RECREATIONAL HEALTH - PUBLIC POOL/SPA

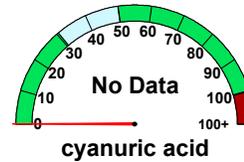

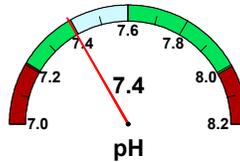

Based on an inspection this day, the items marked below identify the violation(s) in operation or facilities which must be corrected. The Permittee has the right to a hearing if requested in writing within 15 calendar days of receipt of this notice, to show cause why the permit to operate should not be suspended or revoked.

94

SCORE

Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional reinspection at a charge of \$61.25 per 15 minutes with a minimum time of 30 minutes, and a minimum charge of \$122.50.

36K430 Safety - Equipment/First Aid Kit

POINTS
2

Compliance Date: Not Specified
Not In Compliance
Violation Reference - CCR - 65539

Inspector Comments: Observed no rope attached to life ring. All swimming pools are required to provide a life ring with an outside diameter of 17 inches and a rope (at least 3/16 inches in diameter) attached that is long enough to span the widest part of the pool.

Violation Description: Every swimming pool shall be equipped for safety and rescue purposes with one or more rescue poles not less than 12 feet in length with body hooks, and one or more life rings having a minimum exterior diameter of 17 inches readily accessible for use. Such life rings shall have attached to them an 3/16 inch line long enough to span the maximum width of the pool. A first aid kit shall be provided at all swimming pools when required by DEHS.

36K446 Equipment - Chlorinator/Heater/Jets

POINTS
2

Compliance Date: Not Specified
Not In Compliance
Violation Reference - CCR - 65529, 65535, 3134B...

Inspector Comments: Observed chlorine tablets inside of the skimmer basket. Discontinue this practice.

Violation Description: Pools, when open or in use, shall be disinfected continuously by a chemical which imparts a residual effect. Disinfectant feeders shall comply with applicable requirements established by the NSF/ANSI 50-2010 performance standard effective August 2010 for disinfectant feeders. All feeders shall be capable of supplying not less than the equivalent of 3 pounds of 100 percent available chlorine per day per 10,000 gallons of pool water capacity. All parts of the pool and related pool facilities and equipment shall be maintained in good repair. A spa pool aeration and/or jet system shall be completely separate from the recirculation system and shall not be interconnected with any other pool.

36K458 Maintenance - Test Kit/Daily Records

POINTS
2

Compliance Date: Not Specified
Not In Compliance
Violation Reference - CCR - 65523, 65529

Inspector Comments: Record keeping.
Observed no test kit. Ensure to obtain a test kit. Taylor k-2009(recommended).
Observed no daily pool records on site. Ensure to maintain daily records for pool. Pool Code sec. 65523 states: "The operator of each pool open for use shall keep a daily record of information regarding operation, including readings of disinfectant residual, pH and maintenance procedures such as cleaning of filters and quantity of chemicals used." Also it states: "If cyanuric acid is used..., the cyanuric acid concentration shall be measured a minimum of once per month and records shall be kept of the results of such testing."
If the pool service person is only at the site 3 days a week, there needs to be someone else to record the chlorine and pH on the other 4 days. The only way poor chemistry can be corrected is if someone knows that it is "poor."

Violation Description: Appropriate test kits for measuring the pH, concentration of the disinfectant, and, when used, concentration of cyanuric acid shall be provided at each pool. The test kit shall be capable of testing for free chlorine residual.

The operator of each pool open for use shall keep a daily record of information regarding operation, including readings of disinfectant residual, pH and maintenance procedures such as cleaning of filters and quantity of chemicals used.

Overall Inspection Comments

No summary comments have been made for this inspection.
