

**Updated Plan for Service
Dated November 2009
Submitted by the
City of San Bernardino**

Attachment 2

**CITY OF SAN BERNARDINO
ANNEXATION NO. 3067**

PLAN FOR SERVICES

NOVEMBER 2009

Background

LAFCO 3067 is a proposal to annex six substantially-surrounded unincorporated islands of territory located in the northeastern sphere of influence of the City of San Bernardino.

The annexations, as initiated by the City in July 2006, included approximately ninety-seven (97) acres. Following the City's submission of the application to annex six islands, LAFCO staff expanded the county islands in November 2006 and the LAFCO Commission expanded the county islands in February 2007. During November 2006, Island #1 and Island #4 were expanded to include the San Bernardino Flood Control facilities to provide for a clearer delineation of City boundaries. During February 2007, modified Island #1, modified Island #4, and Island #5 were expanded through the direction of the LAFCO Commission. With the expansions from 2006 and 2007, the total acreage involved in the reorganization proposal is now approximately three hundred forty-four (344) acres.

LAFCO 3067 was initiated by the City in response to directives of the LAFCO Commission, which were outlined at the April 2006 hearing regarding LAFCO 3050 (Arrowhead Springs Specific Plan). At the hearing, the Commission indicated its intention to require the City to address its thirteen (13) island areas as part of the consideration of LAFCO 3050. At the May 2006 hearing, the Commission approved the annexation of the Del Rosa Island (LAFCO 3049) into the City.

The following is an enumeration and description of the public services to be extended to the affected territory:

City Administration

The City of San Bernardino's Administration Services consists of Elected Officials, Boards and Commissions, City Attorney, City Manager and City Clerks. The goals of this functional area are to implement to policies of the City Council, provide administrative oversight, maintain official City files, enhance economic development and make recommendations for a balanced City budget. The City Clerk shall provide public information, record, and passport services. Bonded indebtedness and grants are administered through the City's Departments and Divisions as listed below.

The City's franchise agreements and contracts are administered by the following departments: City Manager's Office administers cable; Fire Management administers paramedic services; Public Services administer sanitation services (rubbish collection and recycling); Code Compliance administers weed abatement, and the Police Department administers towing services. These services shall be provided to the annexation site at the level currently enjoyed by the residents of the City. The annexation is not anticipated to change the level of service provided by the City, and will enhance and expand those services presently experienced by the area to be annexed.

Animal Control

Upon annexation, the City of San Bernardino will provide Animal Control services to the six unincorporated county islands. These services include, sheltering animals, investigative services for citizen complaints, dangerous dog hearings, animal bites, cruelty cases and many others.

Any animal currently licensed by the County of San Bernardino will be honored until the license expiration, at that time all animals must be licensed with the City. Additional services, such as, adoption and low cost vaccinations, are available on an individual basis for an additional fee and are cost neutral to the City. Currently, approximately 57% of households within the City have pets, and 23.5% of the pets are licensed. By institution a license-canvassing program, Animal Control estimates an addition 23% of unlicensed pets that should be licensed in the unincorporated areas can be licensed. Using an average license fee of \$33.50, the City can generate approximately \$3,785 in additional revenue.

Approximately 21,100 or 9.7 % of the population required service from Animal Control, during fiscal year 2008/2009. Using current budget figures for fiscal year 2009/2010 of, the cost per call is approximately \$55.30 per service visit. Although no additional staff is needed, as a result of the six unincorporated county islands, Animal Control estimates they will respond to an additional 372 service calls, resulting in additional costs of \$20,571 to the department.

Development Services:

The Development Services Department provides planning, building, and engineering services related to land development, including new development and additions.

