# Executive Summary

---

PlaceWorks has performed a modified Phase 0 Site Assessment Report (Phase 0) on behalf of the County of San Bernardino (City), for the Valley Corridor Specific Plan project in the County of San Bernardino, San Bernardino County, California. This Phase 0 was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14 Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process. Exceptions to, or deletions from, this practice are described in Section 1 of this report. The Phase 0 involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The purpose of the assessment was to evaluate the likelihood that hazardous materials may be present in soil beneath the Project Site as a result of on site or off site activities.

Our conclusions are intended to help the user evaluate *potential environmental concerns* in connection with a *property*, as defined in the ASTM E 1528-14 Standard (Standard) and discussed in the Introduction of this report. The purpose of this assessment was to evaluate Project Site history, existing observable conditions, current Project Site use, and current and historic uses of surrounding properties to identify potential environmental concerns in connection with the Project Site. It was outside of the scope of this assessment to inspect inside of all commercial properties, conduct interviews and have operators complete transaction screen questionnaires.

The term potential environmental means the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or a threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. (Note that “threat of release” is generally understood to be present when hazardous substances or petroleum products are poorly managed (for example in corroded tanks or damaged containers) but the release of the contaminants has not yet occurred, and there is an opportunity to take response action to prevent a release of the contaminants.

The purpose of this practice for conducting a *transaction screen* for a parcel of *commercial real estate* where the *user* wishes to conduct limited environmental *due diligence* (that is, less than a *Phase I Environmental Site Assessment*). An evaluation of business environmental risk associated with a parcel of *commercial real estate* may necessitate investigation beyond that identified in this practice.

## POTENTIAL ENVIRONMENTAL CONCERNS

The goal of the assessment is to identify potential environmental concerns, as defined in the Standard and in Section 1 of this report. This assessment has revealed the following potential environmental concerns:

## Executive Summary

- Numerous automobile repair facilities currently operate and historically operated within the Project Site. Each facility may have sumps, drains, hydraulic lifts, parts washer, and chemical storage areas that will need to be evaluated if land uses change.
- Four facilities were identified with registered underground storage tanks (USTs) and one above ground storage tank. The potential exists for there to have been leaks or releases to the soil.
- Three facilities were identified with leaking underground storage tanks (LUSTs). All facilities received regulatory closure, however, if land uses change the sites need to be reevaluated based on planned future land uses.
- Seven facilities, automobile repair and dry cleaners were identified as being Resource Conservation and Recovery Act (RCRA) Small Quantity Generators. The storage and generation of hazardous material has the potential to impact the project site.
- Seventy-one historic automobile stations/automobile repair facilities were identified within or adjacent to the Project Site. These facilities had the potential to impact the Project Site and if land uses change an evaluation if releases had occurred is recommended.

### SUMMARY

Based on the results of this modified Phase 0, several potential environmental concerns were identified in connection with the Project Site. Review of available historical aerial photographs and the environmental database has revealed numerous properties within the Project Site boundaries that could have historically posed a variety of environmental hazards.

PlaceWorks recommends a site-specific Phase I Environmental Site Assessment (Phase I) be conducted for proposed redevelopment that includes any of the sites included on the RCRA Generator, UST, LUST, dry cleaners or historic automobile station/repair facility lists, or is located within a ¼-mile of any of the LUST-listed sites. Many of the current automobile repair facilities were not listed on the databases and a Phase I is recommended to inspect these sites for potential environmental conditions.

Observation should be made during any future Project Site development for areas of possible contamination such as, but not limited to, the presence of buried debris, waste drums, and stained soil. Should such materials be encountered, further investigation and analysis may be necessary at that time.

# 1. Introduction

---

## 1.2 PURPOSE

This Phase 0 Report was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14 Standard. The Phase 0 involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The County of San Bernardino is preparing the Valley Corridor Specific Plan to enable Bloomington to continue to preserve and protect its unique character, while also attracting development that generates economic vitality for the community. The current swing in economic recovery presents a great opportunity to transform Valley Boulevard, Bloomington's primary commercial corridor, to a more vibrant and livable space and a great environment for business. The proposed Specific Plan includes a strong health and wellness component that establishes a three-part strategy for active mobility, interconnected open spaces, and a network of food-oriented initiatives that encourage active lifestyles, entrepreneurship and access to nutrition. Implementation of the proposed Specific Plan is anticipated to provide a land use and policy framework to guide development that will allow new projects to be processed in a timely manner and reflect quality development

Our conclusions are intended to help the user evaluate *potential environmental concerns* in connection with a *property*, as defined in the ASTM E 1528-14 Standard (Standard) and discussed in the Introduction of this report. The purpose of this assessment was to evaluate Project Site history, existing observable conditions, current Project Site use, and current and historic uses of surrounding properties to identify potential environmental concerns in connection with the Project Site.

