Downey, CA 90240
evengineering@yahoo.com

PROJECT DESCRIPTION:

The proposed project is Tentative Parcel Map Number 18003 to create four parcels and a remainder on 20 acres. The newly created parcels will conform to San Bernardino County zoning requirements. The project site lies within the unincorporated portion of the County of San Bernardino within the Phelan Pinon Hills Community Plan. The project site is located on the east side of Alianthus Street, extending between South and Palmdale Roads. The County’s General Plan designates the project area as Phelan/Rural Living (PH/RL) minimum 2.5-acre minimum parcel size and Phelan/Special Development – Commercial Focus (PH/SD-Com). The site is regulated by the FP-3 Floodplain Overlay, by the Biological Resources Overlay, and by the Scenic Resources Overlay. The site is adjacent to the FS-2 Fire Safety Overlay on its southern boundary.

ENVIRONMENTAL/EXISTING SITE CONDITIONS:

The project site is undeveloped, as are the adjacent properties to the north and south. The properties to the east and west of the project site are developed with single-family residences and some are vacant. The existing native desert vegetation includes approximately 15 locally protected Joshua Trees and other desert shrubs. According to the Preliminary Drainage Study dated September 7, 2006, the project site slopes at a 1.5 percent gradient to the north. There is a natural drainage course traversing through the site, which bisects the property from south to north along its entire length. There are no other defined watercourses on the site. No other significant topographic conditions exist on the site.

Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement.):

**Federal:** US Fish & Wildlife Service  
**State of California:** Regional Water Quality Control Board; Department of Fish & Wildlife  
**County:** Land Use Services – Building and Safety Division, Land Development Division; Public Health – Environmental Health Services; Public Works – Traffic Division, Surveyor Division; and County Fire  
**Local:** Phelan Pinon Hills Community Services District
**EVALUATION FORMAT**

This initial study is prepared in compliance with the California Environmental Quality Act (CEQA) Guidelines. This format of the study is presented as follows. The project is evaluated based upon its effect on 18 major categories of environmental factors. Each factor is reviewed by responding to a series of questions regarding the impact of the project on each element of the overall factor. The Initial Study Checklist provides a formatted analysis that provides a determination of the effect of the project on the factor and its elements. The effect of the project is categorized into one of the following four categories of possible determinations:

<table>
<thead>
<tr>
<th>Potentially Significant</th>
<th>Less than Significant Impact with Mitigation</th>
<th>Less than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
</table>

Substantiation is then provided to justify each determination. One of the four following conclusions is then provided as a summary of the analysis for each of the major environmental factors.

1. Therefore, no impacts are identified or anticipated and no mitigation measures are required.

2. Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.

3. Possible significant adverse impacts have been identified or anticipated and the following mitigation measures are required as a condition of project approval to reduce these impacts to a level below significant. The required mitigation measures are: (List mitigation measures)

4. Significant adverse impacts have been identified or anticipated. An Environmental Impact Report (EIR) is required to evaluate these impacts, which are (Listing the impacts requiring analysis within the EIR).

At the end of the analysis the required mitigation measures are restated and categorized as being either self-monitoring or as requiring a Mitigation Monitoring and Reporting Program.
ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

☐ Aesthetics  ☐ Agriculture & Forestry Resources  ☐ Air Quality
☐ Biological Resources  ☐ Cultural Resources  ☐ Geology / Soils
☐ Greenhouse Gas Emissions  ☐ Hazards & Hazardous Materials  ☐ Hydrology / Water Quality
☐ Land Use/ Planning  ☐ Mineral Resources  ☐ Noise
☐ Population / Housing  ☐ Public Services  ☐ Recreation
☐ Transportation/Traffic  ☐ Utilities / Service Systems  ☐ Mandatory Findings of Significance

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation, the following finding is made:

☐ The proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ Although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ The proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ The proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ Although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

I. AESTHETICS - Would the project

- Have a substantial adverse effect on a scenic vista?
- Substantially damage scenic resources, including but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway?
- Substantially degrade the existing visual character or quality of the site and its surroundings?
- Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?

**SUBSTANTIATION** (Check ☑ if project is located within the view-shed of any Scenic Route listed in the General Plan):

The property is adjacent to State Highway 18, aka Palmdale Road, a designated scenic corridor.

### I a) Less Than Significant Impact

The predominant scenic view is of the mountains to the south. The site is on the north side of State Highway 18. The subdivision of 20 acres will not have a substantial adverse effect on the scenic vista. Future commercial development on the southernmost approximately 660 feet would require submittal and processing of additional subdivision application of the remainder parcel and a land use application, which would be conditioned to meet standards in effect at the time of development. Development of future single family residential structures would be removed from the scenic route, would be on 2.5-acre parcels that allow ample opportunity to design construction around the existing native vegetation, including Joshua trees, and would not have a substantial effect on the scenic corridor.

### I b) No Impact

The proposed project will not substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway, because the subdivision does not propose any development. Although the site is adjacent to a state scenic highway, there are no rock outcroppings or historic buildings on the project site.

### I c) Less Than Significant Impact

The existing native desert vegetation includes approximately 15 locally protected Joshua Trees. The proposed project will not substantially degrade the existing visual character or quality of the site and its surroundings because all the newly created parcels will meet the minimum parcel size of 2.5 acres, per Phelan/Rural Living (PH/RL) Land Use District Development Standards, allowing ample buildable area without significantly impacting the Joshua Trees. All building permits require a pre-construction inspection to verify the location of Joshua Trees and any such removal must comply with the County’s ordinance regarding tree protection (County Development Code Section 88.01.060), so there will be no impact in this area. A note will be placed on the Composite Development Plan and in the conditions of approval for the subdivision as follows: “All building permits require a pre-construction inspection to verify the location of any regulated plants or trees, and any such removal must comply with the County’s ordinance regarding plant and tree protection (County Development Code Section 88.01.060). A plant/tree removal plan shall be submitted to, and approved by the County Planning Division and implemented under the direction of an approved specialist prior to any land disturbance.”

