Inspector Comments: At time of re-inspection observed facility using mechanical warewash machine (observed containers, spoons, bowl etc) in mechanical machine. Observed mechanical machine not sanitizing at 50ppm. Observed with no sanitizer. Operator in last inspection stated that mechanical machine will be fix today. DO NOT USE WAREWASH MACHINE TILL MACHINE CAN SANITIZE AT 50PPM OF CHLORINE. Ask employee to post a not on machine not to use until fix. Employee stated that he didn't know that it was broken (since employee was off for two days). To avoid confusion, note was posted before leaving facility.

Observed 3 compartment sink in sanitizing area less than 50ppm. Ensure sanitizing at 100-200ppm. Corrected on site.