The term potential environmental means the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or a threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. (Note that "threat of release" is generally understood to be present when hazardous substances or petroleum products are poorly managed (for example in corroded tanks or damaged containers) but the release of the contaminants has not yet occurred, and there is an opportunity to take response action to prevent a release of the contaminants.

The purpose of this practice for conducting a *transaction screen* for a parcel of *commercial real estate* where the *user* wishes to conduct limited environmental *due diligence* (that is, less than a *Phase I Environmental Site Assessment*). An evaluation of business environmental risk associated with a parcel of *commercial real estate* may necessitate investigation beyond that identified in this practice.

This modified Phase 0 does not meet the "all appropriate inquiry" standards and should not be used for property transactions but only to evaluate potential environmental hazards at the Project Site. Each parcel

## 1. Introduction

should have a Phase I that evaluates thoroughly existing and historic land uses of that individual parcel prior to land transfer.

### 1.3 SITE DESCRIPTION

The Valley Corridor Specific Plan area consists of 355 acres that is oriented to a 1.25-mile corridor of Valley Boulevard between Bloomington's western boundary with Fontana (Alder Avenue) and eastern boundary with Rialto (Spruce Avenue). The Project Site includes properties fronting Valley Boulevard but also extends north to Marygold Avenue and south to Interstate 10 (I-10). Regional access to the Project Site is provided by I-10, Valley Boulevard, and Cedar Avenue. The Union Pacific Railroad traverses Bloomington just outside the Project Site, south and parallel to I-10. An aerial photograph of the Project Site is shown in Figure 3-2.

### 1.4 DETAILED SCOPE OF SERVICES

The purpose of this assessment is to evaluate Project Site history, existing observable conditions, current Project Site use, and current and historic uses of surrounding properties to evaluate the likelihood that hazardous materials may be present in soil beneath the Project Site as a result of on site or off site activities.

Our conclusions are intended to help the user evaluate *potential environmental concerns* in connection with a *property*, as defined in the ASTM E 1528-14 Standard (Standard) and discussed in the Introduction of this report. The purpose of this assessment was to evaluate Project Site history, existing observable conditions, current Project Site use, and current and historic uses of surrounding properties to identify potential environmental concerns in connection with the Project Site.

The term potential environmental means the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or a threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. (Note that "threat of release" is generally understood to be present when hazardous substances or petroleum products are poorly managed (for example in corroded tanks or damaged containers) but the release of the contaminants has not yet occurred, and there is an opportunity to take response action to prevent a release of the contaminants.

The purpose of this practice for conducting a *transaction screen* for a parcel of *commercial real estate* where the *user* wishes to conduct limited environmental *due diligence* (that is, less than a *Phase I Environmental Site Assessment*). An evaluation of business environmental risk associated with a parcel of *commercial real estate* may necessitate investigation beyond that identified in this practice.

PlaceWorks performed the following detailed scope of services to complete the Phase 0 in general accordance with ASTM E 1528-14:

- Visual observations of site conditions, and of abutting property use, to evaluate the nature and type of activities that have been or are being conducted at, and adjacent to, the Project Site, in terms of the potential for release or threat of release of hazardous substances or petroleum products.

## 1. Introduction

- Review of federal and state environmental database information within the ASTM- specified radii from the subject property using a database service to access records. Use of 7.5-minute topographic maps to evaluate the Project Site's physical setting.
- Review of federal and state environmental files pertaining to the Project Site and nearby sites with the potential to impact the Project Site.
- Review of the following sources of historical use information:
  - Aerial Photographs

Interpretation of information and data assembled as a result of the above work tasks, and formulation of conclusions regarding the potential presence and impact of potential environmental concerns.

### 1.4.1 Additions, Limitations and Exceptions

Considerations identified as beyond the scope of a Phase 0 Site Assessment that may affect business environmental risk as a property include the following: asbestos-containing materials (ACMs), radon, soil/ground water vapors, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, mold, health and safety issues, ecological resources, endangered species, indoor air quality, and high voltage power lines. These environmental issues may warrant assessment based on the type of property or transactions. However, they are considered non-scope issues under ASTM Practice E 1528-14.

Additional issues included in this Phase 0 include the following:

- A review of Division of Oil and Gas records;
- Prior usage of subject property for agricultural purposes, mining activities, illegal drug manufacturing and disposal, and U.S. Government ownership.