Planning services for the annexation area shall be provided by the City's Planning Division within the Development Services Department. During the City's 2005 General Plan update, the City carried forward the pre-zoning for the areas established by the 1991 General Plan. The land use designations between the County and City are generally consistent:

Island Identification	County Land use Designation	City Land Use Designation/Pre-Zone
Island #1	RS-9M (Residential, Single-Family minimum 9,000 sq. ft. lot size)	RS (Residential Suburban: Single-Family until, 4.5 dwelling units per acre, 7,200 sq. Ft. minimum lot size)
Island #2	RS-9M (Residential, Single-Family minimum 9,000 sq. ft. lot size)	RS (Residential Suburban: Single-Family until, 4.5 dwelling units per acre, 7,200 sq. Ft. minimum lot size)
Island #3	RS-9M (Residential, Single-Family minimum 9,000 sq. ft. lot size)	RS (Residential Suburban: Single-Family until, 4.5 dwelling units per acre, 7,200 sq. Ft. minimum lot size)
Island #4	RS (Residential, Single-Family)	RL (Residential Low: Single-family residential units allowing 3.1 dwelling units per acre, 10,800 sq. ft. minimum lot size)

Island #5	RS (Residential, Single-Family) CO (Office Commercial)	RS (Residential Suburban: Single-Family until, 4.5 dwelling units per acre, 7,200 sq. Ft. minimum lot size)
Island #6	RS (Residential, Single-Family)	RU-1 (Residential Urban: Multi-Family units - allows for up to 9 dwelling units per acre (7,200 sq. ft. minimum lot size, 5,200 sq. ft. minimum lot size in planned unit developments)).

The City's pre-zone designations will be maintained for a two-year period following reorganization as required by Government Code Section 56735(e). However, changes to specific determinations can be made by the Mayor and Common Council at a public meeting.

The Public Works Division will provide services such as street rehabilitation and storm drain installation and repair. These types of projects are normally part of the City's five year Capital Improvement Program and funding is normally provided by either the City's General Fund or various transportation funds such as gas tax funds.

The permit fees for services provided by Development Services will vary depending on the type of development. Based on population estimates of \$20.04 per citizen, the City will receive approximately \$74,000 in gas tax.

Improvement Zones/Districts; Assessment Districts:

- *Districts:* None of the six county islands are in City Redevelopment Districts. However, the six islands are part of the Service Zone PM-2, which assesses a \$19 charge on each parcel for paramedic services. Upon annexation the City will receive the associated revenue from Service Zone PM-2.
- *IVDA:* County islands 4, 5, and 6 are located within the Inland Valley Development Agency boundaries. Upon annexation, in addition to other property tax transfers, the City will receive the pass-through portions of the detaching agencies.

Fire Protection Services

Since 1998, the City of San Bernardino has provided fire protection services to the unincorporated islands in the City's sphere of influence. The City will continue to provide fire services for these areas after annexation. The nearest fire stations to the proposed annexation areas are as follows:

- Station 221. 200 E. Third Street
- Station 226. 1920 N. Del Rosa Ave.
- Station 227. 282 W. 40th Street.
- Station 228. 3398 E. Highland Ave.

In addition to fire and paramedic services, citywide service includes disaster preparedness and emergency operations.

As previously noted, there are four (4) fire stations that provide the majority of service to the island areas. Taking into consideration the percentage the Department's total emergency calls for service that occur in the county island areas (1.25%) and average operational costs for these stations (maintenance costs, staffing, and 16.5% administrative costs), the total cost to provide fire and EMS/paramedic to the six islands is \$147,061.

Funding for fire services in these county islands are currently funded through CSA 38 and its Improvement Zone L (paramedic service). Zone PM-2 (CSA 38L) fees are currently collected in the county islands and will continue to be collected after annexation.

In 2006 the City of San Bernardino (City) and County of San Bernardino (County) entered into a five year Agreement, where the City provides fire protection and paramedic services to County unincorporated areas within the City's sphere of influence for \$487,000 per year. The agreement stipulates that future annexations will reduce the Agreement amount based on the County Auditor/Controller estimated current tax revenue to be transferred by the County to the City. The six unincorporated areas being annexed by the City as part of LAFCO 3067A-F represent approximately 17.8% of the population covered in the Agreement.

Per Section 8 of the Agreement, "Only properties annexed prior to April 1st of the current contract year will be used to recalculate the next year's contract amount." As such, the City and County both agree the County will continue to remit semi-annual payments as stated in the Agreement for FY 2009/10. With the annexation of the six county islands by the City and the increase in property tax revenues received since FY 2005/06 by the County, both sides agree it is in the best interest to discuss a possible amendment to the Agreement for FY 2010/2011 and to begin negotiations on a new agreement during January of 2011.

