January 2012

MEMORANDUM

DATE: January 16, 2012 **PROJECT NO.** 1052.00

TO: Jan Dustin, Project Manager, Redevelopment Agency of the County of San Bernardino

FROM: Michael Perry, Program Manager - Environmental Studies, Lilburn Corporation 

SUBJECT: Addendum to the Bloomington Phase I ESA

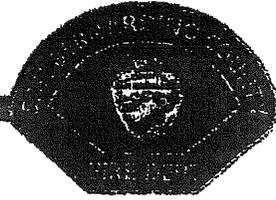

On January 5, 2012, Lilburn Corporation completed a Phase I Environmental Site Assessment to evaluate potential environmental impairments on two adjoining parcels (APN No. 0252-051-69 and 0252-051-70) on approximately 8.75 acres, located at 17970 and 18028 Valley Boulevard, Bloomington, in the County of San Bernardino, California. As of January 5, 2012, the San Bernardino County Fire Department, Office of Fire Marshal, Hazardous Material Division had not responded to our inquiries relating to historical records maintained by that department relating to hazardous waste permits, spills or incidents occurring on the subject property.

On January 6, 2012, correspondence was received from the San Bernardino County Fire Department, Office of Fire Marshal, Hazardous Material Division addressing our initial inquiry for records pertaining to the subject properties. Specifically, the correspondence received acknowledged that no records were found that identify the subject properties (Assessor Parcel No.0252-051-69, and 70) as being part of the Office of Fire Marshal, Hazardous Material Division data base.

Therefore, the conclusions contained on page 27 of the January 5, 2012, Phase I Environmental Site Assessment are reaffirmed in that local records reviewed have not revealed environmental concerns or issues that would be considered an immediate impairment to property development. However all other conclusions contained within the Phase I Environmental Site Assessment remain unchanged.

**SUBJECT: CERTIFIED RECORD SEARCH FINDINGS
RE: ASSESSOR PARCEL NO. 0252-051-69, -70
INCL. 18028 VALLEY BLVD & ADJACENT (WEST) LOT
BLOOMINGTON, CALIFORNIA**

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds no records exist for the above site description(s).

Records maintained by OFM-HMD date back to early 1980's. Records searched include:

- facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions;
- logs of permits issued for the removal, installation, and/or modification of underground storage tanks;
- records and databases pertaining to illicit dumping, spill reports and release notifications, and complaints;
- incidents responded to by the hazardous materials emergency response team;
- and sites undergoing remediation for contaminated soil and/or groundwater.

NOTE: A record exists for Assessor Parcel No. 0252-051-66, a small parcel between the two subject parcels with address 18010 Valley Blvd. The file for this record, Hector's Body Shop, is very small and consists of paperwork only related to permit billing. No record of inspection or hazardous material business plan inventory exists in this file.

1.0 INTRODUCTION

This Environmental Site Assessment (ESA) is prepared for the review of two adjoining parcels (parcels 0252-051-69 and 0252-051-70) on approximately 8.75 acres, located at 17970 and 18028 Valley Boulevard, Bloomington, in the County of San Bernardino, California. Refer to Figures 1 and 2 for a Regional Location Map and Vicinity Map, respectively. Parcel 69 consists of a contractor's storage yard. Parcel 70 is currently vacant. The ESA examines the existing environmental conditions in the vicinity of the subject site and surrounding land uses that may pose environmental concerns.

The purpose of this Phase I Environmental Site Assessment is to assess historical uses that may have affected the subject site specifically relating to the presence or likely presence of hazardous materials. This report includes any observed potential impacts to the site that may have altered the site's ecology, environment, functional use, or economic value. Visual observations and inquiry into public records are documented; no documents related to the placement of water pipelines, gas mains or other infrastructure were reviewed. No testing of soil, air, water or any other matter was conducted to render a technical opinion except where mentioned in this report.