This Report was prepared pursuant to an Agreement between the County of San Bernardino and PlaceWorks. All uses of this Report are subject to, and deemed acceptance of, the conditions and restrictions contained in the Agreement. The observations and conclusions described in this Report are based solely on the Scope of Services provided pursuant to the Agreement. PlaceWorks has not performed any additional observations, investigations, studies or other testing not specified in the Agreement. PlaceWorks shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Agreement.

This Report is prepared for the exclusive use of the County of San Bernardino in connection with the Valley Corridor Specific Plan Project. There are no intended beneficiaries other than the County of San Bernardino. PlaceWorks shall owe no duty whatsoever to any other person or entity on account of the Agreement or the Report. Use of this Report by such other person or entity without the written authorization of the County

## 1. Introduction

of San Bernardino and PlaceWorks shall be at such other person's or entity's sole risk, and shall be without legal exposure or liability to PlaceWorks.

Use of this Report by any person or entity, including by the County of San Bernardino, for a purpose other than the Valley Corridor Specific Plan Project, is expressly prohibited unless such person or entity obtains written authorization from PlaceWorks indicating that the Report is adequate for such other use. Use of this Report by any person or entity for such other purpose without written authorization by PlaceWorks shall be at such person's or entity's sole risk and shall be without legal exposure or liability to PlaceWorks.

This Report reflects site conditions observed and described by records available to PlaceWorks as of the date of report preparation. The passage of time may result in significant changes in site conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the report. Accordingly, the County of San Bernardino and any other party to whom the report is provided recognize and agree that PlaceWorks shall bear no liability for deviations from observed conditions or available records after the time of report preparation.

Use of this Report by any person or entity in violation of the restrictions expressed in this Report shall be deemed and accepted by the user as conclusive evidence that such use and the reliance placed on this Report, or any portions thereof, is unreasonable, and that the user accepts full and exclusive responsibility and liability for any losses, damages or other liability which may result.

This assessment did not include testing of electrical equipment for the presence of polychlorinated biphenyls (PCBs) or the collection of other environmental samples such as water, air, soil, building materials, paint, and radon or methane gas. This assessment also did not include an extensive assessment for the potential damage from earthquakes, floods, landslides, etc.

PlaceWorks has completed this assessment in general conformance with ASTM E 1528-14. Exceptions were made to the ASTM work scope and this report is considered a Phase 0. Interviews with past and present land owners, operators and occupants were not made. PlaceWorks completed this modified assessment in general conformance with the ASTM E 1528-14 Standard and the assessment does not meet all requirements for the ASTM E 1528-14 Standard.

## 2. Site Description

---

### 2.1 SITE DESCRIPTION

#### 2.1.1.1 NAME OF SITE OPERATORS

The Project Site is currently developed with various commercial and industrial operations. Commercial operations include, but are not limited to various auto dealerships, auto and truck repair, restaurants, retail shops, storage facilities, single family residential, mobile home park, nursery, motels, churches, vacant land, park, post office, health centers, massage parlors and gas stations. There are parcels with residential property in the front and business operations consisting of automobile repair, storage and other operations in the back of the lots.

#### 2.1.1.2 SITE LOCATION

The Valley Corridor Specific Plan area is located in the unincorporated community of Bloomington in San Bernardino County, California. The Project Site is located in San Bernardino County at approximately 32.07° north latitude and 117.40° west longitude in portions of Sections 21 and 22 of Township 1 South, Range 5 West of the San Bernardino Base Line and Meridian. The northwest end of the Project Site (east of Alder Avenue) is located at 34.073° north latitude and 117.418° west longitude and the east end of the Project Site (intersection of Spruce Avenue and Valley Boulevard) is located at approximately 34.07° north latitude and 117.38° west longitude. The corridor extends approximately 1.75 miles from Alder Avenue on the west to Spruce Avenue on the east.

#### 2.1.2 Site and Vicinity Description

The Valley Corridor Specific Plan area consists of 355 acres that is oriented to a 1.25-mile corridor of Valley Boulevard between Bloomington's western boundary with Fontana (Alder Avenue) and eastern boundary with Rialto (Spruce Avenue). The Project Site includes properties fronting Valley Boulevard but also extends north to Marygold Avenue and south to Interstate 10 (I-10). Regional access to the Project Site is provided by I-10, Valley Boulevard, and Cedar Avenue. The Union Pacific Railroad traverses Bloomington just outside the Project Site, south and parallel to I-10. The Project Site is developed with various commercial and industrial operations. Commercial operations include, but are not limited to various auto dealerships, auto and truck repair, restaurants, retail shops, storage facilities, single family residential, mobile home park, nursery, motels, churches, vacant land, park, post office, health centers, massage parlors and gas stations. Many of the auto and truck repair facilities appear to have been at their current locations for decades based on the appearance of the structures.

