## PERMIT APPLICATION CHECKLIST

Initial permit application package shall contain the following, and depending on the nature of the permit request, additional information may be necessary:

- Fully completed and signed flood control permit application form.
- Six sets of plans, signed by a registered civil engineer.
- A filing fee in accordance with the latest fee schedule. Cities, state, public agencies and non-profit organizations/agencies are exempt from filing fee.
- Applications that involve storm drain connections or channel improvements shall be accompanied by three sets of hydrology and hydraulic calculations; **include input file listings with hydraulic calculations.**
- **Note:** Prior to permit issuance, a certificate of insurance will be required from the permittee and/or contractor.

All submitted plans shall contain the following:

1. **Title Block** Description / type of work and location of the project.
2. **Vicinity Map** Show the approximate location of the proposed project in relation to major streets and flood control channels.
3. **North Arrow** Indicate the direction of true North relative to the project site.
4. **Scale** Horizontal and vertical scales must be used on each sheet submitted for review. Use a scale that most accurately reflects the scope of the work that is being proposed.
5. **Benchmark** The control elevation for the project should be shown on the plans.
6. **Notes** General and construction notes must be shown on each plan sheet where applicable. Notes shall be clear, concise, legible and related to the proposed project.
7. **USA** Underground Service Alert note must be on the plans.
8. **Legend** Description of all symbols used on the plans.
9. **Contact Personnel** A list of all parties involved in the proposed project. Name, address and telephone numbers of the relevant parties associated with the proposed project. (24 hour emergency contact personnel).
10. **Revision Block** Revision block must be placed on all plan sheets.
11. **Stationing** All stationing of the proposed project as it relates to the District's facility. If the project affects a U. S. Army Corps of Engineers' facility, plans shall show the U. S. Army Corps of Engineers' stationing.
12. **Right-of-way** The District's right-of-way shall be clearly shown and labeled on each sheet of the plans with dimensions. Show typical section.

13. **Profile** Show grade, slope, length, type and size of the proposed facility and the existing and proposed finished grade.
14. **HGL** Hydraulic Grade Line must be plotted on all plans.
15. **Utilities** Plans must show all proposed and existing utilities within the District's right-of-way that will be affected by the proposed project.
16. **Streets** All street names must be labeled on the plans.
17. **Typical Cross Section** Shall show all existing and proposed improvements as they relate to the District's right-of-way.
18. **Facility** All District facilities must be properly labeled on the plans.
19. **Invert** The invert elevation of all District facilities and the proposed inlet or any other structure shall be shown on the plans.
20. **Removal** The removal or break out limits of an existing facility must be shown and have dimensions on the plans.
21. **Pipe** All pipe placed within the District's right-of-way shall be reinforced concrete pipe (RCP). The size, type and loading must be labeled on the plans. The District's minimum requirement is 24-inch RCP with 1350 D-load.
22. **Angle of Entry** The inlet angle to any facility shall be shown on the plans. The following angles of confluence are recommended.
- | <u>Super Critical Flows</u> |         | <u>Sub-Critical Flows</u> |         |
|-----------------------------|---------|---------------------------|---------|
| Up to 21"                   | 90° max | Up to 36"                 | 90° max |
| 24" – 33"                   | 60° max | 36" – 57"                 | 45° max |
| 36" – 57"                   | 45° max | 60" and over              | 30° max |
| 60" and over                | 30° max |                           |         |
23. **Manhole** The manhole depth, station and rim/invert elevation must be shown on the plans. The District's minimum manhole cover is 36-inches.
24. **Match Line** When multiple sheets are used for a submittal, each sheet shall have a match line to indicate how each sheet relates to one another.
25. **Concrete** The concrete mix design, specification and the required compressive strength must be shown on the plans. All concrete used in the District's right-of-way must meet the District's minimum requirements or the required concrete design mix. All concrete shall conform to Section 201-1 of the Standard Specifications For Public Works Construction, latest edition, except as follows:
- All structural concrete shall be 4000 psi with "A" gradation in all inverts and 4000 psi with "B" gradation for all walls.
  - Concrete for rock inlet and outlet structures, bottom controls, splash pad and other proposed structures shall be 560-B or C-3250.
  - Concrete mix designs shall be submitted to the District for review and approval at least 72 hours prior to concrete placement within District right-of-way.
26. **Standards** All non-SBCFCD standards shall be placed on the plans and are subject to District review and revision.