### I d) No Impact

The proposed project will not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area because at this time this project is only proposing the subdivision of 20 acres into four
parcels and a remainder. No development is proposed at this time, therefore there will be no impact in this area. Future on-site residential lighting must comply with section 83.07.040, Glare and Outdoor Lighting – Mountain and Desert Region.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
II. AGRICULTURE AND FORESTRY RESOURCES - In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? □  □  □  □  ☒

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? □  □  □  □  ☒

c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? □  □  □  □  ☒

d) Result in the loss of forest land or conversion of forest land to non-forest use? □  □  □  □  ☒

e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest land? □  □  □  □  ☒

SUBSTANTIATION (Check □ if project is located in the Important Farmlands Overlay):

II a-e) No Impact. The subject property is designated "Grazing Land" and "Other Land" on the San Bernardino County Important Farmland 2008, Sheet 2 of 2, a map prepared by the California Department of Conservation, Division of Land Resource Protection, Farmland Mapping and Monitoring Program. The nearest boundary of the San Bernardino National Forest is approximately 8.5 miles south of the property. The site, within the High Desert of San Bernardino County, supports a mixed desert scrub community.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
III. **AIR QUALITY** - Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

<table>
<thead>
<tr>
<th>Potential for Significant Impact</th>
<th>Less than Significant with Mitigation Incorporation</th>
<th>Less than Significant</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Conflict with or obstruct implementation of the applicable air quality plan?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
<tr>
<td>c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions, which exceed quantitative thresholds for ozone precursors)?</td>
<td>☐</td>
<td>☐</td>
<td>☒</td>
</tr>
<tr>
<td>d) Expose sensitive receptors to substantial pollutant concentrations?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>e) Create objectionable odors affecting a substantial number of people?</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

**SUBSTANTIATION** (Discuss conformity with the Mojave Air Quality Management Plan, if applicable):

III a) **No Impact.** The project will not conflict with or obstruct implementation of the Mojave Desert Air Quality plan. Future residential development will not result in a traffic increase that is significant. The Air Quality Plan used development of one dwelling unit per 2.5 acres as the baseline. Because the subdivision map proposes four 2.5-acre parcels and a remainder, development will be as originally evaluated. Possible future commercial development of the portion of the site zoned PH/SD-Com will require submittal of a land use application, which will include additional environmental review and conditioning at the time of development.

III b) **Less Than Significant Impact.** The project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation. The MDAQMD is in non-attainment for ozone and particulate matter (PM\(_{10}\) and PM\(_{2.5}\)). Although no development is proposed as part of the subdivision, future residential development will contribute to particulate matter by using unpaved roads for access. As stated previously, development will be as originally evaluated so will not contribute in any substantial way to the degradation of local air quality.

III c) **Less Than Significant Impact.** The project will not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors), because the proposed use will not exceed established thresholds of concern.

III d) **No Impact.** The project will not expose sensitive receptors to substantial pollutant concentrations, because there are no identified concentrations of substantial pollutants and the project is not located within ¼ mile of a use considered a sensitive receptor. The nearest sensitive receptor is Pinon Hills Elementary School, which is located approximately 7.3 miles southwest of the site.

III e) **No Impact.** The project will not create odors affecting a substantial number of people because there are no identified potential uses that will result in the production of objectionable odors.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
IV. BIOLOGICAL RESOURCES - Would the project:

a) Have substantial adverse effects, either directly or through habitat modifications, on any species identified as a candidate, sensitive or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc…) through direct removal, filling, hydrological interruption, or other means?

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional or state habitat conservation plan?

<table>
<thead>
<tr>
<th>Potentially Significant Impact</th>
<th>Less than Significant with Mitigation Incorporated</th>
<th>Less than Significant</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☒</td>
<td>☐</td>
<td>☒</td>
</tr>
</tbody>
</table>

SUBSTANTIATION (Check if project is located in the Biological Resources Overlay or contains habitat for any species listed in the California Natural Diversity Database ☒): Desert Tortoise, Mohave Ground Squirrel, Burrowing Owl

RCA Associates, LLC conducted a Focused Desert Tortoise Survey on April 23, 2013 and a Habitat Assessment for Mohave Ground Squirrel on April 24, 2013.

IV a) Less Than Significant Impact with Mitigation Incorporated. RCA Associates, LLC conducted a Focused Desert Tortoise Survey on April 23, 2013 and a Habitat Assessment for Mohave Ground Squirrel on April 24, 2013. The Focused Desert Tortoise Survey determined that although the site supports suitable habitat for the desert tortoise, no tortoises or tortoise signs were observed on the site. The species, which has been documented within 1.5 miles of the site, could potentially inhabit the site in the future. A pre-construction clearance survey is required to confirm the continued absence of Desert Tortoise. See Mitigation Measure IV a-1. The Habitat Assessment for Mohave Ground Squirrel determined that the site supports suitable habitat for the species. The Habitat Assessment states future construction of houses will have a direct impact on potential Mohave ground squirrel habitat. Before any ground disturbance, the proponent must apply for an Incidental Take Permit (ITP) from the California Department of Fish and Wildlife (CDFW) and provide suitable mitigation fees for the purchase of compensatory mitigations for the 20 acres that could be impacted by site development activities. In lieu of the ITP, the proponent has the option of conducting a live-trapping survey to definitively determine the presence or absence of the
species. See Mitigation Measures IV a-2 and a-3. During these surveys, the biologists identified no occupiable burrows that could be used by burrowing owls; therefore, a focused survey for owl did not occur.

IV b) Less Than Significant Impact with Mitigation Incorporated. This project will not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or US Fish and Wildlife Service because no such habitat has been identified or is known to exist on the project site. There is a natural drainage course traversing through the site bisecting the property south to north along the entire length of the site. San Bernardino County Land Development Division reviewed a revised Preliminary Drainage Study and required a San Bernardino County Drainage Easement (SBCDE) as part of the subdivision. The proposed SBCDE will further prevent development from impacting the existing drainage courses. Prior to any land disturbance within a streambed area, the developer is required to obtain written clearance from the California Department of Fish and Wildlife, obtain all necessary permits, and satisfy all mitigation measures. Verification shall be submitted to County Planning for review and approval. See Mitigation Measure IV b.

