 ppm Napthalene, ND<0.001 ppm 1,2,4-TMB, ND<0.001 ppm 1,3,5-TMB. Five groundwater sampling events were conducted from August 2004 through October 2007. Maximum groundwater concentrations: ND<0.50 ppm TPHg, ND<0.5 ppb B, 0.6 ppb T (10/17/07), ND<1.0 ppb E, ND<1.0 ppb X, ND<5.0 ppb MTBE, 7.6 ppb Napthalene (9/19/05). Water levels have fluctuated from 73.20 to 78.66 feet bgs. Anticipated groundwater flow direction is to the southeast towards the Santa Ana River. The closest domestic water supply well (Well 04 Old Skotty) is located approximately 1049 feet west of the site and according to the well report on Geotracker, VOCs have not been detected in this well. Regional Board concurred with closure on 5/13/2010 and the no further action/closure letter was issued 6/14/2010

Comments:	Not reported
Description:	RP states that a pump seal failed causing the release of cooling tower water to a drainage swale. The storm drain system would discharge into the Santa Ana River. However, the water has not been detected any further than 100' into the drainage swale. The estimated amount of the release is in excess of 10,000 gallons.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/08/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 99	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 07/21/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/30/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 09/26/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 01/08/2018

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 09/26/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 01/08/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 09/26/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 01/08/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 09/26/2017

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 08/10/2017
Number of Days to Update: 94	Next Scheduled EDR Contact: 11/27/2017
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 08/30/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 12/11/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

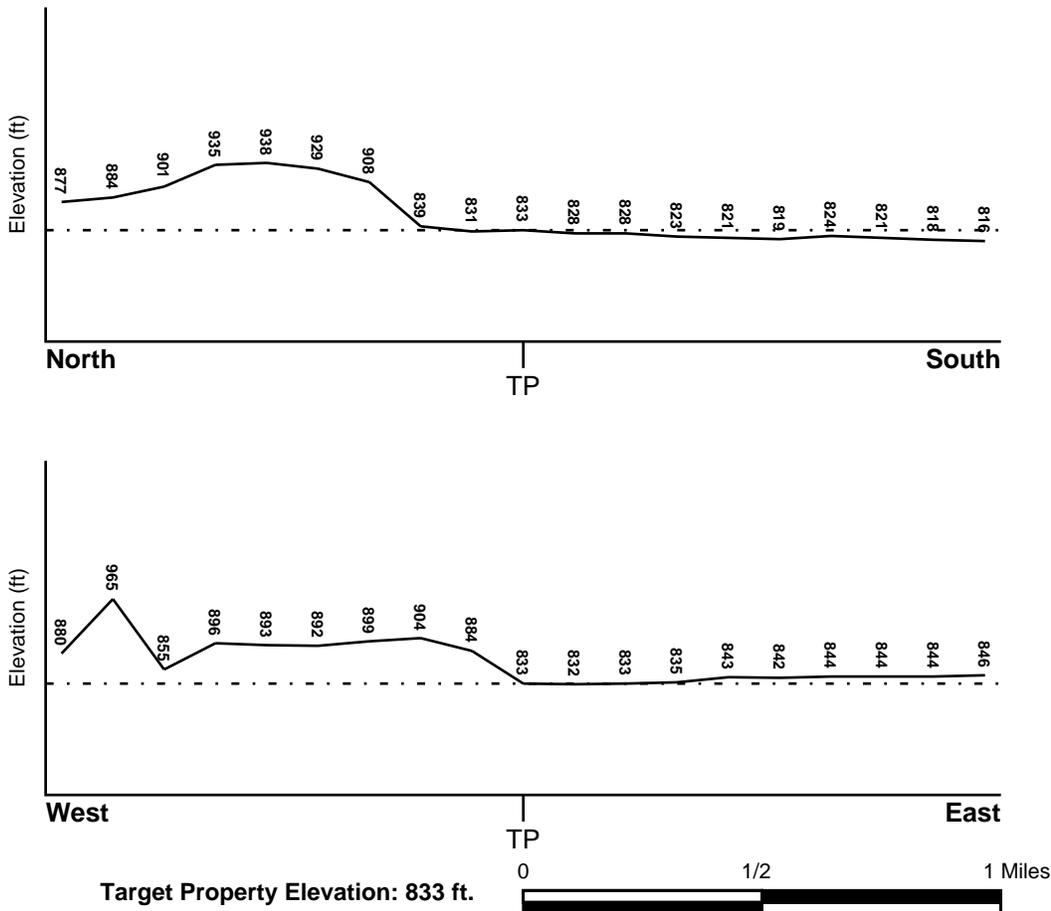

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06065C0065G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06065C0045G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WNW
Site Name:	Riverside Cement Co Crestmore Plt
Site EPA ID Number:	CAD063844443
Groundwater Flow Direction:	SW ON A REGIONAL BASIS.
Measured Depth to Water:	not available, but a well 2,000 feet east of the site had a water level of 800 feet above mean sea level.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
14	1/2 - 1 Mile ESE	SW
1G	1/2 - 1 Mile ESE	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.3 Min: 5.6
2	22 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 6.6
3	31 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.8 Min: 6.6
4	53 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: FLUVENTS

