Inspector Comments: Observed no sanitizer (quaternary ammonia) being dispensed from the three compartment sink dispenser. Upon examination, the plastic tubing linking the sanitizer concentrate reservoir to the dispenser manifold had become detached. The manager stated she thought the dispenser was working yesterday. The manager was unable to repair the problem, so she called a technician to repair the dispenser.

Immediately rewash and sanitize all utensils using hand-mixed sanitizer in the sanitizing basin of your three compartment sink. Using test strips (observed on site), ensure the concentration of the sanitizing solution is at least 200 parts per million quaternary ammonia. Alternatively, you can use chlorine (unscented bleach) at a minimum concentration of 100 parts per million.

Wash your utensils in detergent and water of at least 100 F. Once washed and rinsed, place the utensils in the sanitizer basin. Allow the utensils to sit immersed in the sanitizer solution for at least one (1) minute. If using chlorine, use a minimum contact time of thirty (30) seconds.
