#### 16K999 Complaint Inspection

Compliance Date: Not Specified

**Inspector Comments:** RE: Complaint

Reference - HSC

Our department received a complaint that a roach was observed, at about 3:30 pm on 8/19/19, crawling along the underside of the windowsill at the corner of booth C11. The complainant stated that an employee killed that roach in question with a napkin when it was brought to his attention. This is the third (3rd) roach complaint in the facility in the recent months. A roach complaint was investigated on 7/9/19. Another roach complaint was investigated on 8/9/19.

At the time of inspection today, both live and dead adult and nymph (baby) German roaches are observed almost every where in the facility. They are observed in the sushi prep/serving area, in the kitchen, in the waitress/server station, inside the cabinets in the buffet area, in the ice cream freezer display area, in the dining room, in the warewashing area, and in the storage areas. Video and pictures taken. Immediately take effective steps to completely eliminate roaches and other vermin from the facility. Thoroughly clean the entire facility.

The manager stated that the facility is being treated and maintained for roaches and other vermin by the Antmart Pest Management once every month. Observed a receipt of services dated 8/19/19.

Due to imminent health hazard, the permit to operate the facility is hereby suspended and the facility ordered closed until roaches and other vermin are completely eliminated from the facility. The permittee has the right to a hearing if requested in writing within 15 calendar days of this notice, to show cause why the permit should not be suspended or revoked.

Closure sign posted. Call (800) 442-2283 for a re-inspection.

**Description:** A complaint report has been received by Environmental Health.