Soil Surface Texture: gravelly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
2	9 inches	29 inches	stratified gravelly sand to gravelly loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	29 inches	59 inches	stratified gravelly sand to gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

Soil Map ID: 5

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

CA WELLS 2503

Water System Information:

Prime Station Code:	02S/05W-11C02 S	User ID:	WAT
FRDS Number:	3310044004	County:	Riverside
District Number:	14	Station Type:	WELL/AMBNT
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340102.0 1172231.0	Precision:	100 Feet (one Second)
Source Name:	WELL 04 - OLD SKOTTY		
System Number:	3310044		
System Name:	Rubidoux Community SD		
Organization That Operates System:	P.O. Box 3098 Rubidoux, CA 92519		
Pop Served:	25000	Connections:	6554
Area Served:	RUBIDOUX		
Sample Collected:	04-MAY-11	Findings:	7.6
Chemical:	PH, LABORATORY		
Sample Collected:	04-MAY-11	Findings:	55. MG/L
Chemical:	NITRATE (AS NO3)

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Professional Experience

Mr. Green has a background in geology and paleontology. Since joining SCS in 1987, he has participated in numerous projects related to the investigation and remediation of hazardous chemicals in soils and groundwater. As a Vice President and Project Director, he currently serves as the Environmental Services Leader for the Long Beach and Las Vegas offices. Selected project activities include:

- Mr. Green has been Project Manager for more than a thousand Phase I Environmental Site Assessments (ESAs). These projects were completed in accordance with various lenders, the American Society for Testing and Materials (ASTM), or government guidelines, and consisted of evaluating current on-site operations, generating historical property use information, identifying potentially contaminated sites in the surrounding areas, reviewing previous reports and/or files maintained by regulatory agencies, and developing conclusions and recommendations regarding the presence of Recognized Environmental Conditions (RECs) and further investigation. Project sites have varied from private single-use parcels to hundreds of properties involving multiple tenants associated with state and local government right-of-way improvements.
- Mr. Green has conducted hundreds of investigations of known or suspected hazardous waste sites to identify and characterize chemicals of concern in soil, soil vapor, and groundwater in accordance with regulatory requirements. Contaminants include a variety

of hydrocarbon products, solvents, heavy metals, polychlorinated biphenyls (PCBs), and pesticides. Regulatory oversight agencies include the U.S. Environmental Protection Agency (U.S. EPA), Department of Toxic Substances Control (DTSC), and various Regional Water Quality Control Boards (RWQCBs), County Health or Fire Departments, and city Certified Unified Program Agencies (CUPAs).

- Mr. Green has been Project Manager for numerous soil gas surveys utilized to assess the presence, nature, and extent of volatile organic compounds (VOCs) and/or methane related to contaminated soils, groundwater, and/or landfills. Elements of these projects have included assessments of vapor intrusion, protection of structures from subsurface gases, monitoring of indoor air, and health risk assessments (HRAs).
- Mr. Green has managed numerous projects related to the removal, investigation, and remediation of contamination from Leaking Underground Storage Tanks (LUSTs). In accordance with requirements of the various regulatory agencies throughout Southern California, these LUST projects have included soil, soil gas, and groundwater contamination, and tasks such as evaluation of site and regional hydrogeologic conditions; development work plans and health and safety (H&S) plans; coordination and execution of tank removals; design of the investigative programs; review and selection of potential remedial alternatives; preparation of summary reports of findings; support of legal counsel in cost recovery actions; and support of client in cost recovery actions with the California Underground Storage Tank (UST) Cleanup Fund.
- Mr. Green has been the Project Manager for numerous remediation projects involving various hydrocarbon products, pesticides, chlorinated solvents, and/or heavy metals. Remediation projects included the excavation and disposal of soils; on- and off-site treatment of soils; recovery and treatment/disposal of free product and groundwater; and the design, installation, and operation of vapor extraction systems for soil and groundwater contaminated with VOCs.
- Mr. Green has evaluated environmental conditions at sanitary landfills. As Task Manager, he managed the installation and sampling of groundwater monitoring wells at and adjacent to existing landfills to determine the presence of leachate. This work was done in accordance with state regulations and local ordinances.
- Mr. Green was Project Manager for numerous lead-based paint (LBP) surveys and abatement projects for single- and multifamily residential developments, and commercial and public buildings. These projects consist of determining paint and/or dust sampling methodologies; interpretation of testing results; evaluation and recommendations for appropriate LBP hazards abatement; development of LBP abatement specifications; coordination and selection of licensed LBP abatement subcontractors; collection and analysis of abatement confirmation samples; characterization of waste materials; and preparation of summary reports documenting LBP surveys and the appropriate removal and disposal of LBP-related hazards.
- As a committee member, Mr. Green developed the initial ASTM standard guide (E2600) for vapor encroachment screening on property involved in real estate transactions. He has years of experience in evaluating the potential for vapor encroachment and vapor intrusion, along with the methods and protocols for investigation and/or mitigation of buildings affected by known or suspected contamination by VOCs.
- Mr. Green provides expert testimony and research support for litigation related to ESAs, and the investigation and remediation of hazardous waste sites.

