Notes:

- 1) When questioning employee about manual dishwashing process, employee stated that dishes are submerged in quaternary ammonia sanitizer for thirty (30) seconds. Employee stated that SFSPac company rep told them to submerge dishes for 30 seconds. However, SFSPac sign (with manual dishwashing instructions) states to submerge dishes for at least one (1) minute. Ensure to have a sanitizer contact time of at least one minute when manually washing dishes. [Note: active dishwashing was not occurring at time of questioning.]
- 2) Observed soap dispenser and paper towel dispenser at prep sink. Recommend to remove soap dispenser and paper towel dispenser to avoid the appearance that sink is a handwashing sink. If facility decides to keep dispensers, recommend that a sign be affixed above prep sink specifically stating that it is a prep sink.