IV c) Less Than Significant Impact. This project will not have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means, because the project is not within an identified protected wetland.

IV d) Less Than Significant Impact. This project will not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites, because the General Biological Resources Assessment found no such corridors or nursery sites within or near the project site. The natural drainage course and the proposed SBCDE, which will remain undisturbed, traverse the site and will provide for movement. The proposed 2.5-acre parcel size allows for sufficient open space as well.

IV e) Less Than Significant Impact. The existing native desert vegetation includes approximately 15 locally protected Joshua Trees. All of the newly created parcels will meet the minimum lot size of 2.5 acres, per Phelan/Rural Living (PH/RL) Land Use District Development Standards, allowing ample buildable area without significantly impacting the Joshua Trees. This project will not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance because all building permits require a pre-construction inspection to verify the location of Joshua Trees. Any removal must comply with the County’s ordinance regarding tree protection (County Development Code Section 88.01.060), so there will be no impact in this area.

IV f) No Impact. This project will not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan, because no such plan has been adopted in the area of the project site.

Possible significant adverse impacts have been identified or anticipated and the following mitigation measure is required as a condition of project approval to reduce these impacts to a level below significant. The required mitigation measures are:

[Mitigation Measure IV a-1]

The following notes shall be placed on the CDP:

“For all grading or other land disturbing activity proposed after 4/23/2014, a preconstruction inspection shall be completed by a County approved biologist to either confirm the continued absence of the desert tortoise on the project site or to verify the intensity and location of recently migrated Desert Tortoise on the project site. If a desert tortoise is discovered on the site all activities shall cease. The developer shall notify the U. S. Fish and Wildlife Service and shall initiate a Section 2061 consultation with the California Department of Fish and Wildlife (CDFW) for the incidental take of the desert tortoise.”
[Mitigation Measure IV a-2]

Add the following note to the CDP:

"Prior to ground disturbance, issuance of grading permits or building permits, whichever occurs first, all mitigation required by CDFW shall be completed for Mohave Ground Squirrel."

[Mitigation Measure IV a-3]

Add the following note to the CDP:

"Pursuant to the California Endangered Species Act and regulations of the CDFW, the following provisions are required. These requirements are based on the Habitat Assessment prepared for the project (Habitat Assessment for Mohave Ground Squirrel, RCA Associates, LLC, 4/24/2013).

a) At least 30 days prior to ground disturbance, issuance of grading permits or building permits, whichever occurs first, submit to the San Bernardino County Land Use Services Department Planning Division for review and approval, EITHER:
   1) A Mohave Ground Squirrel (MGS) trapping survey, if required.
   OR,
   2) A 2081 permit, applied for and obtained from CDFW.
   OR,
   3) Written correspondence from CDFW stating that neither an MGS "trapping survey", nor a 2081 permit is required; and/or stating CDFW's recommended mitigation (if any) in lieu of such "trapping survey" or 2081 permit.

NOTE: Compliance with this condition shall be in accordance with regulations, plans, and policies in effect at the time of land disturbance and/or issuance of a grading or building permit.

b) NOTE ON GRADING AND/OR CONSTRUCTION PERMIT: "This permit does not relieve the property owner of responsibility to comply with State and Federal Endangered Species Acts. Contact the San Bernardino County Land Use Services Department – Planning Division at 760.995.8140 for more information of the land owner's responsibilities."

[Mitigation Measure IV b]

Add the following note to the CDP:

"As set forth in the Preliminary Hydrology Report prepared by Erik Winata for Tentative Parcel Map 18003, an ephemeral stream bisects the property as shown on the Composite Development Plan. Prior to any land disturbance nearby or within the streambed area, a notification form and corresponding fee must be submitted to the California Department of Fish and Wildlife (CDFW). Upon determination from CDFW, the property owner/developer shall submit to the San Bernardino County Land Use Services Department – Current Planning Division and Land Development Division one of the following for review and approval:

1) EITHER:
   a) A copy of the approved CDFW Streambed Alteration Agreement (SAA) if it is determined that the activity may substantially adversely affect fish and wildlife resources and/or any streambed on-site. AND,
   b) Written correspondence from CDFW stating that all conditions of the SAA necessary to protect those resources have been completed, adhered to, and comply with the California Environmental Quality Act (CEQA).
   OR,
   2) Written correspondence from CDFW stating that a SAA is not required."
V. CULTURAL RESOURCES - Would the project

<table>
<thead>
<tr>
<th>Potentially Significant Impact</th>
<th>Less than Significant</th>
<th>Less than Significant with Mitigation Incorporated</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?</td>
<td>□</td>
<td>□</td>
<td>✗</td>
</tr>
<tr>
<td>b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?</td>
<td>□</td>
<td>□</td>
<td>✗</td>
</tr>
<tr>
<td>c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?</td>
<td>□</td>
<td>□</td>
<td>✗</td>
</tr>
<tr>
<td>d) Disturb any human remains, including those interred outside of formal cemeteries?</td>
<td>□</td>
<td>□</td>
<td>✗</td>
</tr>
</tbody>
</table>

SUBSTANTIATION (Check if the project is located in the Cultural □ or Paleontological □ Resources overlays or cite results of cultural resource review):

V a) Less Than Significant Impact. This project will not impact nor cause a substantial adverse change in the significance of an historical resource because the project site is not located on or near any known historical resource, as defined in §15064.5.

V b) Less Than Significant Impact. This project will not cause a substantial adverse change to any archaeological resource because no resources have been identified on the site. To further reduce the potential for impacts, a condition shall be added to the project that requires the developer to contact the San Bernardino County Museum for determination of appropriate measures, if any finds are made during project construction.

