Please be advised that the County of San Bernardino, Department of Public Health, Division of Environmental Health (LEA) received and approved a Report of Facility Information (RFI) amendment to the Solid Waste Facility Permit for the West Valley Material Recovery Facility. The LEA is certified by the California Integrated Waste Management Board to enforce state laws and regulations at solid waste sites within the County of San Bernardino, including all active and closed landfills.

Description of Project and LEA's Preliminary Determination

The West Valley Recovery Material Facility is located at 13373 Napa Street, Fontana, CA 92335. On December 26, 2013 the LEA received, from the operator of West Valley Material Recovery Facility, a Solid Waste Facility Permit (SWFP) application package to amend the Transfer Processing Report (TPR) to add, to Chapter II of the TPR, text regarding the storage location of oversized inerts and the temporary storage location of hazardous material in the material recovery facility building. No other changes to the SWFP are under consideration at this time. The LEA finds that the proposed change is consistent with all applicable certified and/or adopted CEQA documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current solid waste facilities permit. The LEA approved the amendment on January 24, 2014.