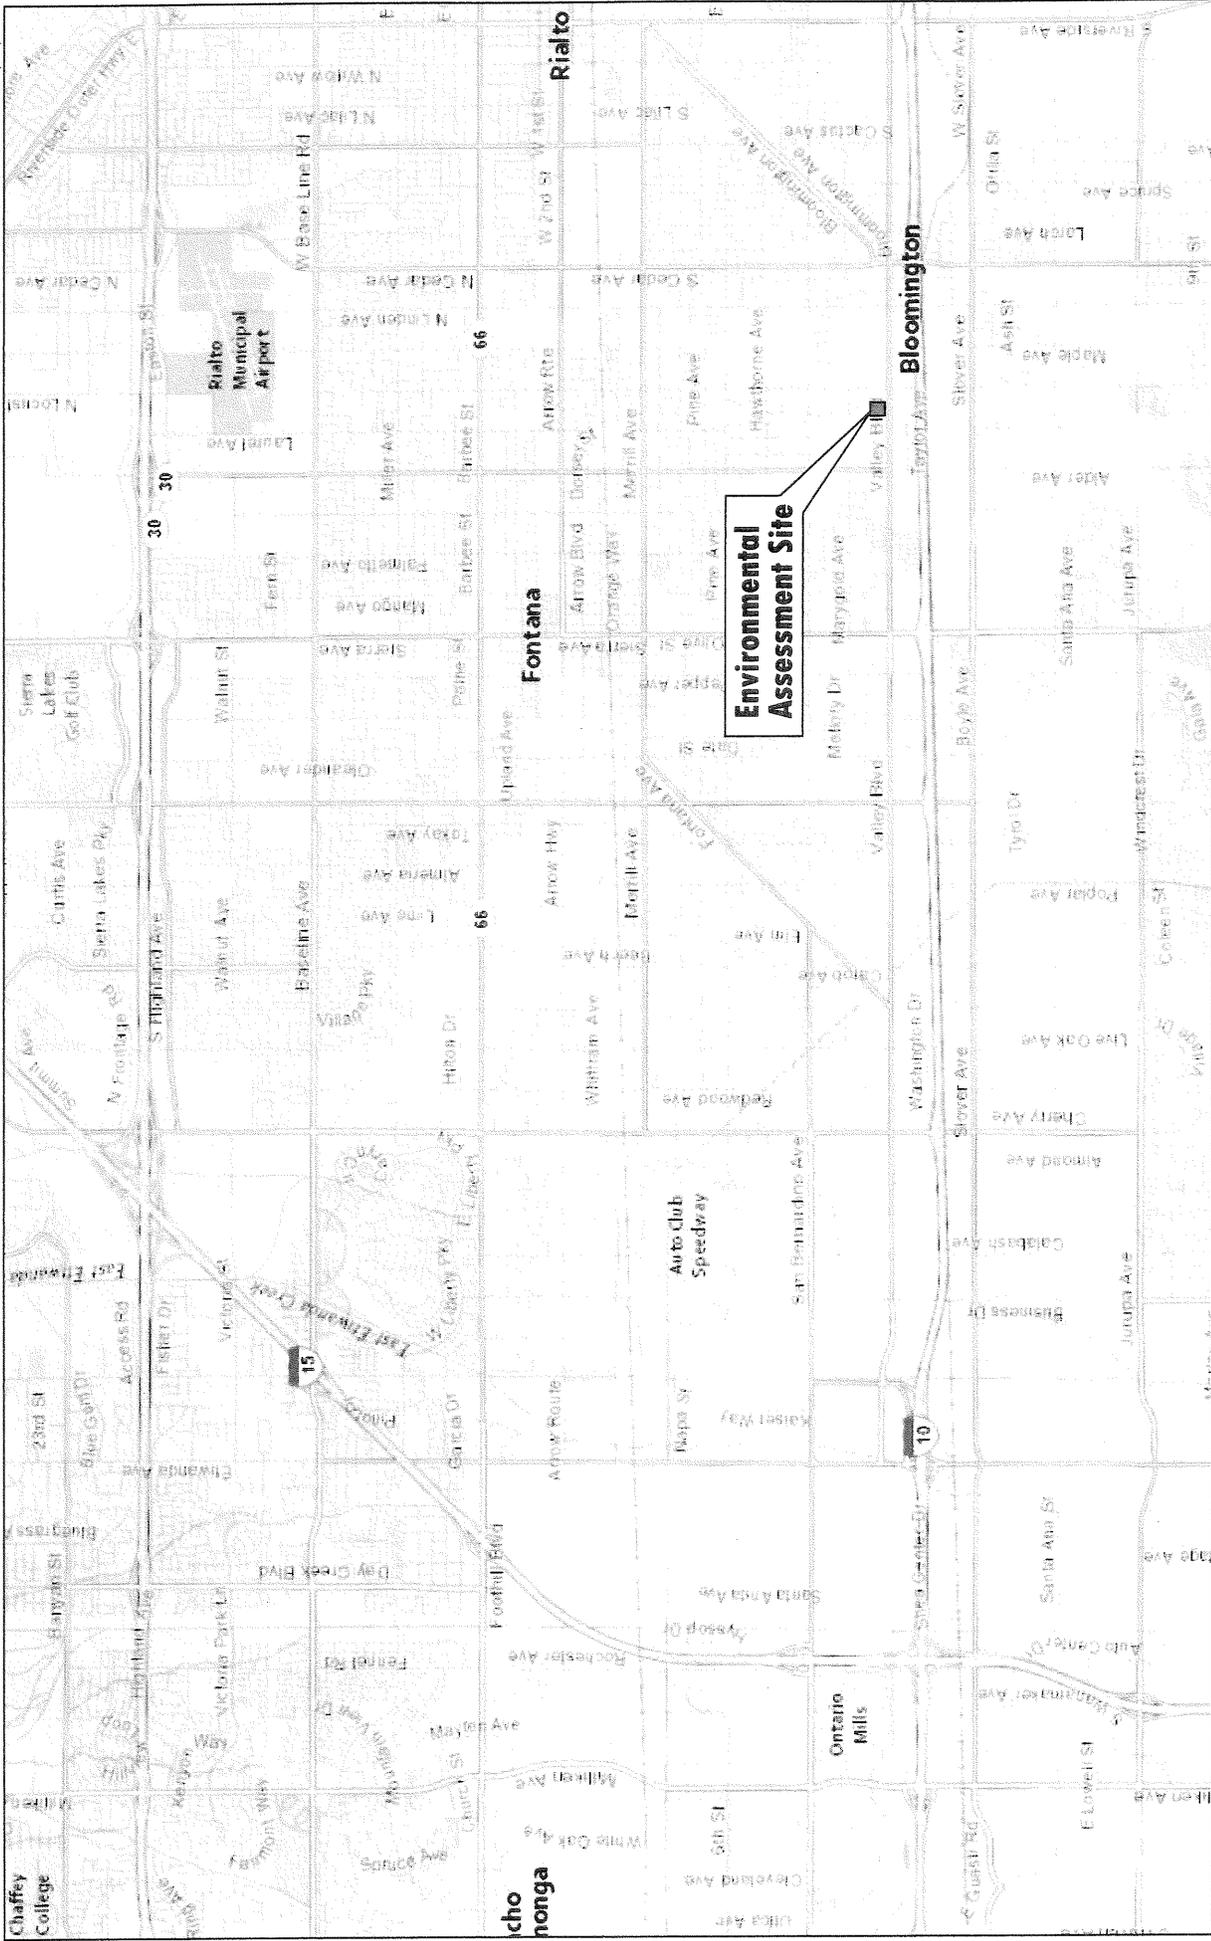

Standard Practice for Environmental Site Assessment Process (ASTM). ASTM Designation E 1527-05: This environmental assessment follows the guidelines established by the American Society for Testing and Materials Standard Practice Manual for the *Phase I Environmental Site Assessment* process.

