**RETAIL FOOD PROTECTION - CONVENIENCE STORE (0-499 SQFT)**

**16K994 Reinspection**

**Compliance Date:** Not Specified  
**Not In Compliance**  
**Violation Reference - HSC**

**Inspector Comments:** During routine inspection on 1-7-14, observed that the cold water faucet at the 3-compartment sink was broken. Observed that the hot water faucet at the 3-compartment sink could only provide cold water (highest temperature was measured at 68F). (Note: hottest water in facility was temp'ed at 102F at the handwashing sink.) Operator stated that the hot water heating unit for the 3-compartment sink was broken and they are in the process of repairing it. Operator stated that 3-compartment sink is used for cleaning soda dispenser nozzles, coffee pots, and parts to coffee machine.

Facility was told to take the following actions immediately:

- 1) Repair cold water faucet of 3-compartment sink.
- 2) Repair hot water heating unit for 3-compartment sink, so that water can be provided at 100F and above.
- 3) Ensure that at least one sink in the facility can provide hot water at 120F and above (note: facility only has handwashing sink and 3-compartment sink, so one of these two sinks must provide water at 120F and above).

Facility was given 48 hours to comply with the above-mentioned requirements.

During re-inspection on 1-13-14, observed the following:

- 1) Cold water faucet at 3-compartment sink had been repaired.
- 2) Hottest water in facility was temp'ed at 109F at the handwashing sink.
- 3) Highest temperature at 3-compartment sink was measured at 67F.

Operator stated that he had phoned maintenance repair person, but he has not come to facility yet.

Facility is not yet in compliance with hot water requirements. Take the following steps immediately:

- 1) Repair hot water heating unit for 3-compartment sink, so that water can be provided at 100F and above.
- 2) Ensure that at least one sink in the facility can provide hot water at 120F and above (note: facility only has handwashing sink and 3-compartment sink, so one of these two sinks must provide water at 120F and above).

Ensure to take the above actions within 48 hours. Inspector will conduct a billable re-re-inspection to determine compliance.

**Violation Description:** Reinspection conducted at this time to determine compliance from prior inspection.

**Overall Inspection Comments**

Inspector will conduct a billable re-re-inspection to determine compliance.