Project Experience

Vapor Extraction Assessment and Remediation of Former Industrial Dry Cleaning Facility. As Project Manager, Mr. Green's tasks included initial indoor air assessment for Proposition 65 compliance; coordination of equipment, subcontractors, and personnel for the installation of vapor extraction and monitoring wells, header lines, and vapor extraction system (VES), including acid "scrubber" for treated vapors, treatment pad and enclosure, electrical power, natural gas, water supply and wastewater discharge; city, county, and Air Quality Management District (AQMD) permits; operation and maintenance (O&M) of VES; regulatory reporting; and decommissioning of VES upon regulatory closure.

Community Redevelopment Agency of the City of Los Angeles (CRA/LA), General Environmental Consulting Services, Los Angeles, CA. As Project Director with almost 200 work order directives for services over an approximately 20-year period, Mr. Green provided the initial site assessments, asbestos-containing material (ACM) surveys, LBP surveys, soil gas surveys, soils investigations, groundwater investigations, remedial and abatement activities for soils, asbestos, and LBP, second-party reviews of reports and work completed by other environmental consultants, UST removals, groundwater well abandonment, Brownfields consulting, and an environmental audit of hazardous materials handling practices of the client's operations. The projects were completed on vacant, former oil field, residential, commercial, industrial, and manufacturing properties ranging in size from a single lot to a 29-block mixed-use area. In addition to ACMs and LBP, the identified constituents of concern included a variety of petroleum hydrocarbon (TPH) products, chlorinated solvents, heavy metals, PCBs, pesticides, and subsurface combustible gases such as methane and VOCs.

Brownfields Redevelopment Site, Los Angeles, CA. As Project Director, Mr. Green completed several phases of environmental services to facilitate the mixed-use redevelopment of property for a parking garage, childcare center, and affordable housing. Historical machine shop operations resulted in a release of tetrachloroethylene (PCE) to soils. Although some cleanup was conducted in the early 1990s, residual PCE contamination remained. In accordance with current standards and with the proposed goal of affordable housing and childcare center, SCS reinvestigated the site under the oversight of the Los Angeles RWQCB. Services provided for this project included investigations of soil and soil gas, HRA and selection of remedial and mitigation options, design of vapor barrier to protect the building from chlorinated solvents, coordination and oversight of remedial excavation, oversight and certification for installation of a sub-building vapor barrier, post-construction monitoring of indoor, background, and sub-slab air to confirm that remediation and mitigation measures have met regulatory goals, and coordination of a No Further Action (NFA) letter from the regulatory authority.

Due Diligence Investigations of Manufacturing Facility, Torrance, CA. As Project Director, Mr. Green conducted a series of environmental assessments, investigations, and remedial activities that provided sufficient information to identify environmental issues and business risks and to facilitate the client's successful sale of property. A number of recognized environmental conditions, including former and existing USTs, a machine shop, wastewater treatment sumps and clarifier, paint shop, chemical storage, and chlorinated solvent degreasing operations were identified. Project activities included shallow and deep soil and soil vapor extraction (SVE) investigations, followed by groundwater sampling; geophysical survey and excavations to find an existing diesel UST previously closed in-place; removal of the UST; remedial excavations under Torrance Fire Department oversight to obtain closure; a long-term SVE pilot test, including a work plan submitted to the Los Angeles RWQCB; installation of SVE and monitoring wells; and development of an SVE Pilot Test Report, and recommendations for further SVE.