V c) Less Than Significant Impact. This project will not directly or indirectly destroy a unique paleontological resource or site or unique geologic feature, because no resources have been identified on the site. To further reduce the potential for impacts, a condition shall be added to the project which requires the developer to contact the County Museum for determination of appropriate measures, if any finds are made during project construction.

V d) Less Than Significant Impact. This project will not disturb any human remains, including those interred outside of formal cemeteries, because no such burial grounds are identified on this project site. If any human remains are discovered, during construction of this project, the developer is required to contact the County Coroner, County Museum for determination of appropriate measures and a Native American representative, if the remains are determined to be of Native American origin.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
VI. GEOLOGY AND SOILS - Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map Issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42

ii. Strong seismic ground shaking?

iii. Seismic-related ground failure, including liquefaction?

iv. Landslides?

b) Result in substantial soil erosion or the loss of topsoil?

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off site landslide, lateral spreading, subsidence, liquefaction or collapse?

d) Be located on expansive soil, as defined in Table 18-1-B of the California Building Code (2001) creating substantial risks to life or property?

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

SUBSTANTIATION (Check ☐ if project is located in the Geologic Hazards Overlay District):

VI a) **Less Than Significant Impact.** The project will not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving; i) rupture of a known earthquake fault, ii) strong seismic ground shaking, iii) seismic related ground failure, including liquefaction or iv) landslides. The nearest earthquake fault zone is the San Andreas fault zone, Carrizo section, which is approximately 12 miles southwest of the site.

VI b) **Less Than Significant Impact.** The project will not result in substantial soil erosion or the loss of topsoil because no development is proposed at this time. At the time development occurs on-site, erosion control measures will be required to be put in place.

VI c) **No Impact.** The project is not identified as being located on a geologic unit or soil that has been identified as being unstable or having the potential to result in on- or off- site landslide, lateral spreading, subsidence, liquefaction, or collapse. The elevations on the site range from approximately 3295 to 3340 feet AMSL, with the natural slope of the site being to the northeast at approximately 1.75 percent.
VI d) **No Impact.** The project site is not located on expansive soil, as defined in Table 18-1-B of the California Building Code (2001) creating substantial risks to life or property.

VI e) **No Impact.** Using the Lahontan Regional Water Quality Control Board standards and requirements, the County Environmental Health Services Department will require a percolation test prior to on-site wastewater treatment system installation. Therefore, there will be no significant impact.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
VII. GREENHOUSE GAS EMISSIONS – Would the project:

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

b) Conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?

SUBSTANTIATION:

VII a,b) Less Than Significant Impact. As discussed in Section III of this document, the proposed project does not include any development. It is a minor subdivision to create four 2.5-acre parcels and a remainder parcel on 20 acres. The Air Quality Plan used the underlying zoning to evaluate impacts. The subdivision creates parcels that conform to the zoning. Future residential development will contribute to particulate matter by using unpaved roads for access.

On December 6, 2011, the San Bernardino County Board of Supervisors adopted the County Greenhouse Gas (GHG) Emissions Reduction Plan. As part of the GHG Plan, sample project sizes that exceed the 3000 MTCO2e level were established. The threshold for single family residential development is 60 to 80 units. GHGs and criteria pollutants associated with four future residences will remain unchanged. For this reason, it is unlikely that this project would impede the state’s ability to meet the reduction targets of AB32.

As stated previously, any development on the portion of the site zoned PH/SD-Com will require submittal, processing, and approval of a land use application, which will include additional environmental review at the time of development.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
VIII. HAZARDS AND HAZARDOUS MATERIALS - Would the project:

a) Create a significant hazard to the public or the Environment through the routine transport, use, or disposal of hazardous materials?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

d) Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?  
   □ Potentially Significant Impact □ Less than Significant with Mitigation Incorporated □ Less than Significant □ No Impact

SUBSTANTIATION

VIII a) **No Impact.** The project will not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials, because no use approved on the site is anticipated to be involved in such activities. If such uses are proposed on-site in the future, they will be subject to permit and inspection by the Hazardous Materials Division of the County Fire Department and in some instances additional land use review.

VIII b) **No Impact.** The project will not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment, because any proposed use or construction activity that might use hazardous materials is subject to permit and inspection by the Hazardous Materials Division of the County Fire Department.

VIII c) **No Impact.** The project uses will not emit hazardous emissions or handle hazardous or acutely hazardous materials,
substances, or waste within one-quarter mile of an existing or proposed school, because the project does not propose the use of hazardous materials and all existing and proposed schools are more than one-quarter mile away from the project site. The nearest sensitive receptor is Pinon Hills Elementary School, which is located approximately 7.3 miles southwest of the site.

VIII d) **No Impact.** The project site is not included on the San Bernardino County list of hazardous materials sites compiled pursuant to Government Code 65962.5 and therefore, will not create a significant hazard to the public or environment.

VIII e) **No Impact.** The project site is not within the vicinity or approach/Departure flight path of a public airport. The nearest public airport is Adelanto Airport which is located approximately 4.8 miles northeast of the project site.

VIII f) **No Impact.** The project site is not within the vicinity or approach/Departure flight path of a private airstrip. The nearest private airstrip is Krey Field which is located approximately 3.8 miles northwest of the project site.

VIII g) **No Impact.** The project will not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan, because the project has adequate access from two or more directions.

VIII h) **Less Than Significant Impact.** Prior to any construction occurring on any parcel, the applicant shall contact the County Fire Department for verification of current fire protection requirements. All new construction shall comply with the current Uniform Fire Code requirements and all applicable statutes, codes, ordinances and standards of the Fire Department. The project site is adjacent to the FS-2 Fire Safety Overlay at its southern boundary. The requirements of the overlay district are designed to reduce fire hazard risk to below a level of significance.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
IX. HYDROLOGY AND WATER QUALITY - Would the project:

a) Violate any water quality standards or waste discharge requirements?  

b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level, which would not support existing land uses or planned uses for which permits have been granted)?

