

San Bernardino County
will host
Zimek's Dri-Mist Treatment System
for a Train-the-Trainer Session

Zimek is a Room and Vehicle Decontamination System that enables the complete decontamination of all interior air within a confined space and comprehensively disinfects all surfaces wherever free air flows.

Will be providing training to several County Department's. Inside each ZIMEK Room and Vehicle Decontamination System there is a Dri-Mist® Micro-Particle Generator that breaks down ZIMEK's specially-formulated disinfectant solutions into microscopic, negatively charged ion particulates.

These particulates are so small (smaller than one micron in diameter) that they can access every virus, every bacterium, and every unwanted allergen within ALL surfaces of a room. The particulates are so small, they kill contaminants under furniture and tables, throughout air-conditioning duct work, and everywhere else that traditional sprays and foggers can never reach. And because these particulates are negatively charged, they stick to positively charged contaminants and **kill them**. ZIMEK surrounds all indoor surface areas and even disinfects the interior air as it works. To learn more about Zimek go to: www.zimek.com

Safely

- **KILLS**—MRSA/TB/VRE
- **KILLS**—Norovirus/HEP C
- **KILLS**—Bird Flu/Influenza
- **KILLS**—Deadly Viruses and Bacteria
- **KILLS**—Toxic Mold and Mildew

Training of Zimek Systems will take place on:
September 27, 2012 from 1:00—5:00 p.m.

at

Arrowhead Regional Medical Center (ARMC)
Citrus Conference Room
400 North Pepper Avenue
Colton, CA. 92324