The objective of this ESA is to evaluate the subject site for current and historical sources of environmental concerns, evidence of hazardous substance disposal or releases from or onto the subject site, evidence of environmental threats from adjacent properties, and whether further environmental testing of the site is warranted. This report meets *ASTM Standards for ESA's*.

To meet these objectives, Lilburn Corporation performed the following tasks:

- Reviewed available environmental reports.
- Reviewed historic land use records and files.
- Reviewed pertinent regulatory agency documents.
- Reviewed available current and historical aerial photographs of the site and adjacent properties.
- Performed a reconnaissance of adjacent and immediately surrounding properties.
- Performed an on-site reconnaissance of the property.
- Prepared this report.

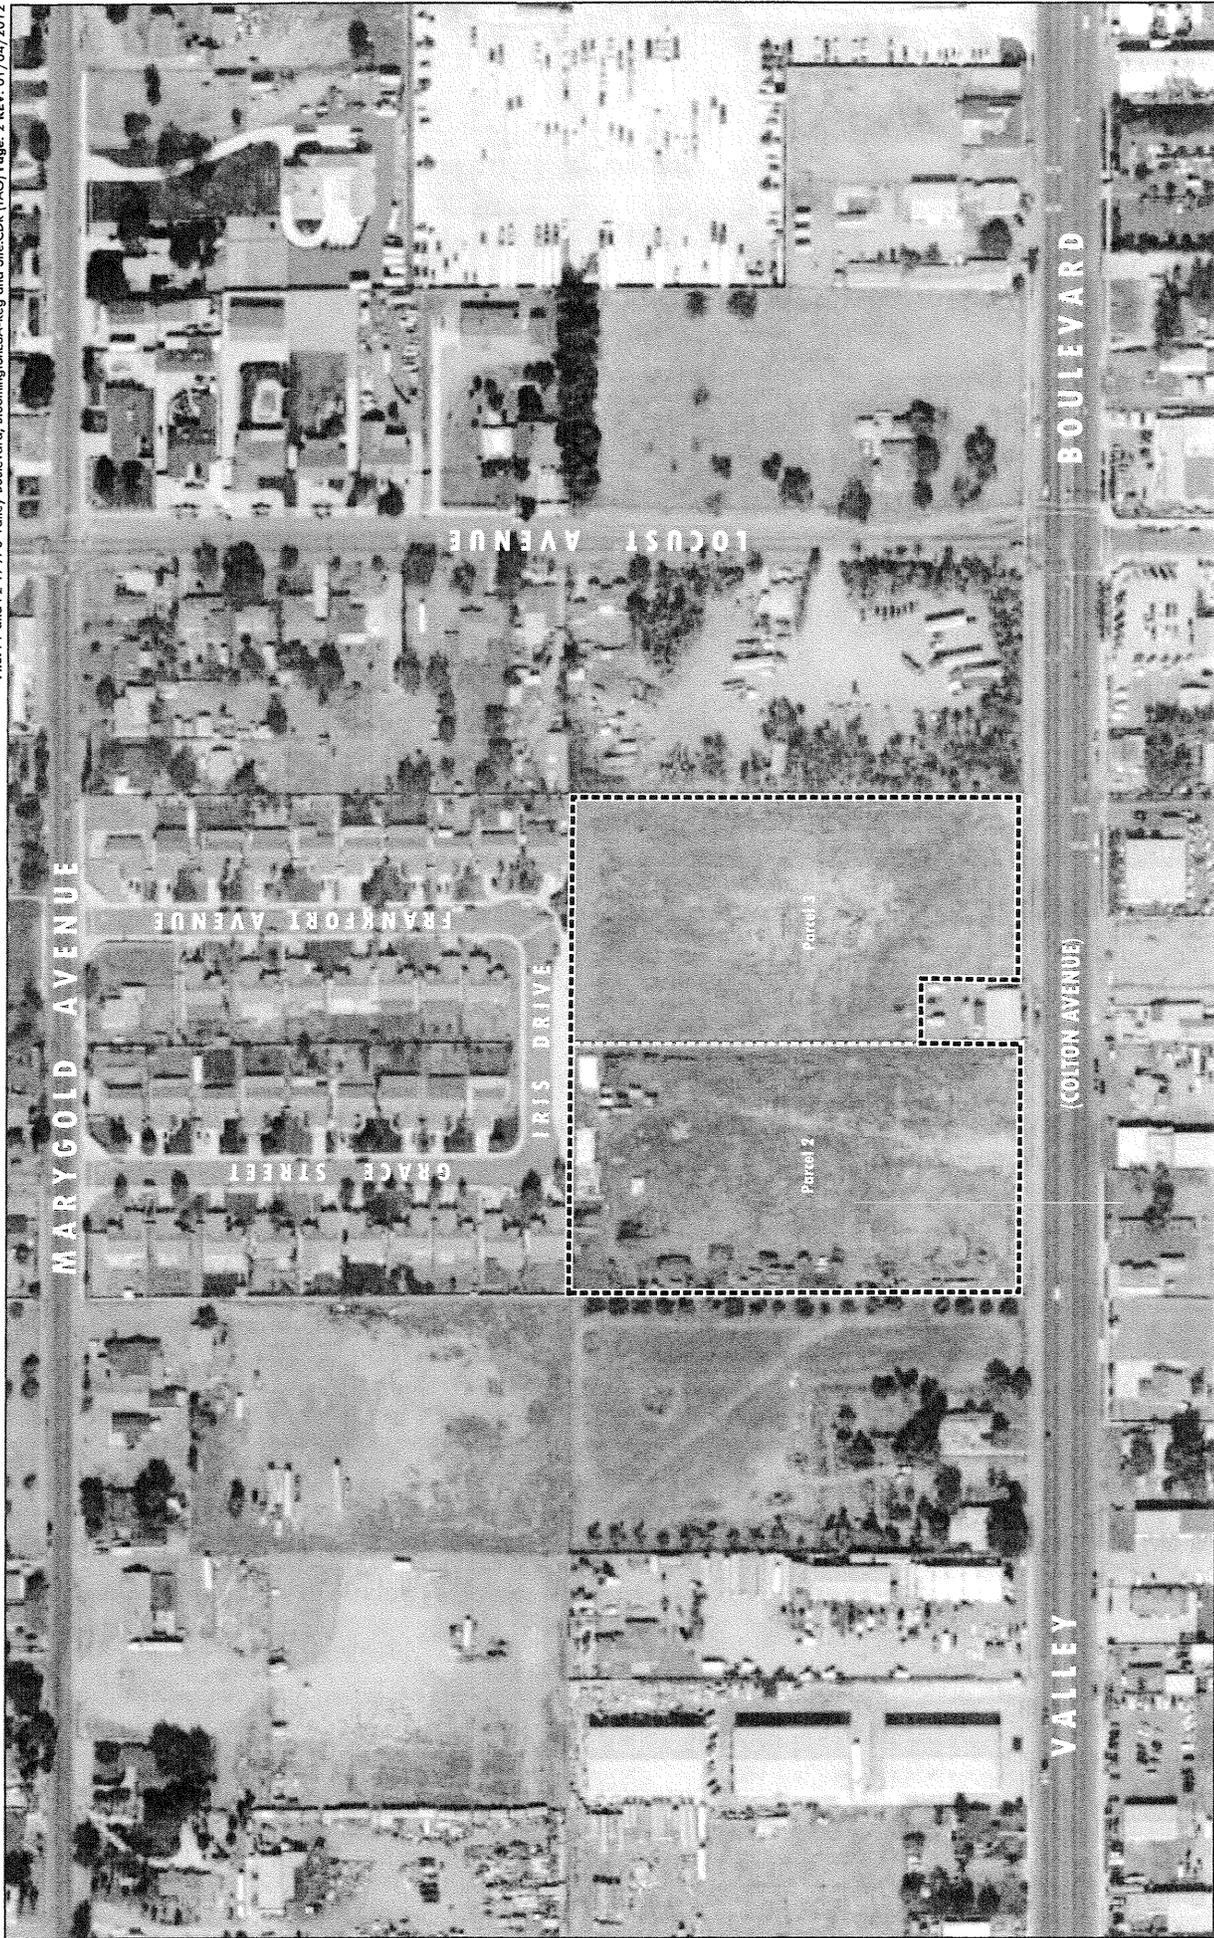

Results of this Environmental Site Assessment for the site located in the unincorporated community of Bloomington in the County of San Bernardino, California are presented in the following Sections 2.0 – 7.0.

LILBURN
CORPORATION

17970 Valley Boulevard, Bloomington - Phase I ESA
San Bernardino County, California

FIGURE 2

2.0 SITE LOCATION

The subject site herein referred to as "site, subject site" or "property" is being evaluated at the request of the County of San Bernardino, Redevelopment Agency. The property consists of two parcels totaling approximately 8.75 acres located at 17970 and 18028 Valley Boulevard in Bloomington.

The geographical location of the site is as follows:

Elevation: 1,118 feet above sea level

Latitude: 34° 4' 17''

Longitude: 117° 24' 42''

Assessor's Parcel Numbers:

0252-051-69 and 70

The subject site boundaries are within the USGS Topographic Map: Fontana 7.5-minute series, Section 21, T1S, R5W, San Bernardino Base and Meridian.

2.1 DESCRIPTION OF SURROUNDING AREA

The property is predominately surrounded by mixed commercial, industrial, and residential land uses and vacant properties. Existing surrounding land uses consist of commercial and industrial uses to the south and east, and residential and undeveloped land to the north and west. The parcels surround three sides of a parcel developed as a commercial use (pet shop). Valley Boulevard is adjacent to the south of the site. The subject site is vacant of structures.