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?

d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or off-site?

e) Create or contribute runoff water, which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff?

f) Otherwise substantially degrade water quality?

g) Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

h) Place within a 100-year flood hazard area structure, which would impede or redirect flood flows?

i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?

j) Inundation by seiche, tsunami, or mudflow?

SUBSTANTIATION

Erik Winata prepared a Preliminary Hydrology Report for TPM No. 18003 on November 21, 2007, with revisions on December 5, 2007 and January 17, 2008. The County Land Development Division determined the report acceptable.

IX a) No Impact. The project will not violate any water quality standards or waste discharge requirements because the project is a subdivision to create four 2.5-acre parcels and a remainder on 20 acres. Any future on-site wastewater treatment systems
associated with residential development must be approved by the County Environmental Health Services based on requirements by the Lahontan Region Water Quality Control Board. Any future commercial development on the portion of the property zoned PH/SD-Com will require submittal, processing, and approval of a land use application, which will include additional evaluation and review of all environmental factors in the Initial Study checklist in effect at the time of submittal and development.

IX.b) **No Impact.** The project will not substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level. The project is served by the Phelan Pinon Hills Community Services District, which has indicated that they intend to serve the property. Completion of a feasibility study is a condition of approval prior to recordation of this subdivision project.

IX.c) **Less Than Significant Impact with Mitigation Incorporated.** The project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream of river, or substantially increase the rate or amount of surface runoff in a manner which would result in erosion or siltation on- or off-site. A natural drainage course traverses the site bisecting the property south to north along the entire length of the site. San Bernardino County Land Development Division reviewed a revised Preliminary Drainage Study and required a San Bernardino County Drainage Easement (SBCDE) as part of the subdivision. The proposed SBCDE will further prevent development from impacting the existing drainage courses. Prior to any land disturbance within a streambed area, the developer is required to obtain written clearance from the California Department of Fish and Wildlife, obtain all necessary permits, and satisfy all mitigation measures. Verification shall be submitted to County Planning for review and approval. See Mitigation Measure IV.b.

IX.d) **Less Than Significant Impact with Mitigation Incorporated.** The project will not substantially alter any existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site. A natural drainage course traverses the site bisecting the property south to north along the entire length of the site. San Bernardino County Land Development Division reviewed a revised Preliminary Drainage Study and required a San Bernardino County Drainage Easement (SBCDE) as part of the subdivision. The proposed SBCDE will further prevent development from impacting the existing drainage courses. Prior to any land disturbance within a streambed area, the developer is required to obtain written clearance from the California Department of Fish and Wildlife, obtain all necessary permits, and satisfy all mitigation measures. Verification shall be submitted to County Planning for review and approval. See Mitigation Measure IV.b.

IX.e) **No Impact.** The future development of single-family residences will not create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems because the drainage of the residences will be handled by the natural drainage courses on the property. San Bernardino County Land Development Division reviewed the proposed project drainage and determined that the existing and proposed systems are adequate to handle anticipated flows. There will be adequate capacity in the local and regional drainage systems, so that downstream properties are not negatively impacted by any increases or changes in volume, velocity or direction of stormwater flows originating from or altered by the project.

IX.f) **No Impact.** The project will not otherwise substantially degrade water quality, because appropriate measures relating to water quality protection, including erosion control measures will be required and implemented when the site is developed, although no development is proposed at this time.

IX.g,h) **Less Than Significant Impact.** The project will not place unprotected housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map because the project is not designated as being in a flood hazard area. This project lies within the FP-3 Local Flood Plain. All future construction must meet the requirements of the Land Development Division.

The project site is in Zone D as designated by the Federal Emergency Management Agency (FEMA). The Zone D
designation is used for areas where there are possible but undetermined flood hazards, as no analysis of flood hazards has been conducted. The Land Development Division reviewed and approved a Preliminary Drainage Study. When future residential development occurs, a California Registered Civil Engineer shall prepare and/or design complete drainage improvement plans and profiles. These may result in additional on- and/or off-site improvements, which cannot be determined from tentative plans at present. Therefore, there will be no potentially significant impact in this area.

IX i) No Impact. The project will not expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam, because the project site is not within any identified path of a potential inundation flow that might result in the event of a dam or levee failure or that might occur from a river, stream, lake or sheet flow situation.

IX j) No Impact. The project will not be impacted by inundation by seiche, tsunami, or mudflow, because the project is not adjacent to any body of water that has the potential of seiche or tsunami nor is the project site in the path of any potential mudflow.

Possible significant adverse impacts have been identified or anticipated and mitigation measure IV b is required as a condition of project approval to reduce these impacts to a level below significant.
X. LAND USE AND PLANNING - Would the project:

a) Physically divide an established community? □ □ □ x

b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect? □ □ □ x

c) Conflict with any applicable habitat conservation plan or natural community conservation plan? □ □ □ x

SUBSTANTIATION

X a) No Impact. The project will not physically divide an established community, because the project is a logical and orderly extension of the planned land uses and development that are established within the surrounding area. The proposed subdivision will create residential parcels that conform to the existing Phelan/Rural Living (PH/RL) Land Use District, which allows a single-family residence on a minimum 2.5 acre lot.

X b) No Impact. The project will not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project adopted for the purpose of avoiding or mitigating an environmental effect. The project is consistent with all applicable land use policies and regulations of the County Code, General Plan, and the Phelan Pinon Hills Community Plan. The project complies with all hazard protection, resource preservation, and land use modifying Overlay District regulations.

X c) No Impact. The project will not conflict with any applicable habitat conservation plan or natural community conservation plan, because there is no habitat conservation plan or natural community conservation plan within the area surrounding the project site and no habitat conservation lands are required to be purchase as mitigation for the proposed project.