Investigation, Abatement, and Subsequent Demolition, Resource, Conservation and Recovery Act (RCRA), CA. Lead-containing dust from a shooting range was found to have contaminated building materials and soils. As Project Manager, Mr. Green was involved the selection of remedial methods and contractors, monitoring of workers to assess exposure to lead-containing dust, monitoring of dust emissions during demolition to confirm compliance, confirmation sampling and analyses, characterization of wastes for disposal, and submittal of a summary report documenting the appropriate remediation and disposal of lead-containing wastes. Efforts were as part of the RCRA for facility closure under the oversight of the California DTSC.

Investigation and Remediation, CA. Chemicals of concern at the former wood treating facility included pentachlorophenol, creosote, diesel fuel, methylene chloride, zinc, copper, and arsenic. As Project Director, Mr. Green managed the Remedial Investigation/Feasibility Study (RI/FS) report for vadose zone soil, including an HRA; Remedial Action Plan (RAP) for impacted soil, which recommended capping as the most feasible remedial alternative; a cone penetrometer (CPT) study aimed at further defining site stratigraphy, evaluating for the presence of nonaqueous phase liquids, and mapping the areal distribution of chemicals of concern; quarterly groundwater monitoring from 16 wells; Storm Water Pollution Prevention Plan (SWPPP) and monitoring; and assistance to client in development and/or sale of the property. The work was done under the oversight of the California DTSC.

Well Investigation Program Compliance. As Project Manager, Mr. Green conducted a well investigation provided to the USEPA to identify Potentially Responsible Parties (PRPs) for the San Fernando Valley Superfund site. On-site operations included 14 USTs; numerous clarifiers, sumps, and drain lines; plating, machining, and painting shops; a jet engine test facility; and solvent, alkaline, and steam cleaning facilities. Approximately 70 exploratory soil borings were drilled and analyzed for chlorinated solvents, heavy metals, cyanide, and various hydrocarbon products, such as gasoline, machining and waste oils, Stoddard solvent, and jet fuel. A soil gas survey of the facility was also conducted to screen for potential contamination by VOCs, including the installation of multi-depth, nested soil vapor monitoring wells. Fate and transport modeling of chlorinated solvents was used to assess the potential for impacts to groundwater. The work was done under RWQCB oversight at a jet engine repair, maintenance, and testing facility. The RWQCB issued an NFA letter for the investigation and remediation of chlorinated solvents at the site. The project also included design, permitting, construction, and O&M of a hot air-assisted SVE system to remediate Jet A-impacted soils. After 1 year of operation, remediation was sufficient to obtain closure with no further requirements from the RWQCB. Furthermore, as a part of the decommissioning and demolition of the facility, a comprehensive survey for ACMs in nine buildings was conducted. SCS prepared plans and specifications for the abatement of ACMs, assisted the client in selection of an abatement contractor, conducted daily oversight of abatement activities, including air monitoring, and prepared a final report documenting the appropriate removal and disposal of ACMs.

Historical Industrial Site Redevelopment and Closure. Prior to acquisition of this property, Mr. Green, as Project Director, conducted a due diligence assessment and several phases of investigation to identify recognized environmental conditions, characterize the nature and extent of contamination, evaluate costs and environmental liabilities, and facilitate the client's successful purchase of the property. Following the acquisition, and as a part of site redevelopment and thereafter, SCS provided additional site characterization and remediation services under regulatory oversight and with closure. Project activities, conducted concurrently with property redevelopment, included:

- Shallow and deep soil and soil vapor investigations for due diligence purposes.
- Oil well abandonment under California Division of Oil, Gas and Geothermal Resources (DOGGR) oversight.

- Permitting and removal of an existing UST and remedial excavation under Los Angeles County Department of Public Works (LACDPW) oversight.
- Under RWQCB oversight, shallow soil excavation of a former UST area, installation and operation of a separate SVE system for deeper soil contamination, and installation and monitoring of groundwater wells.

SCS met with the RWQCB on several occasions to make a case for closure under the State Water Quality Control Board's (SWQCB's) Low-Threat UST Case Closure Policy. Upon completion of a closure investigation in October 2013, and a subsequent meeting to defend the case for closure, the RWQCB concurred with SCS's conclusions and approved the closure process under the Low-Threat Policy. Following SVE and well abandonment activities, the RWQCB issued an NFA letter for the property in July 2014.