The Project Site is an area with typical Mediterranean climate, characterized by warm dry summers and mild winters. The Western Regional Climate Center collected climatic data at Fontana Kaiser from 1951 to 1984.

## 2. Site Description

The mean temperature in the area ranges from a low of 44° Fahrenheit (°F) in the winter to a high of 95°F in the summer, though extremes of 20°F and 115°F have been recorded. The average annual precipitation is 15.32 inches per year.

## 3. Site History

---

### 3.1 PAST USAGE OF THE SITE

Past usage of the Project Site was assessed through a review of historical aerial photographs. Copies of historical references reviewed are included in Appendix A.

Based on a review of historical aerial photographs, the Project Site was a mixture of open space, residential and commercial development, and land developed for agricultural purposes (horse ranches and grass crops) from at least 1949 to about 1963. Warehouses for commercial and industrial uses were noted from 1953, but gradually multiplied until the Project Site was virtually built out by 1974.

#### 3.1.1 Aerial Photographs

Aerial photographs obtained from EDR for the years 1938, 1948, 1953, 1966, 1976, 1990, 1994, 2005, 2009, 2010 and 2012 were reviewed for the Project Site. Copies of the aerial photographs are included in Appendix A.

- **1938:** The Southern Pacific Railroad track is seen next to the southern boundary running in an east west direction. The majority of the Project Site is in agricultural use including rural residential uses on agricultural lots. Agricultural uses include orchards, row crops, and possibly grass crops. The Community of Bloomington is seen between Larch Avenue on the east and Magnolia on the west.
- **1948:** A highway is now seen on the north side of railroad adjacent to the southern boundary. The urbanized Community of Bloomington has expanded east to Spruce Avenue and west to Linden Avenue. Most of the Project Site west of Magnolia Street (south of Valley Boulevard) and Linden Avenue (north of Valley Boulevard) remains in agricultural (orchard and row-crop) use. A few scattered industrial or commercial uses are shown along the portion of Valley Boulevard west of Linden Avenue.
- **1953:** I-10 West is now seen along the southern boundary with the South Pacific Railroad tracks further south. Additional warehouses and residents are apparent on the southern portion of the Project Site along Valley Boulevard.
- **1966:** Agricultural land uses are reduced in the southern half of the Project Site and replaced by residential and commercial/industrial uses. A neighborhood shopping center is at the southeast corner of Linden Avenue and Valley Boulevard. An enlarged replacement bridge is under construction on Cedar Avenue over the I-10 and Southern Pacific Railroad.

## 4. Environmental Records Review

- **1976:** Limited agricultural uses remain north of Valley Boulevard. The Project Site is largely built out with urban uses. However, many parcels in the west half of the Project Site contain one to a few buildings on parcels of several acres each; thus, there is a substantial amount of vacant land on developed parcels. There are several mobile home communities south of Valley Boulevard. The West Colton Rail Yard is present south of the eastern part of the Project Site. Two large buildings – one commercial and one industrial – are just north of the east end of the site along the south side of Bloomington Avenue.
- **1990:** Some additional development is apparent including the large Public Storage located on the east side of Linden Avenue, and the Project Site is virtually built out.
- **1994:** Some additional development along the north side of Valley Boulevard is seen. The majority of the Project Site appears relatively unchanged in comparison to the previous aerial photograph.
- **2005:** Additional development has occurred near the intersection of Bloomington Avenue and Cedar. The majority of the Project Site appears relatively unchanged in comparison to the previous aerial photograph.
- **2010:** The Project Site appears relatively unchanged in comparison to the previous aerial photograph.
- **2012:** The Project Site appears relatively unchanged in comparison to the previous aerial photograph.

### 3.1.2 Historic Topographic Maps

Historic topographic maps were reviewed on the United State Geological Survey Historical Topographic Map Explorer website.

- **1896:** The Southern Pacific Railroad [now Union Pacific] is present next to the south site boundary. A few scattered buildings, and a network of roadways at approximately 0.25-mile intervals, are present in the east half of the Project Site. The west half of the site is completely vacant. No roadway is shown in the west half of the Project Site where Valley Boulevard is now.
- **1943:** The Ocean to Ocean Highway (US 70/US 99) [now Valley Boulevard] passes east-west through the center of the Project Site. A Pacific Electric railroad track passes northeast-southwest through the eastern part of the Project Site. Several dozen buildings are shown in the Community of Bloomington centered on US 70/99 between Larch Avenue on the east and Magnolia Street on the west. A few dozen buildings are shown in the west half of the site: most along US 70/99 and a few along Marygold Avenue and Taylor Avenue. The Southern Pacific Railroad is present next to the south site boundary.

