In Compliance
Not in Compliance

temperature (°F)	No Data
observed flow (gpm)	No Data
required flow (gpm)	50
volume (gal)	17,952
area (sq ft)	600
occupancy	30

IMPORTANT: Replacement of Suction Outlet Covers
 Suction Outlet covers (anti-entrapment covers over main drains and skimmer equalizer outlets) shall be replaced upon expiration. The expiration (in years) is stamped on the front of each cover, indicating the amount of time the cover is valid after installation. Each replacement cover shall:

1. Meet the latest ANSI/APSP-16 performance standard
2. Be rated for the maximum designed flow-rate of the pump

Retain all records which indicate the make/model number of the replacement cover and date of installation. Records shall be made available to your inspector upon request.

No Violations Cited

Overall Inspection Comments

POOL/SPA GATE

During a safety survey, the pool aide from Environmental Health Services (EHS) found the gate to the pool/spa area to be in poor condition. The gate was not secure (self-closing/self-latching) which may allow a child into the area unattended. Immediately secure the gate to prevent entry into the area.

The pool/spa was posted closed, not to be used, because of this safety hazard. Please call your inspector at 800-442-2283 for an inspection prior to reopening your pool/spa. Do not reopen your pool/spa for service without approval from EHS.