2.2 REVIEW OF HISTORIC PHOTOGRAPHS

Aerial photographs available show the subject site and surrounding land uses for the following years: 1938, 1953, 1966, 1977, 1990, 1994, and 2005. The aerial photographs were taken at different altitudes, causing a scale variation between the different photographs and years. The subject site is marked on each photograph to show an approximate location. Refer to Appendix A for the aerial photographs reviewed.

The following is a summary of the photograph observations for the corresponding years when the photographs were taken. The observations describe the land uses on-site and in the vicinity.

- The 1938 aerial photograph shows the subject site and vicinity as farmland. A single family residence is located on APN 0252-051-69. Valley Boulevard is evident.
- The 1953 aerial photograph shows significant changes from the 1938 aerial photograph due to increased development in the vicinity. Half of APN 0252-051-70 has been cleared and is no longer being used as farmland. A single family residence has been developed adjacent to the site, west. APN 0252-051-69 is unchanged.

- The 1966 aerial photograph shows significant changes from the 1953 aerial photograph. Adjacent properties have either been developed or the properties have been disturbed as clearing is evident and/or weed abatement. The project site is unchanged.
- The 1977 aerial photograph shows no significant changes from the 1966 aerial photograph. The subject site is unchanged.
- The 1990 aerial photograph shows significant changes from the 1977 aerial photograph. APN 0252-051-69 appears to have stored trailers and/or train carts. Parcel APN 0252-051-70 is unchanged.
- The 1994 aerial photograph shows significant changes from the 1990 aerial photograph. APN 0252-051-69 has been cleared and the stored trailers and/or train carts have been removed. APN 0252-051-70 is unchanged
- The 2005 aerial photograph shows changes from the 1994 aerial photograph. The residence on APN 0252-051-69 has been removed and trailers and/or train carts occupy the southern portion of the parcel. APN 0252-051-70 is unchanged and remains vacant.

