Inspector Comments: A follow up reinspection was conducted at the request of the operator. This facility was observed closed for business at time of inspection. The health permit for this facility was suspended and this facility was ordered closed on 6/19/2018 due to a live cockroach infestation that was observed in the kitchen facility. On this date, after a thorough inspection of the entire kitchen facility, no evidence of a live infestation was observed. One dead adult cockroach was observed on the floor by the water heater and another dead adult cockroach was observed below the three compartment sink. The operator removed the dead cockroaches. The operator produced recent professional exterminator receipts showing pest control service conducted at this facility within the last twenty four hours and stated another pest control service is scheduled on 6/23/2018. This food facility was observed to be in a clean and sanitary condition. The health permit for this facility was re-instated this date. The notice of closure sign was removed this date. Continue to maintain this facility in a clean and sanitary condition and free from vermin-including but not limited to cockroaches.

Description: The health permit to operate is hereby reinstated and facility may open.
