Board Approves Road Improvements for New Crestline Library

SAN BERNARDINO – On Tuesday, the Board of Supervisors approved plans to improve a portion of Lake Gregory Drive in front of the new Crestline Library, which is under construction.

The plans call for creating a 250-foot decomposed granite walkway on the west side of Lake Gregory Drive to provide pedestrian access to the library. In addition, County Public Works will repave about 1,300 square feet of pavement and will install new road striping, including a left turn lane into the library.

“The new Crestline Library is going to be a gem that attracts visitors from throughout the mountain communities, and these road improvements are key to ensuring residents have easy and safe access to their new library,” Second District Supervisor Paul Biane said.

Public Works estimates the street improvements will cost \$100,000.

The new Crestline Library will be 7,641 square feet and will include a multipurpose room, children’s reading area, computer lab, and study areas. The site is within easy walking distance of the Crestline Village Park, Crestline Skate Park, and the outer Lake Gregory walking trail.

The library is being built to the Leadership in Energy and Environmental Design (LEED) silver standard. LEED buildings utilize less energy and water than traditional buildings. This will reduce utility costs for the facility while also conserving resources. The County of San Bernardino committed to adhering to the LEED silver standard in all new construction in August 2007.

The current Crestline Library is located in a 3,169 square-foot building the County leases. The building – a former U.S. Post Office – has been home to the Crestline Library for more than 20 years.