## 4. Environmental Records Review

- **1953:** US 70/99 is now a four-lane highway along the south site boundary. The Ocean to Ocean Highway shown on the 1943 map is now Valley Boulevard. Portions of the Project Site – especially the part west of Locust Avenue and the southeast corner of the site – are shown in orchard use. The Community of Bloomington has expanded west two blocks to Linden Avenue, and the density of structures in the community has increased somewhat, compared to the 1943 map. The number of structures in the west half of the Project Site has increased somewhat since 1943; most structures are still along Valley Boulevard, Marygold Avenue, and Taylor Avenue. The Pacific Electric railroad track shown on the 1943 map is no longer apparent. Otherwise conditions are similar to those shown on the 1943 map.
- **1967:** The former US 70/99 is now I-10 and has been widened to eight lanes. Much of the northwest quadrant of the Project Site (northwest of Locust Avenue and Valley Boulevard) and part of the southeast corner of the site remain in orchard use. The Community of Bloomington is now urbanized from Spruce Avenue on the east to near Linden Avenue on the west. Trailer parks are shown south of Valley Boulevard between Linden Avenue and Locust Avenue. Otherwise conditions are similar to those on the 1953 map.
- **1980:** The site is essentially the same as in the 1967 topographic map.

### 3.1.3 Prior Agricultural Use

Based on the review of historical aerial photographs, isolated portions of the Project Site appear to have been used for agricultural purposes from at least 1938 to about 1976. The agricultural uses included orchards and row crops. Because agricultural operations ceased approximately 40 years ago, residual pesticides from historic agricultural use is not considered to be a potential environmental concern.

### 3.1.4 Mines

Based on the review of historical sources (aerial photographs and topographic maps) and the database search report, there is no evidence to indicate that the Project Site was ever utilized for mining operations.

### 3.1.5 Prior U.S. Government Ownership

Based on the historical aerial photographs and databases reviewed, the Project Site does not appear to have been previously owned by the U.S. Government.

## 4. Environmental Records Review

*This page intentionally left blank.*

## 4. Environmental Records Review

---

### 4.1 STANDARD ENVIRONMENTAL RECORDS REVIEW

PlaceWorks utilized the electronic database service EDR to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced Agency records, located within the project boundaries (complete listing is contained in Appendix B. Only properties listed within the Project Site are discussed in Phase 0, however, the database search identified sites outside the site boundaries.

Database Searched	Project Site Listed?	Number of Facilities Listed on Project Site
NPL sites	No	0
Delisted NPL sites	No	0
CERCLIS sites	No	0
CERCLIS-NFRAP sites	No	0
Federal ERNS	No	0
RCRA non-CORRACTS TSD Facilities	No	0
RCRA CORRACTS TSD Facilities	No	0
RCRA Generators	Yes	7
Federal Institutional/Engineering Controls	No	0
State/Tribal Equivalent NPL Sites	No	0
State/Tribal Equivalent CERCLIS Sites	No	0
State/Tribal Registered Storage Tanks	Yes	4
State/Tribal Landfills and Solid Waste Disposal Sites	No	0
State/Tribal Leaking Underground Storage Tanks	Yes	3
State/Tribal Institutional/Engineering Controls	No	0
State/Tribal Voluntary Cleanup Sites	No	0
State/Tribal Brownfield Sites	No	0
HAZNET	Yes	86
EMI	Yes	4
ERNS	Yes	1

A review of selected regulatory agency databases for documented environmental concerns on the site was conducted by EDR (a copy of the EDR DataMap Area Study dated August 5, 2015 is included in Appendix B).

The Project Site was identified on the following databases:

## 4. Environmental Records Review

Listing	Description	Potential Impact
RCRA – Small Quantity Generator	Seven facilities were identified within Project Site. No violations were listed. The facilities identified are dry cleaning facilities and automobile/truck repair facilities.	Yes Recommend Phase I/site inspection before any redevelopment.
Registered Storage Tanks	Four facilities were identified within the Project Site that have registered underground storage tanks. The facilities are all gas stations. In addition one of the gas stations had an aboveground storage tank.	Yes Recommend Phase I/site inspection before any redevelopment.
Leaking Underground Storage Tanks	Three LUST sites were identified within the Project Site that have all received regulatory closure.	Yes Recommend review of closure activities if land uses change.
HAZNET	86 HAZNET listings were identified related to the lawful manifested off-site disposal of hazardous waste.	None
EMI	Four facilities (3 dry cleaners and 1 inn) were listed as having pollutant emissions registered by South Coast Air Quality Management District.	None
ERNS	At 18855 Valley Blvd RC Auto Repair had a release of oil to the soil in 1993.	Yes Recommend review of closure activities if land uses change.

