SUBJECT: TEMPORARY CONDITIONS AFFECTING APPROACH TO LOMA LINDA UNIVERSITY MEDICAL CENTER'S NORTH AND SOUTH PADS

Loma Linda University Medical Center (LLUMC) has notified ICEMA regarding crane operations in the vicinity of the approach path of both roof top heliports starting Monday, December 9, 2013.

Roof resurfacing activities between the North and South helipad will involve the use of a crane with a boom that will reach heights approximately 140 feet above the helipad landing surface. Although this height does not intrude into the protected approach space for the heliports, it still presents a hazard for approaching EMS aircraft (see attached diagrams).

Please ensure that notification of this aircraft hazard is circulated to all operational staff, flight crews, pilots, etc. If ICEMA is notified of any change to the above information, we will advise you immediately.

If you have any concerns or questions regarding this flight hazard, please contact Brett McPherson, LLUMC Emergency Management Supervisor, at (909) 651-4018 x58155 or via e-mail at brmcpherson@llu.edu, or via pager at brmcpherson@my2way.com, or Jared Horricks, Project Manager, LLUMC Project Management Services, at (909) 723-2103 or via e-mail at jahorricks@llu.edu.