Therefore, no impacts are identified or anticipated and no mitigation measures are required.
XI. **MINERAL RESOURCES** - Would the project:

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? □ □ ☒ □

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? □ □ ☒ □

**SUBSTANTIATION** (Check ☒ if project is located within the Mineral Resource Zone Overlay): MRZ-3a

XI a) **Less Than Significant Impact.** The project will not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state, because there are no identified important mineral resources on the project site. The project site lies within the Mineral Resources Zone 3a (MRZ-3a) Overlay which indicates areas of undetermined mineral resource significance with known mineral occurrence. There are no known mineral occurrences on the site.

XI b) **Less Than Significant Impact.** The project will not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state, because there are no identified important mineral resources on the project site. The project site lies within the Mineral Resources Zone 3a (MRZ-3a) Overlay which indicates areas of undetermined mineral resource significance with known mineral occurrence. There are no known mineral occurrences on the site.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XII. **NOISE** - Would the project:

a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? ☐ ☐ ☒ ☐

b) Exposure of persons to or generation of excessive ground borne vibration or ground borne noise levels? ☐ ☐ ☒ ☐

c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project? ☐ ☐ ☐ ☒

d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project? ☐ ☐ ☒ ☐

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? ☐ ☐ ☐ ☒

f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels? ☐ ☐ ☐ ☒

**SUBSTANTIATION** (Check if the project is located in the Noise Hazard Overlay District ☐ or is subject to severe noise levels according to the General Plan Noise Element ☐):

XII a) **Less Than Significant Impact.** Palmdale Road (State Highway 18) abuts the southern boundary of the project site. The four residential parcels being created by this subdivision are physically removed from this roadway by approximately 1,320 feet. The project will not expose persons to or generate noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. The project is required to comply with the noise standards of the County Development Code and no noise exceeding these standards is anticipated to be generated by the proposed uses. An acoustical review sheet demonstrating that the County's exterior and interior residential noise standards will not be exceeded and if exceeded, the manner in which those levels will be reduced to an acceptable level shall be submitted to County Environmental Health Services for review and approval prior to future residential construction. Adherence to any requirements resulting from the review shall reduce any potentially significant impacts to a level below significant.

XII b) **Less Than Significant Impact.** Palmdale Road (Hwy 18) abuts the southern boundary of the project site. The four residential parcels being created by this subdivision are physically removed from this roadway by approximately 1,320 feet. The project will not create exposure of persons to or generation of excessive ground borne vibration or ground borne noise levels. The project is required to comply with the vibration standards of the County Development Code. No vibration exceeding these standards is anticipated to be generated by the proposed subdivision.

XII c) **No Impact.** The project will not generate a substantial permanent increase in ambient noise levels in the project vicinity above levels existing or allowed without the project. The project is required to comply with the noise standards of the County Development Code and no noise exceeding these standards is anticipated to be generated by the project. An acoustical review sheet demonstrating that the County's exterior and interior residential noise standards will not be
exceeded and if exceeded, the manner in which those levels will be reduced to an acceptable level shall be submitted to County Environmental Health Services for review and approval prior to future residential construction. Adherence to any requirements resulting from the review shall reduce any potentially significant impacts to a level below significant.

XII d) **Less Than Significant Impact.** The project will not generate a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project because no development is proposed at this time. Future residential development on the proposed parcels may result in temporary or periodic noise increases associated with construction activities. These activities will be required to adhere to County Noise Standards including restricted days and hours of construction. Future commercial development on the portion of the property zoned PH/SD-Com will require submittal, processing, and approval of a land use application, which will include additional environmental review and evaluation.

XII e) **No Impact.** The project site is not within the vicinity or approach/departure flight path of a public airport. The nearest public airport is Adelanto Airport which is located approximately 4.8 miles northeast of the project site.

XII f) **No Impact.** The project site is not within the vicinity or approach/departure flight path of a private airstrip. The nearest private airstrip is Krey Field which is located approximately 3.8 miles northwest of the project site.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XIII. POPULATION AND HOUSING - Would the project:

a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

SUBSTANTIATION

XIII a) **Less Than Significant Impact.** The project will not induce substantial population growth in an area either directly or indirectly. The proposed four parcels will generate four households, which will add approximately 11 new residents at final build-out.

XIII b) **No Impact.** The proposed use will not displace any housing units, necessitating the construction of replacement housing because no housing units are proposed to be demolished as a result of this proposal. The property is currently vacant.

XIII c) **No Impact.** The proposed use will not displace any people necessitating the construction of replacement housing elsewhere, because the project will not displace any existing housing or existing residents. The property is currently vacant.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XIV. PUBLIC SERVICES

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

<table>

<tr>
<td>Parks?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other Public Facilities?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

SUBSTANTIATION

XIV a) **Less Than Significant Impact.** The proposed project will not result substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services, including fire and police protection, schools, parks or other public facilities. Future residential development on the proposed parcels should increase property tax revenues to provide a source of funding that is sufficient to offset any increases in the anticipated demands for public services generated by this project. Future commercial development on the portion of the property zoned PH/SD-Com will be evaluated separately, when a land use application is submitted for processing.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XV. RECREATION

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

☐ ☐ ☒ ☐

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?

☐ ☐ ☒ ☐

SUBSTANTIATION

XV a) **Less Than Significant Impact.** This project will not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. The proposed 2.5-acre parcel size allows for some on-site recreational activities including hiking and equestrian activities. Any impacts from this proposed minor subdivision will be minimal because only approximately 11 residents in four households will be generated at final build-out.

XV b) **Less Than Significant Impact.** This project does not include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment, because the type of project proposed will not result in an increased demand for recreational facilities. No development of new parkland is required per the County General Plan because of the insignificant number of additional home sites proposed. Development of new parkland, which is required under County General Plan Guidelines at a rate of three acres per thousand population, does not apply to this proposed project because the small population increase (>50 anticipated persons) would not warrant the acquisition of new parkland.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XVI. TRANSPORTATION/TRAFFIC - Would the project:

a) Conflict with an applicable plan, ordinance, or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways, and freeways, pedestrian and bicycle paths, and mass transit?

b) Conflict with an applicable congestion management program, including but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

e) Result in inadequate emergency access?

f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?