Historical Manufacturing Facility and RCRA Closure, Vernon, CA. This 15.9-acre site was used for metals fabrication from about 1940 until 2017. The original occupant and its successors and subsidiaries conducted metal stamping, forming, and machining; heat treating; degreasing; plating; acid treating and pickling; painting and enameling; and anodizing until the 1990s. Some portions of the facility were occupied by tenants involved in manufacturing through mid-2017, after which time building demolition and site redevelopment will be initiated.

Over the years, a number of industrial units at the facility underwent closure. Closure for those units that could have impacted the environment—including underground storage tanks (USTs), above-ground tanks, wastewater treatment systems, sumps and vaults, waste and other storage areas, degreasing and cleaning systems, and other surface treatment areas—generally included subsurface sampling. In this process, hundreds of soil and soil vapor samples were collected and analyzed for various potentially hazardous materials, including petroleum hydrocarbons, VOCs, metals, PCBs, semi-volatile organic compounds (SVOCs), and various inorganic substances. Closure of some units necessitated emplacement of Land Use Covenants/Deed Restrictions.

SCS conducted a Phase I Environmental Site Assessment and prepared a Current Conditions Report (CCR) for the facility. Based on existing data, the CCR identified several areas in which sampling indicated that chemicals of potential concern were present above generally-accepted cleanup levels, including VOC contamination from off-site sources. Subsequently, an RCRA Facility Investigation Workplan was prepared and implemented to further assess these areas. The resulting data was evaluated for potential health risks, and a Corrective Measures Study was conducted. Other tasks conducted by SCS have included preparation of a Community Profile, input to quarterly progress reports, on- and off-site soil and vapor investigation, groundwater monitoring well installation and sampling, and interface with the lead regulatory agency, the California Department of Toxic Substances Control.

Mr. Green has participated in a certified health and safety program in compliance with Occupational Safety and Health Administration (OSHA) Standard 29 CFR 1910.120. He provided his expertise in the incident response operations, team functions, personnel safety, and field equipment. He was able to recognize and evaluate potential chemical and physical hazards and associated risks in field operations; discuss and use personnel protective equipment such as respiratory protection and protective clothing; use and interpret direct-reading instruments; and examine and establish Standard Operating Safety Guidelines to ensure safe and effective response operations.

Mr. Green has been involved in numerous SCS projects related to hazardous waste characterization and management. He has experience in ESA studies, UST investigations and their associated remediation programs, landfill studies, and geologic and hydrogeologic site characterization studies. His work experience includes all project phases from development of cost estimates for various site assessment and cleanup programs, to groundwater monitoring and sampling, to preparation of final reports and interfacing with regulatory agencies.

Litigation Support/Expert Testimony

Mr. Green has provided litigation support and expert testimony to legal counsel, including conducting research, and preparing reports and other supporting documents, in the following environmental cases:

Banning v. Dureau et al. In August 2013, Mr. Green provided testimony in federal court on behalf of the plaintiff, regarding the contractor's emergency response to a waste oil spill that entered the storm drain system. Testimony related to investigative and remedial actions and the applicability of, and compliance with, the National Contingency Plan (NCP). The case was won by the City of Banning, California.

Clipper Yacht Company, LLC v. Anderson's Boat Yard, Inc. In October 2012, Mr. Green was retained as an expert witness by the defendant to review documents, consult with legal counsel, and provide expert opinions at deposition and trial regarding contamination at a boat yard and associated marina in Sausalito, California. Specific topics of interest include the adequacy of previous investigations and remediation efforts, the sources of contamination (particularly copper), cleanup levels, and likelihood and estimated costs of additional remediation. This case was settled prior to trial.

Alfaville, LLC v. L.A. Signal, Inc. In August 2011, as part of the new property owner's litigation against the former tenant, Mr. Green provided testimony as a percipient witness, primarily as to the source and timing of a prior PCE release. In a Phase I ESA prepared by SCS in 2008, PCE solvent use by the departing property tenant was identified. Several phases of subsequent site investigation confirmed a release of PCE to soil and soil vapor with likely impacts to groundwater. Groundwater monitoring is ongoing under Los Angeles RWQCB oversight. Remediation by soil vapor extraction may be conducted. This case was settled.

Malcolm Carter Enterprise v. Microsemi Real Estate, Inc. In November 2008, Mr. Green provided an expert report and court testimony on behalf of the plaintiff. At issue was the evaluation of data for a Phase I ESA, identification of Recognized Environmental Concerns (RECs), regional and site-specific groundwater contamination by chlorinated solvents, selection of an appropriate regulatory agency for remedial oversight, and applicability of the NFA letter. This case was won by the plaintiff.