Multi-family complexes of four units or more located within the City are charged a mandatory fee for fire prevention inspections. Inspection rates vary by the size of the complex. There are no multi-family complexes that meet the criteria within the six proposed annexation islands.

Police

The county islands are presently served by the San Bernardino County Sheriff. After annexation, the City of San Bernardino Police Department will provide police services. Currently, the Police Department has approximately 350 sworn officers. This includes 246 patrol/traffic officers, 44 detectives, 44 sergeants, 10 lieutenants, 4 captains, 1 Assistant Chief and 1 Chief of Police.

With the current fiscal crisis and hiring freeze at the City, the annexation of the six county islands will have a fiscal and operational impact on the Police Department. To estimate costs to provide services to the county islands, the Police Department estimated the police personnel costs on a square mile basis. This formula was then used to allocate personnel costs for each County Island on its respective land size percentage of the entire city. It should be noted, due to the hiring freeze, serving these county islands will increase overtime. The total estimated cost to provide police services to the six county pockets is \$620,296.

As with any annexation, the increased population and land area will alter the City's current crime statistics.

Water

Water service is provided to the island areas by East Valley Water District. No change in this service will take place on the basis of the reorganization.

Sewer

Sewage collection services are currently provided within the island areas by the East Valley Water District. No change in this service will take place on the basis of the reorganization.

Solid Waste

Solid waste services are currently provided within the reorganization by Burrtec Disposal which charges \$45.72 or \$49.00 depending on the County Island every two months for its services (waste, yard waste and recyclables). Pursuant to City policy, residents of newly-annexed islands may continue to use their current refuse hauler for up to five years. Residents may choose to transition at any time during this period. The City's current residential rate is \$22.84 per month for once-a-week pick up and includes the provision of containers for normal, recyclable, and green waste. Commercial rates vary depending on the type and frequency of pick-up.

The City's Integrated Waste Management Division estimates that in five years, when the City will be responsible for providing services to the county islands, the City will need to add three routes at a cost of \$1,150,000. Total costs were estimated from the purchase of three new trucks amortized over seven years (\$1,000,000 or \$143,000 per year) and new trash carts (\$150,000). Total estimated revenue from these three routes is approximately \$300,000 per year.

Utilities – Utility Users Tax

The City of San Bernardino currently collects a 7.75 percent Utility Users Tax. This fee will not be assessed to the 6 islands, unless otherwise approved by voters within the islands. The City estimates based on \$300 per month per household in utility costs, the City would have collected approximately \$300,000 per year in Utility Users Tax revenue.

Public Services/Streetlights and Traffic Signals

Edison maintains the streetlights in the county islands, and they all appear to be within the City street lighting policy. If additional lighting is needed Edison will install with little or no cost to the City. The City will assume the maintenance costs for these lights after. Upon annexation of the county islands, the City will also assume maintenance of four traffic signals. Taking into consideration best estimates, staff believes the annexation areas will incur the following annual costs:

- Energy costs are estimated to be: \$24,912 (173 lights at \$144/year)
- Energy costs are estimated to be: \$4,080 (2 intersections at \$2,040/year)

In compliance with existing LAFCO Commission policy, a condition of approval will be included which requires documentation of the transfer of this responsibility through verification of lighting facilities to be transferred and requiring the submission by the City of a signed form authorizing the transfer upon completion of the reorganization.

Currently, streetlights are funded in the county islands through CSA SL-1. Upon the completion of the reorganization, the property tax transfer from CSA SL-1 to the City will be estimated at \$17,200, which does not meet the cost of continuing this service.

Traffic signals are based on actual costs to the City for accepting the maintenance of the intersection. Currently, the City has a co-op Agreement with the County for maintaining these intersections.