2.3 HISTORIC UNITED STATES GEOLOGICAL SURVEY (USGS) MAPS

Available historic and current USGS maps that include the subject site and surrounding area were reviewed for the years 1901, 1942, 1954, 1967, 1973, 1975 and 1980. Refer to Appendix B for the topographic maps reviewed. The subject site is located on the San Bernardino North USGS Quadrangle. A summary of the review of the maps are discussed herein.

- The 1901 USGS map of the area shows the entire region as primarily undeveloped land.
- The 1942 USGS map of the area shows the site used as farming land. A structure is evident on the southern portion of the site.
- The 1954 USGS map of the area shows significant changes compared to the 1942 map. Increased development is evident throughout the vicinity. The structure that was located on the southern portion of APN 0252-051-70 is not mapped. A structure is evident adjacent to APN 0252-051-70, east. A structure is evident on APN 0252-051-69.
- The 1967 USGS map of the area shows no significant changes compared to the 1954 map. Urban development is apparent throughout the vicinity. The site is unchanged.
- The 1973 USGS map of the area shows no significant changes compared to the 1967 map. Urban development is apparent throughout the vicinity. The site is unchanged.
- The 1975 USGS map of the area shows no significant changes compared to the 1973 map. The site is unchanged.
- The 1980 USGS map of the area shows no significant changes compared to the 1975 map. The site is unchanged.

None of the USGS Maps reviewed show any development of railroad tracks, utility easements, or bridges on the subject property.

3.0 SITE VISIT

Summary: No significant areas of concern were observed during the site inspection conducted on December 22, 2011. However, a small approximate 3-foot by-3 foot patch of stained soil observed on the APN 0252-051-69 property should be over excavated and removed in accordance with contaminated soil regulations prior to property development. Both properties appeared to be well maintained with no evidence of underground storage tanks or building foundations. Weed abatement activities have occurred and the sites were relatively clear of vegetation. Refer to photographs in Appendix C which depict the sites.

3.1 PROPERTY EVALUATION

On-Site Observations

Mr. Michael Perry of Lilburn Corporation conducted a site survey/property evaluation on December 22, 2011. Each parcel was evaluated and surveyed and is identified separately by APN number.

APN 0252-051-70 - 18028 Valley Boulevard, Bloomington CA

Access to this parcel is restricted by a chain link fence along Valley Boulevard. Mr. Park the current owner was present to unlock the front gate. The approximate 4.25-acre site is vacant and level. Weed abatement activities have occurred as the on-site grasses and weeds were minimal. The property is securely fenced on all sides and according to the owner the fencing was installed recently in an effort to prepare the property for development. The property was clean and devoid of trees. Two small rubble piles are located in the southwest corner of the site and are reportedly left over rubble from construction of the block-wall fence along the site's western boundary.

No structures or remnants of foundation were visible. No discoloration of soils was evident and no remnants of underground storage tanks were observed during the visual site inspection. Surrounding land uses consist primarily of commercial and residential uses. Refer to photographs in Appendix C which depict the site and adjacent uses.

A detailed description of surrounding land uses follows:

Surrounding Land Uses

West Land Uses

Land uses to the west of the subject property include an approximate 4.5-acre undeveloped property that is utilized as a contractor's equipment storage yard and is the other parcel subject to this ESA. Additionally, a commercial pet shop (Elias Pet Shop) is located on an approximate 0.25-acre parcel adjacent to the southwest corner of the parcel.

South Land Uses

Land uses to the south of the subject property included Valley Boulevard and mixed commercial and industrial land uses along the south site of Valley Boulevard including automobile sales and repair shops, tire shops, and an electric golf cart manufacturing facility.

North Land Uses

Land uses north of the subject property primarily consist of single-family residences.

East Land Uses

Land use east of the subject property is comprised of a commercial trucking storage yard.

APN 0252-051-69 - 17970 Valley Boulevard, Bloomington CA

Access to the subject site is restricted by a chain link fence with a gate along Valley Boulevard. The approximate 4.5-acre site is fenced on all sides however a hole in the fence along the northern property line allowed pedestrian access to the site. The property is utilized as a contractor's storage yard and contains stockpiles of chain-link fencing, steel and PVC piping, concrete K-rails, equipment trailers and various heavy equipment components. The site is devoid of trees and appears to be routinely maintained as the on-site weeds and grasses are less than six inches in height.

No structures or remnants of foundation were visible. Only one piece of equipment appeared to contain an internal combustion motor and there was a small (approximately 3 square feet) of stained brownish soil with a petrochemical (diesel) odor located adjacent and partly beneath this equipment. No other discoloration of soils was evident and no remnants of underground storage tanks were observed during the visual site inspection. Surrounding land uses consist primarily of commercial and residential uses. Refer to photographs in Appendix C which depict the site and adjacent uses.

A detailed description of surrounding land uses follows:

Surrounding Land Uses

West Land Uses

Land uses to the west of the subject property include an approximate 4.5-acre property that appears to contain a single-family residence on the southwestern portion with open space undeveloped land on the eastern and northern portions of the property. Additionally, a commercial pet shop (Elias Pet Shop) is located on an approximate 0.25-acre parcel adjacent to the southeast corner of the subject parcel.

South Land Uses

Land uses to the south of the include Valley Boulevard and mixed commercial/industrial land uses along the south site of Valley Boulevard including automobile sales and repair shops, tire shops, and an electric golf cart manufacturing facility.

North Land Uses

Land uses north of the subject property primarily consist of single-family residences.

East Land Uses

Land use east of the subject property and entails undeveloped open land that is devoid of structures or trees.

3.2 PROPERTY OWNER/AGENT INTERVIEWS

Telephone interviews were conducted with available representatives/owners of the properties subject to this ESA. Copies of the interview questions and a summary of their responses are contained in Appendix D.

