ACTION: 03 - REINSPECTION REQUIRED				

**MOSQUITO AND VECTOR CONTROL - Poultry Ranch Permit ALL**

**No Violations Cited**

**Overall Inspection Comments**

Adult population light to moderate. Ranch started frequent clean out this week. They have 4 houses left to clean. Ranch has improved with the clean out. Larval breeding is moderate to heavy. They spot treated this morning can see they pesticide is working. Ranch has fixed the leaking cups. Ranch has few wet spots in each house. Sabino was going to have the ranch hands turn the manure. Recc to him to have them remove the coffee brown spots instead and not turn the manure since manure is drying out and there is only a few spots that need to be addressed. Rec for him to fill the spots back in with dry manure. Manure is piled on the south side of the property it will be pick up tomorrow. Found one spot along the edge with breeding Sabino will spray it again today. Rest of the piles are dry and no breeding. Ranch is spraying 2 x a day with t100 and ravap. Ranch is spot treating with triaziside and using lyme to help dry the manure out. Ranch to continue with spraying 2 x a day, spot treating and removing the wet manure.