City of Riverside v. Johnson Revocable Trust, et al. In 2010, Mr. Green was retained by the defendant to review documents, consult with legal counsel, and provide expert reports and deposition and expert testimony regarding an eminent domain case in Riverside, California. Specific topics of interest included the adequacy of previous investigation, the source or sources of a PCE release, and the likelihood and estimated costs of remediation. This case was settled prior to trial.

Expert Witness for Plaintiff, Santa Clarita. In 2009, Mr. Green conducted a review of the scope of work and fees charged by another environmental consultant conducting expert witness work on a development project in Santa Clarita. A declaration was provided to the Plaintiff's counsel regarding typical consultant fees, and the reasonableness of the time and expenses charged in relation to the final work product.

Expert Witness, Strathmore. In 2006, Mr. Green reviewed documents, consulted with legal counsel, and provided deposition and expert testimony regarding the source and timing of a methyl tertiary butyl ether (MTBE) release at a service station site in Strathmore, California. This case was settled prior to trial.

Litigation Support, San Bernardino. In 2003, Mr. Green provided litigation support regarding the scope and limitations of a Phase I ESA as it pertains to a service station site in San Bernardino, California.

Expert Consultant, Los Angeles. In 1998, Mr. Green provided expert consulting services related to the use, history, and migration of hexavalent chromium and perchloroethene in soil and groundwater at a former plating site and adjacent Los Angeles Unified School District (LAUSD) school property, and proper allocation of responsibility regarding those issues.

Expert Consultant, San Fernando Valley. In 1994, Mr. Green provided a client's in-house and outside legal counsel with technical support on a case involving cost recovery/allocation and potential involvement in the Burbank Operable Unit of the San Fernando Valley Superfund site. This project included assessment of the nature, extent, fate, and transport of potential contaminants (chlorinated solvents, fuels, and/or heavy metals), previous and proposed site investigations, possible remedial alternatives and costs, and environmental investigations and/or remediation on properties in the surrounding area.

Expert Consultant, Irvine. Mr. Green has also provided outside legal counsel with technical support for due diligence assessment at a property in Irvine, California. The client's site was located adjacent to a service station that had groundwater impacted with gasoline-related constituents, including MTBE. His work involved obtaining regulatory records, review, and written summary regarding regulatory requirements and anticipated actions, health risks, and necessity of additional site assessment and/or investigation work on the client's property.

Expert Consultant, Los Angeles. Mr. Green assisted a client and the client's legal counsel with review of information and response to the Los Angeles RWQCB's request for a work plan for investigation of suspected hexavalent chromium impacts to soil and groundwater at the client's former operation, located adjacent to the Burbank Airport and within the Burbank Operable Unit of the San Fernando Valley Superfund Site. The work plan and further investigation were not subsequently required.

Azusa Redevelopment Agency v. Exxon. In 1991, Mr. Green provided expert testimony in this case involving investigation and remediation of gasoline-contaminated soil at a former Exxon station.

Expert Witness, Art Movers, Inc. 1991, Mr. Green provided expert testimony for Art Movers, Inc., in a case involving previous site investigations, proposed remedial activities, and potential risks to groundwater resources from perchloroethene-contaminated soils.

J. JUSTIN RAUZON, REPA

Education

MEM – Environmental Management, Duke University, 2014

BS – Zoology (Double Emphasis: Human and Marine Biology), Brigham Young University, 2004

Professional Licenses

Registered Environmental Property Assessor (REPA), National Registry of Environmental Professionals (No. 485639)

Specialty Certifications

OSHA 40-Hour Health and Safety Training for Hazardous Waste Workers

8-Hour Annual Refresher Training for Hazardous Waste Site Activities

OSHA 16-Hour Initial Asbestos Operations and Maintenance Training

Thermo Scientific Niton XRF Analyzer Operator's Training

First-Aid and CPR Training

Professional Affiliations

National Ground Water Association, Member (2015 to Present)

Professional Experience

Mr. Rauzon has more than 12 years of environmental services experience, all with SCS. Fluent in Spanish, Mr. Rauzon is an SCS Senior Project Professional with a diverse background in biological and environmental sciences, and regularly performs environmental assessments and compliance audits at sites in the U.S. and in Latin America. He has technical and management experience with soil, soil vapor, and groundwater investigations at industrial, commercial, landfill, greenfield, and residential properties. He has extensive experience with environmental laws and regulations in both the U.S. and Mexico. His work experience includes all project phases, from development of cost estimates for various site assessment and cleanup programs to implementing remediation programs and interfacing with regulatory agencies.