4.0 GEOLOGY AND HYDROGEOLOGY

Summary: No geologic or hydrogeologic concerns were encountered during the site visit, which would be considered “an impairment” to a use of the subject site. According to the Environmental Data Resources, Inc (EDR) report included as Appendix E, the project site is not within the 100-year or 500-year flood plain.

4.1 GEOLOGY

Topography

The topographic conditions of the subject site vary from an elevation of approximately 1,129 feet above mean sea level (amsl) in the west to approximately 1,100 feet amsl in the east. The general area slopes to the east and should not create concerns regarding landslides, erosion, or ground failure. Therefore, development of the site is not anticipated to be compromised.

Fault Systems

According to the Southern California Earthquake Data Center (www.data.scec.org), several fault systems are located within relatively close proximity to the subject site. The San Jacinto Fault, located approximately 8 miles east of the site, is capable of producing a maximum credible earthquake magnitude (M_w) of 6.5-7.5. The most recent surface rupture was on April 9, 1968. The Red Hill Fault, located approximately 4 miles north is capable of producing a maximum credible M_w of 6.0-7.0. The most recent surface rupture was Late Quaternary.

Earthquakes, due to their ground acceleration and shifting, can cause major damage to buildings and create dangerous hazards to people through injury or death. Development projects in the seismically active southern California region must mitigate these potential hazards through strict adherence to the California Building Code (CBC) and recommendations by geotechnical engineers.

4.2 REGIONAL HYDROLOGY AND GROUNDWATER

According to the Environmental Data Resources, Inc (EDR) report included as Appendix E, the project site is not within the 100-year or 500-year flood plain.

5.0 LOCAL AGENCY REVIEW

Summary: The County of San Bernardino, Office of Fire Marshal, Hazardous Material Division was contacted on December 6, 2011 and a request for information relating to the subject site was submitted. As of December 30, 2011 the agency has yet to confirm its findings.

Various local (County) agencies maintain databases or records which are useful for evaluating the history of a property, and which may provide indications pertaining to the past uses of the property and any potential environmental concerns. For the purposes of this ESA, available records reviewed are presented below.

- San Bernardino County Fire Department
- Property Chain of Title Conveyance Documents-San Bernardino County Recorder's Office

County San Bernardino, Office of Fire Marshal, Hazardous Material Division

The County of San Bernardino, Office of Fire Marshal, Hazardous Material Division was contacted on December 6, 2011 and a request for information relating to the subject site was submitted. As of January 5, 2012 the agency has yet to confirm its findings.

Property Chain of Title Conveyance

After a review of the Chain of Title over the past 20 years (County of San Bernardino Assessor Office) and Aerial photographs (1938 to 2005) no environmental concerns are anticipated. Refer to Table 1 for the deed chain of each parcel dating back to 1979.

6.0 REGULATORY REVIEW

Summary: A review of Federal and State environmental databases revealed no environmental concerns or issues directly related to the site, which would be considered “an impairment”. However, the review of the EDR records search revealed numerous sites of concern within the vicinity. Many of these sites appear to be in compliance as they are either a permitted operation, actively in remedial work or remedial work has been completed. These sites are not anticipated to impact the subject property as they are located away/down gradient of water flow. Refer to Appendix D for additional information.

The State of California and various federal government agencies investigate and/or track numerous environmental concerns on a regional basis. For the purposes of this ESA, the following agency records were reviewed for a one-mile radius of the subject property.

FEDERAL RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: N/A

This database includes site proposed for listing in the NPL database.

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: N/A

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establish the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by States, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS includes sites that are either proposed for or on the National Priorities List (NPL), and sites that are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS - NFRAP: No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, States, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

LIENS 2: CERCLA Lien Information

Source: EPA

Telephone: 202-564-6023

Database provides information as the identity of sites and properties that have used Superfund funds.

CORRACTS: Corrective Action Report

Source: EPA

Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

RCRA: Resource Conservation and Recovery Act Information

Source: EPA

Telephone: 415-495-8895

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg

and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kg of hazardous waste, or over 1kg of actual hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US ENG CONTROLS: Engineering Controls Sites List

Source: Environmental Protection Agency

Telephone: 703-603-8905

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

US INST CONTROL: Sites with Institutional Controls

Source: Environmental Protection Agency

Telephone: 703-603-8905

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ERNS: Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

DOT OPS: Incident and Accident Data

Source: Department of Transportation, Office of Pipeline Safety

Telephone: 202-366-4595

Pipeline safety and incident report database.

CDL: Clandestine Drug Labs

Source: Department of Toxic Substances Control

Telephone: 916-255-6504

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

US BROWNFIELDS: A Listing of Brownfields Sites

Source: Environmental Protection Agency

Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

DOD: Department of Defense Sites

Source: USGS

Telephone: 703-692-8801

This data sets consists of federally owned or administered lands, administered by the Department of Defense, that have any equal to or greater than 640 acre of the United States, Puerto Rico, and the U.S. Virgin islands.

FUDS: Formerly Used Defense Sites

Source: NTIS

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at a NPL (Superfund) site containing technical and health information to aid in the cleanup.

UMTRA: Uranium Mill Tailings sites

Source: Department of Energy

Telephone: 505-845-0011

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized. In 1978, 24 inactive uranium mill tailings sites in Oregon, Idaho, Wyoming, Utah, Colorado, New Mexico, Texas, North Dakota, South Dakota, Pennsylvania, and on Navajo and Hopi tribal lands, were targeted for cleanup by the Department of Energy.

ODI: Open Dump Inventory

Source: Environmental Protection Agency

Telephone: 800-424-9346

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

Source: EPA

Telephone: 415-972-3336

A listing of illegal dump sites located on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

MINES: Mines Master Index File

Source: Department of Labor, Mine Safety and Health Administration

Telephone: 303-231-5959

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities that release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

TSCA: Toxic Substances Control Act

Source: EPA

Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

FTTS: FIFRA/TSCA Tracking System – FIFRA(Federal Insecticide, Fungicide, and Rodenticide Act)/TSCA(Toxic Substance Control Act)

Source: EPA

Telephone: 202-566-1667

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

FTTS INSP: FIFRA/TSCA Tracking System – FIFRA(Federal Insecticide, Fungicide, and Rodenticide Act)/TSCA(Toxic Substance Control Act)

Source: EPA

Telephone: 202-564-1667

HIST FTTS: FIFRA/TSCA Tracking System Administration Case Listing

Source: EPA

Telephone: 202-564-2501

Database tracks establishments that generate pesticide use within the course of the calendar year.