Public Services/Streets

The Street Division of Public Services provides monthly street sweeping, street/sidewalk repair, tree trimming, and graffiti. No additional fees are charged for these services. The City will assume the maintenance of 380 trees and 345 signs after annexation of the county islands. After completing the windshield survey of potential annexation areas it is believed the following costs will be incurred by the City:

- Right-of-way to be sprayed for weeds: Based on current square footage cost to clean and spray herbicides, costs to provide right-of-way weed clean-up will be \$10,000 annually. These costs will be paid from the Integrated Waste Management Fund and will have no impact on the City's General Fund.
- Street Sweeping: It is estimated that the cost to provide street sweeping services will be \$25,000. Upon annexation staff will re-work the street sweeping routes and integrate the six islands into the current street sweeping schedule. Staff anticipates the City may be able to achieve efficiencies with new routes and eliminate some of the estimated costs. Furthermore, the costs associated with street sweeping will be captured in the Integrated Waste Management Fund and there will not be a General Fund impact to deliver these services.
- Sign upgrades to City standards: \$89,500 (\$29,500 replace damaged/missing signs and \$60,000 in labor)
- Tree Maintenance: The maintenance of the existing 380 trees in the six islands, including tree trimming, planting new trees and removal of old/dead trees, will be paid for out of the City's current tree trimming agreement. The additional trees will be added to the City's current tree trimming. As such, the added work will not have an impact on the City's General Fund. It is estimated that over a ten-year period the costs for tree maintenance will be \$59,000 (\$24,000 tree trimming and \$35,000 planting and removals).
- Graffiti Removal: \$6,000 (based on current square acre cost to the City)
- Street Maintenance/Asphalt and Concrete: \$910,000 (Based on current contract costs for pavement, sidewalk, curb and gutter to be brought to City standards. Total street and curb measurements were assessed by the City's pavement management system. The City estimates the costs will be incurred over a ten (10) year period.) Costs associated with infrastructure upgrades will be paid for through future CIP projects, eliminating any General Fund obligations.

Public Services/Storm Drains

The City will assume the maintenance of six storm drains upon the annexation of the county islands. Total annual maintenance cost per storm drain is \$144.80 or \$868.80 for the entire year.

Code Compliance

Currently the City of San Bernardino has a staff of 43 personnel, allocated to four (4) divisions, which administer code compliance services. These services include housing improvement/neighborhood revitalization (regular code), single family rental inspections, weed abatement, and administration.

The 6 areas ("Islands") proposed for annexations contain mostly single family residential and a few multi-family residential properties. A windshield survey was conducted for each of the islands and from a Code Enforcement perspective, some of the Islands are better maintained than others which will affect the number of complaints that will be generated from each Island.

The Code Enforcement Department has historically been divided into Areas to coincide with the Police Department ("PD") Beats. Recently, the Police Department revised their Police Beats into 4 Beats (A-D). All of the areas proposed for annexation are in the "C" Area in the North East part of the City and therefore all information upon which assumptions or estimates are based on were collected from the C Area.

Regular Code Enforcement

A conservative number of new complaints in six county islands is approximately 330 the first year. This number was calculated using the current number of complaints per acre received in Area C. The calculated average yearly complaints received for Area C are approximately 491 per officer, Area C currently has 3 Code Enforcement Officers and 1 Senior Officer. The additional number of complaints generated does not account for the additional and activities that a complaint may generate. These activities include, but are not limited to, the preparation and execution of inspection/abatement warrants, Police and Fire Department assistance on inspections, transient vendors, preparation of administrative hearings and testifying at hearings and in Court.

A minimum of 1 additional Code Enforcement Officer II will be needed to cover the proposed annexed areas.

Single Family Rental Inspection Program (SFRIP)

In addition to regular code enforcement, the Department also has a Single Family Rental Inspection Program that requires an annual inspection of all single-family rental properties in the county islands. This includes an average of 4 inspections/re-inspections per rental property. In addition to the inspections/re-inspections, a SFRIP Code Officer II has additional duties that include, but are not limited to, preparing cases that have been appealed, assisting tenants and property owners both in person and by telephone, preparing documents for mailing, due diligence on properties, etc. These associated duties will be absorbed by the current staff.

Weed Abatement

After a survey of all 6 islands, only a few vacant lots were found and the impact of annexing these 6 islands would be negligible for our Weed Abatement Division. Furthermore, abatement

costs are normally billed or assessed to the owner of property on which abatement activity occurs, and is generally cost neutral to the City.