Selected projects in which he has participated are described below.

Environmental Management

Due diligence assessments of properties prior to real estate transfer of properties in California, Arizona, New Jersey, Mexico, Puerto Rico, and the Dominican Republic. Mr. Rauzon has completed numerous due diligence assessments of properties prior to acquisition, disposition, or loan financing by investment banks, insurance companies, corporations, non-profit entities, real estate developers, and private parties. Projects have included Phase I assessments that meet federal All Appropriate Investigation (AAI) regulations, American Society for Testing and Materials (ASTM) standards, and client-specific guidelines; inspections for asbestos and lead-based paint; Phase II investigations; preparation of abatement and remediation cost estimates; and regulatory agency coordination. These projects frequently involve review of previous environmental reports and investigation of current and past on-site operations, regulatory agency records searches, evaluation of historical property use information, identification of nearby potentially contaminated sites, and development of appropriate conclusions about environmental risks. Investigations involve preparation of work plans, soil boring and subsequent sampling, groundwater well installation and sampling, soil gas probe installation and sampling, precision mapping, evaluation of contaminants in accordance with regulatory requirements or generally accepted guidelines, preparation of investigation report, and analysis of applicable remedial alternatives. Mr. Rauzon has served as the Project Manager for sites that have received regulatory closure from various regulatory agencies.

Planning, coordinating, and supervising remedial actions that included excavation, transport, and disposal of contaminated soils and water. Investigations involve preparation of Remedial Action Plans (RAPs), direction of fieldwork, oversight of confirmatory sampling, and interfacing with regulatory agencies.

The characterization of hazardous waste materials. These projects include collection of soil and/or liquid samples to profile the waste materials, interpretation of laboratory results, and evaluation of disposal/recycling options to minimize the costs and liabilities to clients associated with the removal of wastes.

Assessment and certification of hazardous waste tank systems. These investigations involve working with a Professional Engineer to complete field inspections of hazardous waste tanks, associated ancillary equipment, leak-detection systems, and secondary containment devices, as well as interfacing with regulatory agencies.

Project Management

Project Manager for due diligence investigation of a portfolio with more than 300 industrial sites throughout Mexico. SCS services included conducting Phase I and Phase II environmental assessments within the strict timeline of the \$1.2 billion industrial real estate transaction. Subsequent to the closing of the deal, SCS provided ongoing consulting services to facilitate integration and management of various facilities with ongoing environmental issues.

Project Manager for hazardous materials consulting services in support of the State Route 91 Corridor Improvement Project in Orange and Riverside Counties, CA. SCS services included sampling and inventory of potentially hazardous materials associated with more than 25 bridges along the SR-91 and I-15 freeways; environmental assessments on properties within the proposed freeway expansion area; and soil testing for herbicides, pesticides, and fungicides on several land parcels.

Project Manager for investigation and remediation of industrial facility located in Fontana, CA. SCS conducted a series of environmental assessments, investigations, and remedial activities that provided sufficient information to identify environmental issues and business risks, and facilitate the

client's successful purchase of property. A number of recognized environmental conditions, including releases of coal tar, solvents, heavy metals, and total petroleum hydrocarbons, were identified. Project activities conducted during the acquisition and redevelopment of the property included shallow and deep soil and soil vapor investigations; installation of groundwater monitoring wells and subsequent groundwater sampling; subsequent remedial excavation under San Bernardino County Fire Department (SBCFD) oversight to obtain closure; and excavation and off-site disposition of contaminated soil.

Health and Safety

Mr. Rauzon has participated in a certified health and safety program in compliance with OSHA Standard 29 CFR 1910.120. He is knowledgeable in incident response operations, team functions, personnel safety, and field equipment. He is able to recognize and evaluate potential chemical and physical hazards and associated risks in field operations; discuss and use personal protective equipment (PPE), such as respiratory protection and protective clothing; use and interpret direct-reading instruments; and examine and establish Standard Operating Safety Guidelines to ensure safe and effective response operations.

APPENDIX G
OWNER QUESTIONNAIRES

Project No.: 01217280.00

Project Name: Phase I ESA – 12685 Holly Street, San Bernardino, California

OWNER/OPERATOR QUESTIONNAIRE

Site name: Milestone MX

Site address: 12685 Holly St

 Riverside, CA 92509

Interviewee: Aaron Cooke

Title: General Manager

Date: 9/28/17

SECTION I – Undeveloped Property (If this site is developed, go to SECTION II)

1. How long have you owned (or been involved in) this property?
Been involved for approx. 6 years.

2. To the best of your knowledge, has there ever been any development on this property? If yes, what and when was the nature of that development?