SSTS: Section & Tracking System

Source: EPA

Telephone: 202-564-4203

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

ICIS: Integrated Compliance Information System

Source: EPA

Telephone: 202-564-5088

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

PADS: PCB Activity Database System

Source: EPA

Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial stores and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements.

RADINFO: Radiation Information Database

Source: EPA

Telephone; 202-343-9775

Contains information about facilities that are regulated by U.S. EPA regulations for radiation and radioactivity.

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report

Source: EPA

Telephone: 415-947-8000

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA retains a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

BRS: Biennial Reporting System

Source: EPA/NTIS

Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

STATE AND LOCAL RECORDS:

HIST CAL-SITES: Calsites Database

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

CA BOND EXP. PLAN: Bond Expenditure Plan

Source: Department of Health Services

Telephone: 916-255-2118

Department of Health Services

SCH: School Property Evaluation Program

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the Cal Sites category depending on the level of threat to public health and safety or the environment they pose.

TOXIC PITS: Toxic Pits Cleanup Act Sites

Source: State Water Resources Control Board

Telephone: 916-227-4364

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites.

WMUDS/SWAT: Waste Management Unit Database

Source: State Water Resources Control Board

Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

CA WDS: Waste Discharge system

Source: State Water Resources Control Board

Telephone: 916-341-5227

Sites that have been issued waste discharge requirements.

CORTESE: "Cortese" Hazardous Waste & Substance Sites List

Source: CAL EPA/Office of Emergency Information

Telephone: 916-323-3400

The sites for the list are designated by the State Water Resources Control Board (LUST), the Integrated Waste Management Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

SWRCY: Recycler Database

Source: Department of Conservation

Telephone: 916-323-3836

A listing of recycling facilities in California.

LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Per Region

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

CA FID UST: Facility Inventory Database

Source: California Environmental Protection Agency

Telephone: 916-341-5851

The facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resources Control Board.

SLIC: Statewide SLIC Cases

Source: State Water Resources Control Board

Telephone: 886-480-1028

The Spills, Leaks, Investigations, and Cleanups (SLIC) listings includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites.

UST: Active UST Facilities

Source: State Water Resources Control Board

Telephone: 916-480-1028

Active UST facilities gathered from the local regulatory agencies.

UST MENDOCINO: Mendocino County UST Database

Source: Department of Public Health

Telephone: 707-463-4466

A list of underground storage tanks in Mendocino County.

HIST UST: Hazardous Materials Storage Container Database

Source: State Water Resources Control Board

Telephone: 916-341-5851

The Hazardous Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board

Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board

Telephone: N/A

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980s? The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

CHMIRS: California Hazardous Material Incident Report System

Source: Office of Emergency Services

Telephone: 916-845-8400

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

NOTIFY 65: Proposition 65 Records

Source: State Water Resources Control Board

Telephone: 916-445-3846

Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.

DEED: List of Deed Restrictions

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.

VCP: Voluntary Cleanup Program Properties

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

DRY CLEANERS: Cleaner Facilities

Source: Department of Toxic Substances Control

Telephone: 916-327-4498

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, garment pressing and cleaner's agents, linen supply, coin-operated laundries and cleaning, drycleaning plants, except rugs, carpet and upholstery cleaning, industrial launders, laundry and garment services.

WIP: Well Investigation Program Case List

Source: Los Angeles Water Quality Control Board

Telephone: 213-576-6726

Well investigation program case in the San Gabriel and San Fernando Valley area.

CDL: Clandestine Drug Labs

Source: Drug Enforcement Administration

Telephone: 202-307-1000

Database provides a listing of clandestine drug lab locations.

RESPONSE: State Response Sites

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

HAZNET: Hazardous Waste Information System

Source: California Environmental Protection Agency

Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the Department of Toxic Substances Control (DTSC). The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EMI: Emissions Inventory Data

Source: California Air Resources Board

Telephone: 916-322-2990

Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

HAULERS: Registered Waste Tire Haulers Listing

Source: Integrated Waste Management Board

Telephone: 916-341-6422

A listing of registered waste tire haulers.

ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

TRIBAL REORDS**INDIAN RESERV: Indian Reservations**

Source: USGS

Telephone: 202-208-3710

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

INDIAN LUST: Leaking Underground Storage Tanks on Indian Land

Source: Environmental Protection Agency

Telephone: 617-918-1313

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

INDIAN UST: Underground Storage Tanks on Indian Land

Source: EPA Region 9

Telephone: 415-972-3368

HISTORICAL AND OTHER DATABASE(S)

Depending on the geographic area covered by the EDR Report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included.

Other Databases**Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from

this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

EDR Historical Cleaners: EDR Proprietary Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

6.1 DATABASES WITH NO MAPPED SITES

No mapped sites were found or no records were available for either the site or surrounding area (within a one-mile radius of the site) for the databases shown in Table 2.

**Table 2

6.2 TARGET PROPERTY SEARCH RESULTS

A review of databases did contain any records on-site. The agency records were reviewed for a one-mile radius of the subject site. Refer to the EDR report in Appendix E for further information.

6.3 SURROUNDING SITES SEARCH RESULTS

RCRA-SQG: This database reports information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Small Quantity Generators (SQG) generate between 100kg and 1,000kg of hazardous waste per month. Sites within the prescribed radius to the subject property are listed below.