Summary

The City will need to add one (1) new Code Enforcement Officer II to cover the proposed annexed areas, specifically Island # 1 and Island # 5. The costs for the officer, including uniforms, vehicles, radios, and office equipment is approximately \$84,420. Based on staff's estimates, the City will expect to receive approximately \$22,000 in fine and penalties revenue associated with the additional officer.

To ensure the continuance of active County Code Enforcement files in the six county islands, LAFCO staff will obtain the files and transfer them to City staff upon annexation.

Fiscal Impact Analysis

A fiscal impact analysis has been prepared as is attached for your consideration (Attachment A). All municipal services will be provided and the costs absorbed by the City with no negative service impacts to the county islands.

CERTIFICATION

I hereby certify that the statements furnished above and the documents attached to this form present the data and information required to the best of my ability, and that the facts, statements, and information presented herein are true and correct to the best of my knowledge and belief.

Attachment A

City of San Bernardino - Annexation No. 3067

Municipal Services Impact Analysis

Analysis

The cost and revenue figures for this analysis remain flat for the projected timeframe. Reasons for this are due to the absence of any businesses or commercial property, average property turnover rate, little room for expansion, and low property taxes. Without the major factors that may influence an area for the projected timeframe, and that the area has little room for additional development, the City used the most recent information and strived to achieve the most likely results that will occur within a five-year period.

Assumptions

1. Projections are based on fiscal years ending June 30. FY 2009/10 figures are based on 6 months worth of expenditures and revenues.
2. Revenues and costs are using fiscal year 2009/10 budgeted dollars, assuming no annual Consumer Price Index (CIP) adjustment as it is presumed that future costs increases will be offset against future revenue growth.
3. No assumptions were made concerning new development in the area of future new development.
4. No revenue or costs were projected for the following: Recreation Program Revenue Fee. It is assumed that these items are already included in the revenue and costs of the City, and that the residents are already using the City's recreation services.
5. Statistics for the 6 County Islands: Lineal street miles (13.57), acreage (343.5), number of homes (1,111) and population (3,691), were obtained ESRI reports generated by the City's GIS Division of Information Technology.
6. Factors concerning land use for the area were obtained through physical observation, reference to maps, and the City's GIS Division.
7. Capital or infrastructure impacts are included as part of this analysis (Street repair, sidewalk, curb and gutter).
8. Planning, Building and Engineering Services and Fees that are non-recurring are excluded in this analysis.
9. Valuation of the existing properties are from the County Tax records.
10. Fiscal model factors used in this analysis are based upon the 2009/10 Adopted Operating Budgeted, with the following exceptions:
 - A. Sales Tax is the annual estimated amount based upon the actual businesses in the annexation area
 - B. Business License Fees - annual estimated amount based upon the actual businesses in the area.
 - C. Property Taxes - bases upon the minimum \$10 per \$1,000 of assessed valued agreed upon by the San Bernardino County Board of Supervisors, and assuming zero percent increase in property tax rates. The City receives approximately \$0.1724 of every \$1 in revenue received by the County.
 - D. Police Services - based on information provided by the San Bernardino Police Departments on the immediate impacts of this specific area. The Police Department has determined that his annexation will be absorbed into the current beat system, but will require overtime to do so.
11. For all existing persons located within the annexation area, a \$55.37 per person revenue amount was added, for the VLF revenue provided by AB 1062.
12. VLF, AB1062 and Gas Tax Revenues are based on population factors. As such, these revenues as stated in the FY 2009/10 estimates, will not be reduced, even through FY 2009/10 estimates are predicated on 6-month calculations.

Estimated Police Department Expenditures

General Note: The City of San Bernardino is approximately 60 square miles. One square mile is 660 acres. The total acreage for the county islands is 343.5 acres or approximately 1/2 square mile. The total county acreage represents approximately 0.9% of the City's total square mileage. Using this information, costs were calculated based on the percentage of the county islands compared to the total acreage of the City. For reasonableness, the estimated cost of \$620,296 is approximately of 1% of the Police Department. Furthermore, the estimated population of the County islands (3,691) is approximately 1.8% of the City's total population (209,000).

	Total	Per Square Mile	Total County Island %	Annual Cost	Total Cost for County Islands (OT Calc)