The EDR database search identified 71 historical auto stations/automobile repair facilities in the Project Site and vicinity. Not all sites identified in the database search were located within the Project Site. The database search also identified three historic dry cleaning facilities. These historic facilities may have the potential to have impacted the Project Site and a more thorough environmental assessment is recommended if land uses change.

### 4.1.1 RCRA Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are seven RCRA-SQG sites within the searched area.

- Artutros Tailor and Dry 19059 Valley Boulevard
- Bloomington Carburetor 18966 Valley Boulevard
- Valley Cleaners 18610 Valley Boulevard
- Trans American Express 18324 Valley Boulevard
- Laguna Equipment 17847 Valley Boulevard
- All Tune and Lube 17866 Valley Boulevard
- Felipe's Truck 17869 Taylor Avenue

## 4. Environmental Records Review

Prior to any redevelopment of these properties a Phase I and possibly Phase II Environmental Site Assessment are recommended due to the storage and generation of hazardous waste to evaluate if the chemicals were treated, stored, transported or disposed of properly.

### 4.1.2 Registered Storage Tanks

The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database. Tanks are often used to store heating fuels, chemicals, and petroleum products.

Four facilities were identified within the project area and the first facility listed below was also identified as having an aboveground storage tank.

- Mobil 18689 Valley Boulevard (AST and USTs)
- ARCO AM/PM # 5997 18762 Valley Boulevard
- Bloomington Texaco 18509 Valley Boulevard
- Chevron Station #864 18745 Valley Boulevard

Prior to any redevelopment of these properties a Phase I and possibly Phase II Environmental Site Assessment are recommended due to the storage of petroleum products to evaluate if they were stored properly and that no leaks or other releases occurred.

### 4.1.3 Leaking Underground Storage Tanks

The State Water Resources Control Board Leaking Underground Storage Tank Information System contains an inventory of Leaking Underground Storage Tank (LUST) Incident Reports. A review of the data base report identified three facilities within the project area.

- Merit Oil Company 10065 Alder Avenue
- Chevron 18745 Valley Boulevard
- Central Valley Fire District Station #76 10174 Magnolia Street

All three facilities received regulatory closure under the oversight of the local county CUPA programs. Prior to redevelopment it is recommended that a Phase I and possibly a Phase II Environmental Site Assessment be implemented to evaluate if the closure was based on an unrestricted land use or if closure was based on the assumption that land use would not change.

### 4.1.4 HAZNET

The data is extracted from the copies of hazardous waste manifests received each year by the DTSC for the lawful disposal and transport of hazardous materials from the site. Eighty-six listings were identified for the project area. Having a listing on the HAZNET site is not an indication that a release may have occurred to the environment and no further assessment is recommended based on the HAZNET listing.

## 4. Environmental Records Review

### 4.1.5 EMI

EMI is the Emission Inventory Database for toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies. Four facilities (3 dry cleaners and 1 inn) were listed as having pollutant emissions registered by South Coast Air Quality Management District. Having a listing on the EMI database is not an indication that a release has occurred and no further assessment is recommend based on the EMI listing.

### 4.1.6 ERNS

The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The list is maintained by the National Response Center United States Coast Guard.

RC Auto Repair located at 18855 Valley Boulevard was listed on the ERNS database for reporting a release of waste oil to soil in February 1993. The database does not indicate that any action was implemented at the site. A Phase I and possibly Phase II Environmental Site Assessment are recommended to evaluate the site prior to any redevelopment activities.

## 4.2 STATE OF CALIFORNIA DIVISION OF OIL AND GAS RECORDS

A review of California Division of Oil, Gas and Geothermal Resources records was conducted. No producing oil or gas wells were identified within a half mile radius of the Project Site.

## 5. Site Reconnaissance and Key Personnel Interview(s)

---

A site visit to observe site conditions was conducted by Denise Clendening of PlaceWorks on September 1, 2015. PlaceWorks personnel observed the exterior portions of the Project Site, including the boundaries. No weather-related conditions or other conditions that would limit our ability to observe the site occurred during our site reconnaissance. Site photographs are included in Appendix C.

### 5.1 SITE VISIT OBSERVATIONS

The Project Site consists of an array of various commercial and industrial operations. Commercial operations include, but are not limited to various restaurants, retail shops, dry cleaners, auto dealerships, gas stations, automobile repair, storage and a park. A few single-family residential dwellings, apartment complexes and mobile home/recreational vehicle parks exist within the Project Site boundaries. Numerous vehicle repair facilities were located in commercial shops and also in fenced off areas behind other buildings and in back yards of residential properties. Waste disposal practices at some facilities that could be observed from the fence lines appeared to have resulted in some staining of soil. Some facilities had vehicle lifts and it was not determined if they had underground tanks for hydraulic fluid. Sheds and storage areas were observed near vehicle repair facilities that may have chemicals or petroleum products stored. Many of the auto and truck repair facilities appear to have been at their current locations for decades based on the appearance of the structures, prior to environmental regulations and guidance on the disposal and storage of hazardous waste, chemicals and petroleum products.

