Inspector Comments: Observed dishes soaking in chlorine sanitizer the 3rd compartment of the 3-compartment sink. The concentration was greater than 200ppm. Per operator, the items are just soaking and will be washed, rinse, and properly sanitized then air dried.

The container of sanitizer that was used is an unapproved chlorine sanitizer that requires a rinse. Per operator, it is the only sanitizer on-site. Obtain an approved rinse free and scented free sanitizer immediately and maintain at appropriate concentration (i.e. chlorine 100ppm-200ppm). Spoke with owner on the phone and per owner, an approved sanitizer will be brought on-site the same day.

27: Food separated and protected

(114089 and 114089(a)) Restaurants must provide a brochure placed at the point of sale that includes at least calories, sodium, saturated fat, and carbohydrates information per menu item. For sit-down restaurants, the information must be provided at the table. Drive-thrus are required to have the brochures available upon request and have a notice of the availability at the point of sale. (114094)
	Not In Compliance
