MOSQUITO AND VECTOR CONTROL - POULTRY RANCH PERMIT ALL

Based on an inspection this day, the items marked below identify the violation(s) in operation or facilities which must be corrected. The Permittee has the right to a hearing if requested in writing within 15 calendar days of receipt of this notice, to show cause why the permit to operate should not be suspended or revoked.

Failure to correct listed violation(s) prior to the designated compliance date may necessitate an additional reinspection at a charge of \$104.00/hour.

Inspection Violations

No violations cited.

Overall Inspection Comments

Inspection found:

Adult fly population light outside of houses with moderate to heavy population within houses 0 and 5, and inside of egg room.

Routine adulticide fogging daily. No log of recent IGR or larvicide applications observed.

No active watering system leaks observed.

Manure in house 0 is drying and coning well with no active breeding observed.

Manure in house 5 is very wet. House is holding brown birds. Minimal breeding both Musca and Fannia observed.

No violations observed at this time.

Recommend:

Neporex/ IGR application to wet manure in house 5 to control breeding.
