NOTICE OF INTENT TO APPLY PUBLIC HEALTH PESTICIDES FOR VECTOR CONTROL PURPOSES TO SURFACE WATERS AND WATERS OF THE U.S. WITHIN SAN BERNARDINO COUNTY, CA

1. The San Bernardino County Mosquito and Vector Control Program (MVCP) intends to apply public health pesticide to, over and adjacent to ditches, canals or other conveyance facilities owned and controlled by an entity other than MVCP as well as surface waters and waters of the U.S. for vector control purposes per the requirements of the General NPDES Permit for Biological and Residual Pesticide Discharge for Vector Control Applications (the permit) issued by the State Water Resource Control Board (SWRCB).
2. The NPDES Permit requirements for listing of the Public Health Pesticides anticipated to be used were modified from the previous permit, to the new permit which will be issued in 2017. The newer requirements specify that any pesticide product can be used that contains approved active ingredients, provided all pesticide label restrictions and instructions are followed. In addition, pesticides which fall under the "minimum risk" category can be used. The minimum risk pesticides have been exempted from Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requirements. The following tables list the active ingredients approved for the FIFRA regulated pesticides.