No

3. To the best of your knowledge, have there ever been any environmental or soils investigations conducted on this Property? If yes, what kind and when? Are there any reports available?

No

4. Are you aware of any environmental liens or deed restrictions associated with this property? If yes, please describe.

No

5. To the best of your knowledge, have there ever been any incidents of chemical spills/dumping or waste disposal on or close to this property?

No

6. Are there any wells on the site? If yes, what are they used for?

Yes, dust control for parking and MX Track.

SECTION II – Developed Property

1. What is your involvement with this property and when did that involvement begin?
General Manager – Approximately 6 years ago.

2. To the best of your knowledge, how long has the current development been on the property? What was there before the current development?
Approximately 9 years. Horse ranch occupied the primary use before that.

3. Does this facility use, store, manufacture, or dispose of chemicals or petroleum products?
What types (be as specific as possible)?
Yes, Unleaded Fuel, Diesel, and engine oil.

4. If the answer to Question 3 above was “Yes,” may we review MSDS, business plans, hazardous material inventories, manifest files, SPCC plans (whatever is applicable)?
yes

5. Do you have any environmental permits (wastewater discharge, air emissions, hazardous material storage, etc.)? Have there ever been any Notices of Violation in regards to any of these permits?

Hazardous Material Storage., We received warnings for improper storage but corrected all issues prior to violation or fine.

6. Have any environmental investigations ever been conducted on this property? When and why? Are there any reports available that we can review?

No

7. Has the facility ever been subject to an environmental health and safety regulatory action, complaint, or lawsuit? When and why? What was the outcome?

No

8. Have there been any know chemical spills or releases on this property?

No

9. Are there any underground or aboveground storage tanks on this property? How many? Sizes? Ages?

Yes, unknown exactly but I am sure of multiple above ground tanks and two underground septic if that applies.

10. Where is wastewater discharged to? To the best of your knowledge, have there ever been any on-site wastewater disposal systems (septic tank, leach field, cesspool, dry well, etc.)?

We have on site portable restrooms for our staff but there are two underground septic tanks on the property maybe more.

11. To the best of your knowledge, are there any environmental liens or deed restrictions associated with this property? If yes, please describe.

No

Project No.: 01217280.00

Interviewee: Stephen Bradvick
Title: Son of owners
Date: 9/28/17

SECTION I – Undeveloped Property (If this site is developed, go to SECTION II)

1. How long have you owned (or been involved in) this property?

50 years
2. To the best of your knowledge, has there ever been any development on this property? If yes, what and when was the nature of that development?

NO
3. To the best of your knowledge, have there ever been any environmental or soils investigations conducted on this Property? If yes, what kind and when? Are there any reports available?

NO
4. Are you aware of any environmental liens or deed restrictions associated with this property? If yes, please describe.

NO

5. To the best of your knowledge, have there ever been any incidents of chemical spills/dumping or waste disposal on or close to this property?

NO

6. Are there any wells on the site? If yes, what are they used for?

yes, water

SECTION II – Developed Property

1. What is your involvement with this property and when did that involvement begin?

50 years

2. To the best of your knowledge, how long has the current development been on the property? What was there before the current development?

50 years

3. Does this facility use, store, manufacture, or dispose of chemicals or petroleum products? What types (be as specific as possible)?

NO

4. If the answer to Question 3 above was “Yes,” may we review MSDS, business plans, hazardous material inventories, manifest files, SPCC plans (whatever is applicable)?

5. Do you have any environmental permits (wastewater discharge, air emissions, hazardous material storage, etc.)? Have there ever been any Notices of Violation in regards to any of these permits?

NO

6. Have any environmental investigations ever been conducted on this property? When and why? Are there any reports available that we can review?

NO

7. Has the facility ever been subject to an environmental health and safety regulatory action, complaint, or lawsuit? When and why? What was the outcome?

NO

8. Have there been any know chemical spills or releases on this property?

NO

9. Are there any underground or aboveground storage tanks on this property? How many? Sizes? Ages?

yes 1 80 years

10. Where is wastewater discharged to? To the best of your knowledge, have there ever been any on-site wastewater disposal systems (septic tank, leach field, cesspool, dry well, etc.)?

Cesspool, leach field

11. To the best of your knowledge, are there any environmental liens or deed restrictions associated with this property? If yes, please describe.

NO
