San Timoteo Creek Basins excavation hauling to commence

The County of San Bernardino Department of Public Works has contracted with Spiess Construction Co., Inc. for the excavation of the San Timoteo Creek Basins in the Redlands area. These important basins provide flood protection to thousands of residents in the Redlands and Loma Linda areas.

The construction will include hauling material from the basins (near the railroad crossing) south on San Timoteo Canyon Road to Redlands Boulevard in Riverside County and then along Redlands Boulevard to the 60 Freeway. We are anticipating as many as 300 trucks per day will be added to the traffic along San Timoteo Canyon Road.

Work will begin October 25 and continue through February 2012. Normal working hours will be from 8:30 a.m. to 4 p.m. Monday through Friday.

During this time, please be attentive to the additional truck traffic along San Timoteo Canyon Road. We suggest that you allow additional time in your commute schedule. The county apologizes for the inconvenience and thanks the public for its cooperation during this construction project.

Further information is available by contacting the Department of Public Works at (909) 387-7920.