For this assessment the interiors of the buildings were not inspected. Exteriors were reviewed from the street only. There were numerous pad and pole mounted transformers within the Project Site that were not assessed to evaluate if they were non-PCB containing.

### 5.2 INTERVIEWS

Interviews with property owners were not conducted for this assessment.

## 5. Site Reconnaissance and Key Personnel Interview(s)

*This page intentionally left blank.*

## 6. Findings and Conclusions

---

PlaceWorks has performed a modified Phase 0 Site Assessment Report (Phase 0) on behalf of the County of San Bernardino (City), for the Valley Corridor Specific Plan project in the County of San Bernardino, San Bernardino County, California. This Phase 0 was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14 Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process. Exceptions to, or deletions from, this practice are described in Section 1 of this report. The Phase 0 involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The purpose of the assessment was to evaluate the likelihood that hazardous materials may be present in soil beneath the Project Site as a result of on site or off site activities.

Our conclusions are intended to help the user evaluate *potential environmental concerns* in connection with a *property*, as defined in the ASTM E 1528-14 Standard (Standard) and discussed in the Introduction of this report. The purpose of this assessment was to evaluate Project Site history, existing observable conditions, current Project Site use, and current and historic uses of surrounding properties to identify potential environmental concerns in connection with the Project Site.

The term potential environmental means the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or a threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. (Note that “threat of release” is generally understood to be present when hazardous substances or petroleum products are poorly managed (for example in corroded tanks or damaged containers) but the release of the contaminants has not yet occurred, and there is an opportunity to take response action to prevent a release of the contaminants.

The purpose of this practice for conducting a *transaction screen* for a parcel of *commercial real estate* where the *user* wishes to conduct limited environmental *due diligence* (that is, less than a *Phase I Environmental Site Assessment*). An evaluation of business environmental risk associated with a parcel of *commercial real estate* may necessitate investigation beyond that identified in this practice.

### 6.1 POTENTIAL ENVIRONMENTAL CONCERNS

The goal of the assessment is to identify potential environmental concerns, as defined in the Standard and in Section 1 of this report. This assessment has revealed the following potential environmental concerns:

- Numerous automobile repair facilities currently operate and historically operated within the Project Site. Each facility may have sumps, drains, hydraulic lifts, parts washer, and chemical storage areas

## 6. Findings and Conclusions

that will need to be evaluated if land uses change. Past waste disposal practices should be examined because these may have resulted in hazardous substances being released on the property. Many of the auto and truck repair facilities appear to have been at their current locations for decades based on the appearance of the structures, prior to environmental regulations and guidance on the disposal and storage of hazardous waste, chemicals and petroleum products.

- Four facilities were identified with registered underground storage tanks and one above ground storage tank. The potential exists for there to have been leaks or releases to the soil.
- Three facilities were identified with leaking underground storage tanks. All facilities received regulatory closure, however, if land uses change the sites need to be reevaluated based on planned future land uses.
- Seven facilities, automobile repair and dry cleaners were identified as being RCRA Small Quantity Generators. The storage and generation of hazardous material has the potential to impact the project site.
- Seventy-one historic automobile stations/automobile repair facilities were identified within or adjacent to the Project Site. These facilities had the potential to impact the Project Site and if land uses change an evaluation if releases had occurred is recommended.

### 6.2 SUMMARY

Based on the results of this Phase 0, several potential environmental concerns were identified in connection with the Project Site. Review of available historical aerial photographs and the environmental database has revealed numerous properties within the Project Site boundaries that could have historically posed a variety of environmental hazards. Many of the auto and truck repair facilities located with the Project Site appear to have been at their current locations for decades based on the appearance of the structures, prior to environmental regulations and guidance on the disposal and storage of hazardous waste, chemicals and petroleum products.

PlaceWorks recommends a site-specific Phase I Environmental Site Assessment (Phase I) be conducted for any proposed sub-divided parcel that includes any of the sites included on the RCRA Generator, UST, LUST, dry cleaners or historic automobile station/repair facility lists, or is located within a 1/4-mile of any of the LUST-listed sites. Many of the current automobile repair facilities were not listed on the databases and a Phase I is recommended to inspect the site for recognized environmental conditions.

Observation should be made during any future Project Site development for areas of possible contamination such as, but not limited to, the presence of buried debris, waste drums, and stained soil. Should such materials be encountered, further investigation and analysis may be necessary at that time.

