# VICTORVILLE WATER DISTRICT

## SPACE CENTER ANNEXATION

### PLAN FOR SERVICES

August 31, 2009

Approved By   
Director of Water District

Date 8-31-09

## **PLAN FOR SERVICES – SPACE CENTER ANNEXATION**

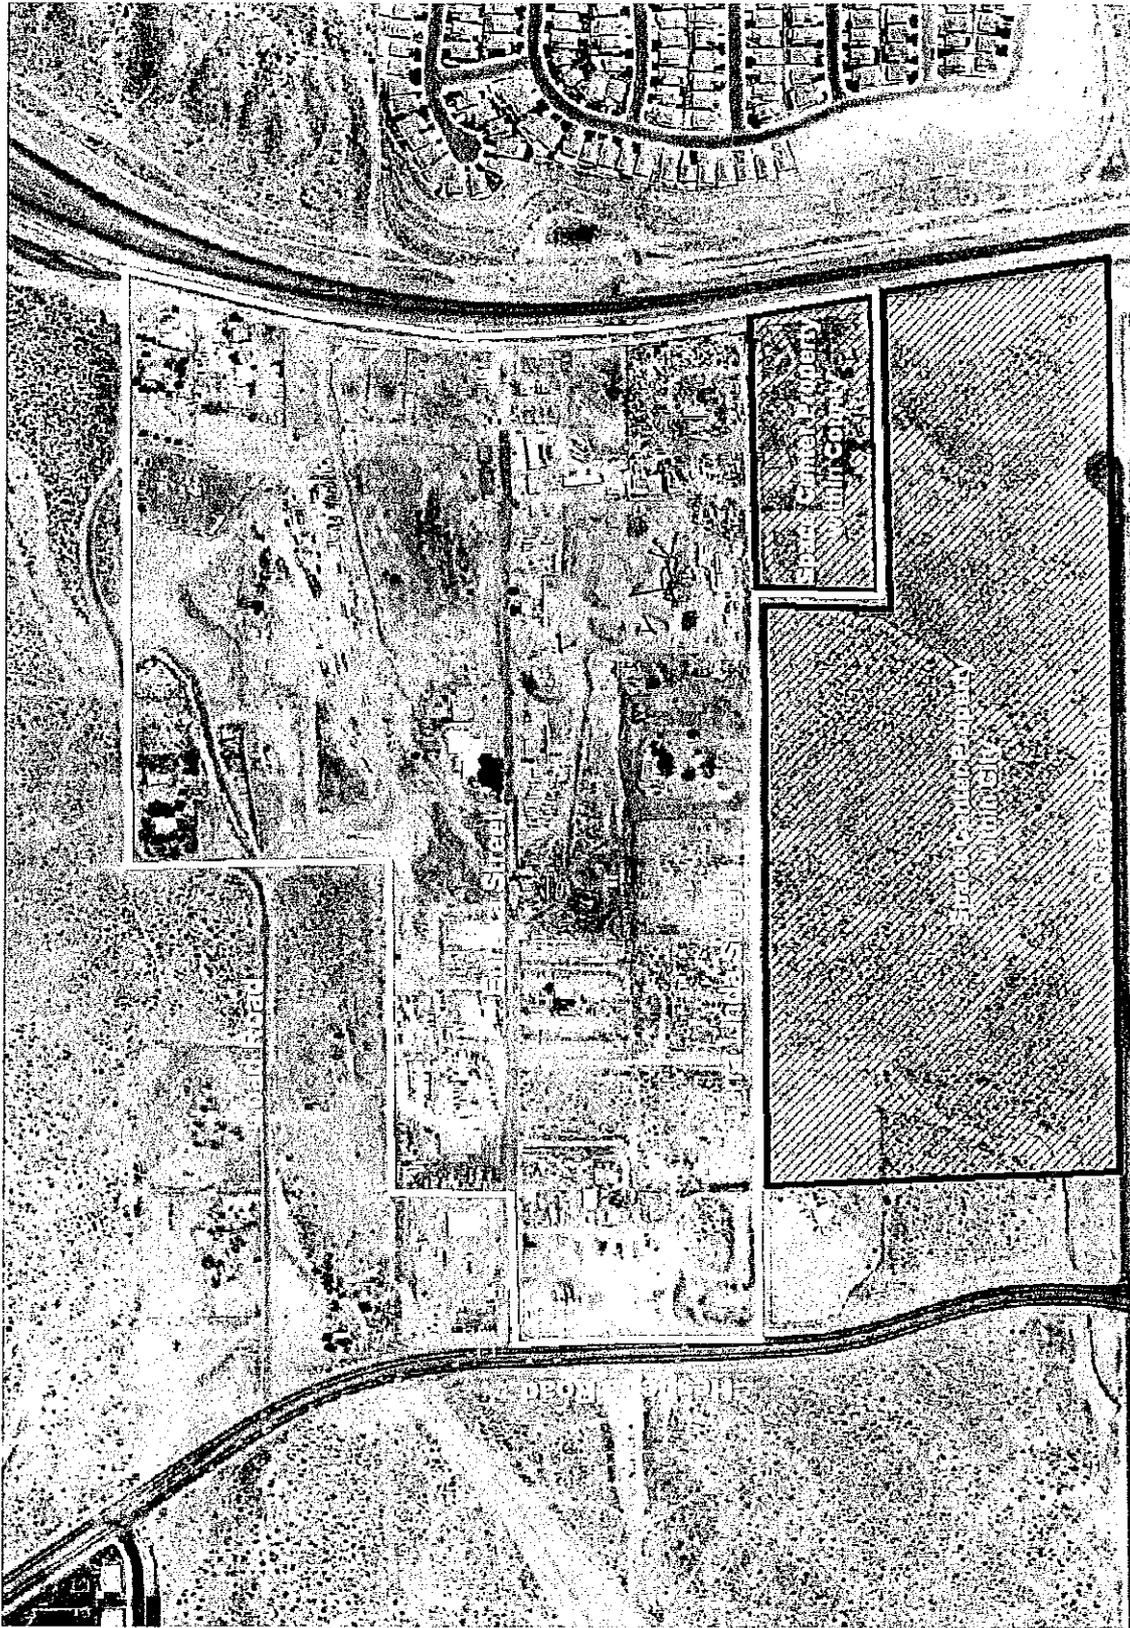

### **WATER SUPPLY**

The proposed annexation will involve the annexation of the county service area number 70 (see Figure 1) to the Victorville Water District (a subsidiary of the City of Victorville). The water for existing development within the area is currently provided by private wells.

The Victorville Water District currently has 12" water lines on Ottawa Road and Hesperia Road, and an 8" water line on Eureka Street. These existing water lines will need to be extended into the proposed annexation area to provide service to the existing development and the anticipated industrial development. Existing well pumping plants and storage reservoirs have adequate capacity to serve the proposed annexation area. As such the proposed annexation area will have minimal impact to the water district. When the proposed and existing developments connect to the system, they will be required to pay connection fees, which will pay their proportionate share of new infrastructure required to serve this area.

The City has adopted a water conservation ordinance that will be applied to new development within the annexation area after annexation. The ordinance requires the use of drought-tolerant, low-water-use plants and minimal turf area. A copy of the ordinance is attached with this PFS. The City is also requiring that developers construct "purple pipe" systems where appropriate for the use of recycled water.