SUBSTANTIATION

XVI a) Less Than Significant Impact. The County Traffic Division found that there would be no adverse impacts on traffic because of the proposed subdivision. The subdivision will not result in an increase in the number of vehicle trips over what currently exists. Future residential development of four parcels will not cause a substantial increase in traffic. State Route 18 operates at Level of Service (LOS) D during peak hour where it is adjacent to this parcel. Local roads are currently operating at a level of service at or above LOS C, the standard established by the County General Plan. The volume to capacity ratio on roads and the congestion level at intersections will continue to remain below the planned thresholds for those facilities. The property is located within the High Desert Local Area Transportation Facilities Fee Plan. Developers of future residences will be required to contribute to that plan before building permits are issued. Fees collected by the plan are used for road improvements and maintenance within the plan area. When future commercial development is proposed on the portion of the property zoned PH/SD-Com, additional evaluation of traffic will occur as part of the land use application processing.

XVI b) No Impact. The project will not exceed, either individually or cumulatively, a Level of Service (LOS) standard established by the county congestion management agency for designated roads or highways, because County Public Works – Traffic Division has reviewed the traffic generation of the proposed project and anticipates that traffic service will remain at an LOS of "C" or better, as required by the County General Plan.

XVI c) No Impact. The project will not result in a change in air traffic patterns, including either an increase in traffic levels or a
change in location that results in substantial safety risks. There are no airports in the vicinity of the project and there is no anticipated notable impact on air traffic volumes by passengers or freight generated by the proposed use. No new air traffic facilities are proposed.

XVI d) **No Impact.** The project will not substantially increase hazards due to a design feature or incompatible uses because the project site is adjacent to an established road that is accessed at points with good site distance and properly controlled intersections. There are no incompatible uses proposed by the project that will impact surrounding land uses. Non-vehicular access shall be dedicated on Palmdale Road as part of this subdivision. This will reduce any potential hazard to a level below significance.

XVI e) **No Impact.** The project will not result in inadequate emergency access because there are a minimum of two access points.

XVI f) **No Impact.** The project will not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities. This is a minor subdivision to create four parcels for residential purposes only and a remainder parcel. This project will have no impact on alternative methods of transportation. The Victor Valley Transit Authority provides services in the general area through Route 31, although this route leaves Palmdale Road approximately 7 miles east of the site.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XVII. UTILITIES AND SERVICE SYSTEMS - Would the project:

a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board? □ □ □ ☒

b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects? □ □ □ ☒

c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects? □ □ □ ☒

d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new, or expanded, entitlements needed? □ □ □ ☒

e) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? □ □ □ ☒

f) Be served by a landfill(s) with sufficient permitted capacity to accommodate the project's solid waste disposal needs? □ □ □ ☒

g) Comply with federal, state, and local statutes and regulations related to solid waste? □ □ □ ☒

SUBSTANTIATION

XVII a) **No Impact.** The proposed project is a subdivision to create four 2.5-acre parcels and a remainder parcel. It does not impact wastewater treatment requirements. Future residential development must comply with requirements of the Regional Water Quality Control Board, Lahontan Region, as determined by County Public Health – Environmental Health Services. Future commercial development would be evaluated separately, when a land use application is submitted and processed.

XVII b) **No Impact.** The proposed subdivision project will not require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities. There is no wastewater treatment provider serving the project area. On-site wastewater treatment systems will serve future residences. These on-site wastewater treatment systems must be approved by the County Environmental Health Services based on requirements by the Lahontan Region of the State Water Quality Control Board; therefore there will be no impact in this area. The Phelan/Pinon Hills CSD expressed their intent to serve the proposed parcels with water. The conditions of approval require completion of and compliance with the requirements of a feasibility study.

XVII c) **No Impact.** The proposed project will not require or result in the construction of new storm water drainage facilities or expansion of existing facilities that cause significant environmental effects. County Land Development Division determined that there is sufficient capacity in the existing storm water system to absorb any additional storm water drainage caused by the project. All future residential construction must meet the requirements from the County Land Development Division.
XVII d) **No Impact.** The proposed project will have sufficient water supplies available to serve the project from existing entitlements and resources, as Phelan/ Pinon Hills CSD has given assurance that it intends to serve the proposed parcels. Preparation of a water feasibility study and compliance with requirements is a condition of project approval.

XVII e) **No Impact.** There is no wastewater treatment provider serving the project area. The on-site septic systems will serve future residences. These septic systems must be approved by the County Environmental Health Services based on requirements by the Lahontan Region Water Quality Control Board.

XVII f) **No Impact.** The proposed project is served by the Victorville Sanitary Landfill via the Phelan/ Sheep Creek transfer station, which has sufficient permitted capacity to accommodate the proposed project's future solid waste disposal needs.

XVII g) **No Impact.** The proposed project is required to comply with federal, state, and local statutes and regulations related to solid waste.

Therefore, no significant adverse impacts are identified or anticipated and no mitigation measures are required.
XVIII. MANDATORY FINDINGS OF SIGNIFICANCE:

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

   ☐ ☒ ☐ ☐ ☐

b) Does the project have impacts that are individually limited, but cumulatively considerable? (*Cumulatively considerable* means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

   ☐ ☐ ☒ ☐ ☐

c) Does the project have environmental effects, which will cause Substantial adverse effects on human beings, either directly Or indirectly?

   ☐ ☐ ☐ ☒ ☐

SUBSTANTIATION

XVIII a) Less Than Significant Impact with Mitigation Incorporated. The project does not appear to have the potential to significantly degrade the overall quality of the region's environment, or substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population or drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory.

There are no identified historic or prehistoric resources identified on this site. No archaeological or paleontological resources have been identified in the project area.