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. ### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<b>SO PACIFIC TRANS CO</b>	<b>19100 SLOVER AVE</b>	<b>62</b>	<b>282</b>

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 8 RCRA-SQG sites within the searched area.

## EXECUTIVE SUMMARY

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 7 RCRA NonGen / NLR sites within the searched area.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2013 has revealed that there are 90 HAZNET sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there are 6 ENVIROSTOR sites within the searched area.

## EXECUTIVE SUMMARY

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<i>GENE BELK FRUIT PACK</i>	<i>10380 ALDER</i>	<i>60</i>	<i>220</i>

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 07/13/2015 has revealed that there is 1 HWT site within the searched area.

### **EDR PROPRIETARY RECORDS**

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 71 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within the searched area.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**FINDS:**

Registry ID: 110012191190

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110002724918

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:	<p>1. In April 1999, Gene Belk Fruit Packers (GBFP) completed capping the salt-affected areas at the facility per Cleanup &amp; Abatement Order No. 97-64. 2. On August 18, 1999, Monitoring &amp; Reporting Program No. 99-62 was adopted to replace Monitoring &amp; Reporting Program No. 75-182. M&amp;RP No. 99-62 requires 3. GBFP to conduct quarterly cap inspection and submit annual reports by Oct. 1 to the Regional Board. 4. The deed restrictions for the capped area was recorded with the San Bernardino County on 07/07/2001. 5. GBFP achieved full compliance with CAO No. 97-64 in April 2003. On July 1, 2003, the Board adopted Order No. R8-2003-0078, which rescinded CAO No. 97-64. 6. On July 15, 2011, the Regional Board adopted Order No. R8-2011-0032, which rescinded Order No. 75-182 and M&amp;RP No. 99-62. GBFP is no longer required to submit annual cap maintenance reports to the Regional Board. However, GBFP is obligated to maintain the brine pond closure cap in accordance with the recorded deed restrictions.</p>

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## FEDERAL RECORDS

### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 07/09/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 10/19/2015
	Data Release Frequency: Quarterly

### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 07/09/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 10/19/2015
	Data Release Frequency: Quarterly

### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

	Data Release Frequency: No Update Planned

## CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/07/2015
	Data Release Frequency: Quarterly

## CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/07/2015
	Data Release Frequency: Quarterly

## LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/18/2014	Telephone: 202-564-6023
Date Made Active in Reports: 04/24/2014	Last EDR Contact: 07/22/2015
Number of Days to Update: 37	Next Scheduled EDR Contact: 11/09/2015
	Data Release Frequency: Varies

## CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/10/2015	Source: EPA
Date Data Arrived at EDR: 03/31/2015	Telephone: 800-424-9346
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 06/26/2015
Number of Days to Update: 72	Next Scheduled EDR Contact: 10/12/2015
	Data Release Frequency: Quarterly

## RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Number of Days to Update: 42	Next Scheduled EDR Contact: 11/16/2015
	Data Release Frequency: Varies

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/23/2015

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: No Update Planned

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/08/2015  
Date Data Arrived at EDR: 06/09/2015

Data Release Frequency: Varies

## RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 05/04/2015  
Date Data Arrived at EDR: 05/05/2015  
Date Made Active in Reports: 05/14/2015  
Number of Days to Update: 9

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 08/04/2015  
Next Scheduled EDR Contact: 11/16/2015  
Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 05/04/2015

## EDR PROPRIETARY RECORDS

### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.
Date Data Arrived at EDR: N/A	Telephone: N/A
Date Made Active in Reports: N/A	Last EDR Contact: N/A
Number of Days to Update: N/A	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

**California Earthquake Fault Lines:** The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

**Section 1: Facility Summary . . . . . Page 3**

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

**Section 2: Facility Detail Reports . . . . . Page 4**

All available detailed information from databases where sites are identified.

**Section 3: Databases and Update Information. . . . . Page 5**

Name, source, update dates, contact phone number and description of each of the databases for this report.

***Thank you for your business.***

# SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1
<b>AREA</b>	18855 VALLEY BLVD BLOOMINGTON, CA 92316 EDR ID #93307815
<b>WASTE MANAGEMENT</b> Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSD)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility is a FUSRAP Site	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	<b>YES - p4</b>
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
<b>WASTE DISPOSAL</b> Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
<b>MULTIMEDIA</b> Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in other database records (OTHER)	NO
<b>POTENTIAL SUPERFUND LIABILITY</b> Facility has a list of potentially responsible parties PRP	NO
<b>TOTAL (YES)</b>	<b>1</b>

## SECTION 2: FACILITY DETAIL REPORTS

### WASTE MANAGEMENT

Facility has reported emergency releases to the soil

**DATABASE: Emergency Response Notification System (ERNS)**