27. **Digital Submittal** Any connection to a Flood Control District facility shall require a CADD or GIS file of the location. Additionally, when a flood control facility meets qualifications as a Regional facility or if the Flood Control District will assume any type of maintenance or rights-of-way over the facility, a CADD or GIS file showing the basin footprint and/or channel alignment with a minimum of 1 meter accuracy in NAD 1983 State Plane California V FIPS 0405 coordinates shall be submitted. Any basin, channel, or connection alignment/locations shall reflect the actual location in said real world coordinates. Acceptable file formats are as follows: .dgn, .dwg, .dxf, .pro, GIS .shp, or GIS .mdb.
28. **Driveable Widths** All access routes within District right-of-way shall be constructed in such a manner as to allow unimpeded access to all District maintenance equipment, which includes 18-wheel vehicles. All driveable widths shall be a minimum of 20-feet wide, and shall have the following additional requirements:
- All turns must be constructed with a minimum outside radius of 60-feet, and a maximum inside radius of 25-feet.
  - Hammerhead turnarounds shall be a minimum 90-feet by 55-feet. Inside corners shall have a minimum radius of 35-feet.
  - Turnaround areas shall have a minimum radius of 50-feet.
29. **Resubmittals** All resubmitted plans shall include a **cover letter that addresses the District's previous review comments** and shall be accompanied by four sets of revised plans per this checklist. ***Resubmittals without a cover letter addressing the District's previous comments will be returned without review.***

3. Deposits:

An initial deposit is required for each actual cost project. The initial deposit is as specified in this ordinance. If no amount is specified, the initial deposit is the San Bernardino County Flood Control District's initial estimate of the actual cost of the project. The San Bernardino County Flood Control District may revise its estimate at any time during the processing of the project. If a revised estimate is higher than a previous estimate, the San Bernardino County Flood Control District may require an additional deposit. Notice of any required additional deposit shall be mailed to the applicant. The notice shall include the date by which the deposit must be made, and shall inform the applicant that unless provision for payment is made by the date specified, the application will be deemed denied without prejudice, without further action by the San Bernardino County Flood Control District. Any such denial without prejudice is not appealable. Each estimate shall be a good faith attempt to determine the probable actual cost of the project based on the nature of the project, the District's experience in processing projects, and applicable rates.

4. Applicant's obligation to pay actual cost:

The applicant shall pay the actual cost of the project, regardless of any estimate; except that the applicant is not obligated for costs incurred after the applicant delivers to the San Bernardino County Flood Control District either an unconditional written withdrawal of the application, or a written notice to stop work which includes a waiver of any applicable time limits for processing the application.

(m) Waiver/refund of fees:

1. Except as otherwise provided by law, the San Bernardino County Flood Control District Board of Supervisors, by Board action, can waive or refund any fee set forth in this ordinance or any other fee levied by the Flood Control District provided one of the following conditions is met:
  - A. The service for which the fee was levied has not and will not be performed; or
  - B. The fee was collected in error; or
  - C. For other good cause shown, provided such waiver/refund would serve a San Bernardino County Flood Control District purpose.
2. In the event of a disaster, or other good cause shown to serve a San Bernardino County Flood Control District purpose, the Flood Control Engineer may waive or refund any fee set forth in this Ordinance or any other fee levied by the San Bernardino County Flood Control District provided all of the following conditions are met:
  - A. Exigent conditions exist whereby obtaining Board approval of the fee waiver/refund would not be immediately feasible; and
  - B. The amount of the waiver/refund would not exceed \$3,000 per event; and
  - C. The San Bernardino County Flood Control District receives concurrence from the County Administrative Office
3. The Flood Control Engineer, or designee, may refund any fee or deposit set forth in this ordinance provided one of the following conditions is met:
  - A. The service for which the fee or deposit was levied has not and will not be performed; or
  - B. The fee or deposit was collected in error; or
  - C. Unused deposit monies remain on actual cost projects when all charges for the project have been recorded.
