Overall Inspection Comments:

The cited area of concern regarding outdoor waste tire storage at West Valley Material Recovery Facility has been corrected and the operator discontinued storing hazardous material at the southwest corner of the MRF building. During the course of the last month's inspection, the required shovels at the outdoor waste tire storage area and the required dry chemical fire extinguisher on the fuel-powered equipment used to handle waste tires were not observed. Also, the operator was observed storing hazardous material in an area not identified in the TPR. The operator recently provided the required round and square point shovels to the outdoor waste tire storage area and a dry chemical fire extinguisher (4-A:80-BC) to the fuel-powered equipment used to handle waste tires. Any facility storing 500 or more waste tires outdoors must comply with the technical and operational standards in sections 17351 through 17355 of Article 5.5 (Waste Tire Storage and Disposal Standards) and any facility storing waste tires indoors must comply with the technical and operational standards in section 17356 of Article 5.5 [14 CCR § 17350 (a) (b)]. If waste tires are stored indoor or 500 or more waste tires are stored outdoors at West Valley MRF, the operator shall comply with the required regulations and submit an application to the Local Enforcement Agency to amend the Transfer/Processing Report (TPR) to reflect the waste tire activity.

Currently, CalRecycle is in the process of reviewing the proposed permit review package for concurrence with the Local Enforcement Agency findings.

All residual waste is removed from this site within 48 hours. The records for the Log of Special Occurrences, Public Complaints, and Load Checks were up to date.

On 08-06-13, a 40-yard roll-off box containing industrial waste and light bulbs was brought to West Valley MRF facility by Ontario Municipal Solid Waste Division. The incident was notified to the Local Enforcement Agency, entered in the Special Occurrence Log, and the entire load removed by Ontario Municipal Solid Waste Division.