RCA Associates, LLC conducted a Focused Desert Tortoise Survey on April 23, 2013 and a Habitat Assessment for Mohave Ground Squirrel on April 24, 2013. The Focused Desert Tortoise Survey determined that although the site supports suitable habitat for the desert tortoise, no tortoises or tortoise signs were observed on the site. The species, which has been documented within 1.5 miles of the site, could potentially inhabit the site in the future. A pre-construction clearance survey is required to confirm the continued absence of Desert Tortoise. See Mitigation Measure IV a-1. The Habitat Assessment for Mohave Ground Squirrel determined that the site supports suitable habitat for the species. The Habitat Assessment states future construction of houses will have a direct impact on potential Mohave ground squirrel habitat. Before any ground disturbance, the proponent must apply for an Incidental Take Permit (ITP) from the California Department of Fish and Wildlife (CDFW) and provide suitable mitigation fees for the purchase of compensatory mitigations for the 20 acres that could be impacted by site development activities. In lieu of the ITP, the proponent has the option of conducting a live-trapping survey to definitively determine the presence or absence of the species. See Mitigation Measures IV a-2 and a-3. During these surveys, the biologists identified no occupiable burrows that could be used by burrowing owls; therefore, a focused survey for owl did not occur.

The existing native desert vegetation includes approximately 15 locally protected Joshua Trees. The proposed project will not substantially degrade the existing visual character or quality of the site and its surroundings because all the newly created parcels will meet the minimum parcel size of 2.5 acres, per Phelan/Rural Living (PH/RL) Land Use District Development Standards, allowing ample buildable area without significantly impacting the Joshua Trees. All building
permits require a pre-construction inspection to verify the location of Joshua Trees and any such removal must comply with the County's ordinance regarding tree protection (County Development Code Section 88.01.060), so there will be no impact in this area.

XVIII b) **Less Than Significant Impact.** The project does not have impacts that are individually limited, but cumulatively considerable. The sites of projects in the area to which this project would add cumulative impacts have either existing or planned infrastructure that is sufficient for all planned uses. These sites either are occupied or are capable of absorbing such uses without generating any cumulatively significant impacts.

XVIII c) **No Impact.** The project will not have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly, as there are no such impacts identified by the studies conducted for this project or identified by review of other sources or by other agencies.

At a minimum, the project is required to meet the conditions of approval for the subdivision project to be implemented. Future development must comply with the requirements on the Composite Development Plan. It is anticipated that all such conditions of approval and requirements prior to construction will insure that no potential for adverse impacts will be introduced by the subdivision or future residential construction activities.

Possible significant adverse impacts have been identified or anticipated and the mitigation measures listed in the following section are required as conditions of project approval to reduce these impacts to a level below significant.
XIX. MITIGATION MEASURES
(Any mitigation measures, which are not 'self-monitoring', shall have a Mitigation Monitoring and Reporting Program prepared and adopted at time of project approval)

SELF MONITORING MITIGATION MEASURES: (Condition compliance will be verified by existing procedure)

[Mitigation Measure IV a-1]

The following notes shall be placed on the CDP:

“For all grading or other land disturbing activity proposed after 4/23/2014, a preconstruction inspection shall be completed by a County approved biologist to either confirm the continued absence of the desert tortoise on the project site or to verify the intensity and location of recently migrated Desert Tortoise on the project site. If a desert tortoise is discovered on the site all activities shall cease. The developer shall notify the U. S. Fish and Wildlife Service and shall initiate a Section 2081 consultation with the California Department of Fish and Wildlife (CDFW) for the incidental take of the desert tortoise.”

[Mitigation Measure IV a-2]

Add the following note to the CDP:

“Prior to ground disturbance, issuance of grading permits or building permits, whichever occurs first, all mitigation required by CDFW shall be completed for Mohave Ground Squirrel.”

[Mitigation Measure IV a-3]

Add the following note to the CDP:

“Pursuant to the California Endangered Species Act and regulations of the CDFW, the following provisions are required. These requirements are based on the Habitat Assessment prepared for the project (Habitat Assessment for Mohave Ground Squirrel”, RCA Associates, LLC, 4/24/2013).

a) At least 30 days prior to ground disturbance, issuance of grading permits or building permits, whichever occurs first, submit to the San Bernardino County Land Use Services Department Planning Division for review and approval, EITHER:

1) A Mohave Ground Squirrel (MGS) trapping survey, if required.
   OR,

2) A 2081 permit, applied for and obtained from CDFW.
   OR,

3) Written correspondence from CDFW stating that neither an MGS “trapping survey”, nor a 2081 permit is required; and/or stating CDFW’s recommended mitigation (if any) in lieu of such “trapping survey” or 2081 permit.

NOTE: Compliance with this condition shall be in accordance with regulations, plans, and policies in effect at the time of land disturbance and/or issuance of a grading or building permit.

b) NOTE ON GRADING AND/OR CONSTRUCTION PERMIT: "This permit does not relieve the property owner of responsibility to comply with State and Federal Endangered Species Acts. Contact the San Bernardino County Land Use Services Department – Planning Division at 760.995.8140 for more information of the land owner's responsibilities."
[Mitigation Measure IV b]

Add the following note to the CDP:

"As set forth in the Preliminary Hydrology Report prepared by Erik Winata for Tentative Parcel Map 18003, an ephemeral stream bisects the property as shown on the Composite Development Plan. Prior to any land disturbance nearby or within the streambed area, a notification form and corresponding fee must be submitted to the California Department of Fish and Wildlife (CDFW). Upon determination from CDFW, the property owner/developer shall submit to the San Bernardino County Land Use Services Department – Current Planning Division and Land Development Division one of the following for review and approval:

1) EITHER:
   a) A copy of the approved CDFW Streambed Alteration Agreement (SAA) if it is determined that the activity may substantially adversely affect fish and wildlife resources and/or any streambed on-site. AND,
   b) Written correspondence from CDFW stating that all conditions of the SAA necessary to protect those resources have been completed, adhered to, and comply with the California Environmental Quality Act (CEQA).

OR,

2) Written correspondence from CDFW stating that a SAA is not required."

Required mitigation measures shall be implemented and/or added to the Composite Development Plan and to the Mitigation Monitoring and Compliance Program.
