

Summit Valley Road Project

Project Description

The Summit Valley Road project widens and realigns Summit Valley Road from SH138 to Ranchero Road relieving congestion and providing a second major thoroughfare connecting the San Bernardino Valley and Victor Valley during I-15 closures.

Project Need

The I-15 is the only existing corridor connecting the San Bernardino Valley and Victor Valley. The Summit Valley Road project is especially significant as it establishes a second major thoroughfare connecting the two valleys providing an alternate evacuation route during disasters, improving access for regional commerce and relieving congestion on the I-15. Additionally, this project will link the SH 138 improvements that are shelf ready.

Milestone	Forecast/Completion
Start of Project	2006
Project Approval and Environmental Clearance	2009
Right of Way Acquisition	2010
Project Specifications and Estimates	2011
Anticipated Construction	2013

Funding Source	Amount
PLH	\$2 million
Requested Amount	\$19 million
Total Project Cost	\$21 million