Lower Elevation	Address	Dir/Dist	Map ID	Page
All Tune And Lube	17866 Valley Blvd No 3	WSW 1/8 – 1/4	D14	18
Laguga Equip	17847 Valley Blvd	WSW 1/8-1/4	D17	21
Felipes Truck	17869 Taylor Ave	SW 1/8-1/4	19	22

These sites are not anticipated to present any environmental impact to the subject property as it is required to report its operation as defined by RCRA.

LUST: Contains an inventory of reported leaking underground storage tank incidents.

Equal/Higher Elevation	Address	Dir/Dist	Map ID	Page
Merit Oil Co*	10065 Alder Ave	W ¼-1/2	E20	24

* Status: Completed- Case Closed

This site is not anticipated to present any environmental impacts to the subject property as Remedial action has occurred.

RCRA-NONGEN: This database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste.

Equal/Higher Elevation	Address	Dir/Dist	Map ID	Page
Carlos A Carrilo	9963 Locust Ave	NE 1/8-1/4	C11	16
Overstreet Trucking	9951 Locust Ave	NE 1/8-1/4	C16	19

These sites are not anticipated to present any environmental impact to the subject property as it is required to report its operation as defined by RCRA.

HIST CORTESE: The sites for a list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control. The site within the prescribed radius to the subject property, showing its distance and direction from the subject site is listed below:

Equal/Higher Elevation	Address	Dir/Dist	Map ID	Page
Merit Oil Co*	10065 Alder Ave	W ¼-1/2	E21	29

This site is not anticipated to environmentally impact the subject site as remedial action has occurred. Refer to the LUST database for additional information.

Orphan Sites: These are sites that cannot be mapped because of poor or inadequate information relating to the location of the site in relation to the subject site. Further information was not obtained for these sites.

Based on the information obtained from the EDR report, the majority of the sites could be eliminated as potential locations of environmental concern to the subject site as they are located greater than one mile from the project site or are a permitted (permit issued to operate) local/State/federal operation. The EDR report includes the complete list of orphan sites obtained for this study area. The sites, which could not be eliminated, are provided in Table 3. Refer to the EDR report for further information regarding these sites.

7.0 CONCLUSION

Summary: The review of the EDR records search revealed numerous sites of concern within the vicinity. Many of these sites are not anticipated to impact the subject site as they are either at a lower elevation than the site or down-gradient of water flow. Also many of the sites appear to be in compliance as they are either a permitted operation, actively undergoing remedial work or remedial work has been completed.

The site visit revealed an approximate 3-foot by-3 foot patch of diesel fuel stained soil on parcel 0252-051-69. This impacted soil should be removed and over excavated in accordance with contaminated soil regulations prior to property acquisition or development.

Based on a visual inspection of the subject site and the surrounding area; an environmental records search and review of local, federal, and State databases; and in accordance with the limitations presented in this report, Lilburn Corporation presents the following conclusions concerning the subject site:

- No evidence of underground storage tanks or other potential environmental impairments were observed during the visual inspection of the subject site. However, the site visit revealed stained soils from unknown sources on parcel 0252-051-69. Removal and over excavation of the impacted soils are recommended.
- Local records reviewed to date have not revealed environmental concerns or issues that would be considered an immediate impairment to property development (pending San Bernardino County Fire Department findings).
- No geologic or hydrogeologic impairments to the subject site were encountered.
- Federal and State environmental databases revealed no environmental issues, which would be considered “an impairment” to the subject site. A copy of the EDR report is included in Appendix E.

Based on the field reconnaissance of the site a Phase I site assessment is sufficient. However, an approximate 3-foot by-3 foot patch of stained soil observed on the parcel 0252-051-69 should be over excavated and removed in accordance with contaminated soil regulations prior to property acquisition or development. Assuming this contaminated soil is removed prior to acquisition/development; a Phase II Environmental Site Assessment is not recommended.

CERTIFICATION

I, Frank Amendola, REA certify and agree that:

- (1) The inspector has no present or contemplated future interest in the site inspected.
- (2) The inspector has no personal interest in or bias with respect to the subject matter of the assessment report or the participants to the sale. This Site Assessment Report is not based in whole or in part upon the race, color, or national origin of the prospective owners or occupants of the site inspected, or upon the race, color or national origin of the present owners or occupants of the properties in the vicinity of the site inspected.
- (3) The inspector has personally inspected the site and has made an exterior inspection of all neighboring properties in the report. To the best of the inspector's knowledge and belief, all statements and information in this Site Assessment Report are true and correct, and the inspector has not knowingly withheld any significant information.
- (4) The legal description and address furnished is correct according to the information furnished to the inspector.
- (5) This Site Assessment Report was prepared in conformity with and is subject to the requirements of the Code of Professional Ethics and Standards of Professional Conduct of the environmental organizations with which the inspector is affiliated.
- (6) All conclusions and opinions concerning the subject site that are set forth in the Site Assessment Report were prepared by the inspector whose signature appears below.

Frank Amendola, REA

LIMITATIONS

The services described in this report were performed consistent with generally accepted professional consulting principles and practices. No other warranty, express or implied, is made. These services were performed consistent with our agreement with our client. This report is solely for the use and information of our client unless otherwise noted. Any reliance on this report by a third party is at such party's sole risk.

Opinions and recommendations contained in this report apply to conditions existing when services were performed and are intended only for the client, purposes, locations, time frames, and project parameters indicated. Not laboratory testing was performed in conjunction with this report. We are not responsible for the impacts of any changes in environmental standards, practices, or regulations subsequent to performance of services. We do not warrant the accuracy of information supplied by others, nor the use of segregated portions of this report.

The purpose of an environmental assessment is to reasonably evaluate the potential for or actual impact of past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. The following paragraphs discuss the assumptions and parameters under which such an opinion is rendered.

No investigation is thorough enough to exclude the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not therefore be construed as a guarantee of the absence of such materials on the site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at unsampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

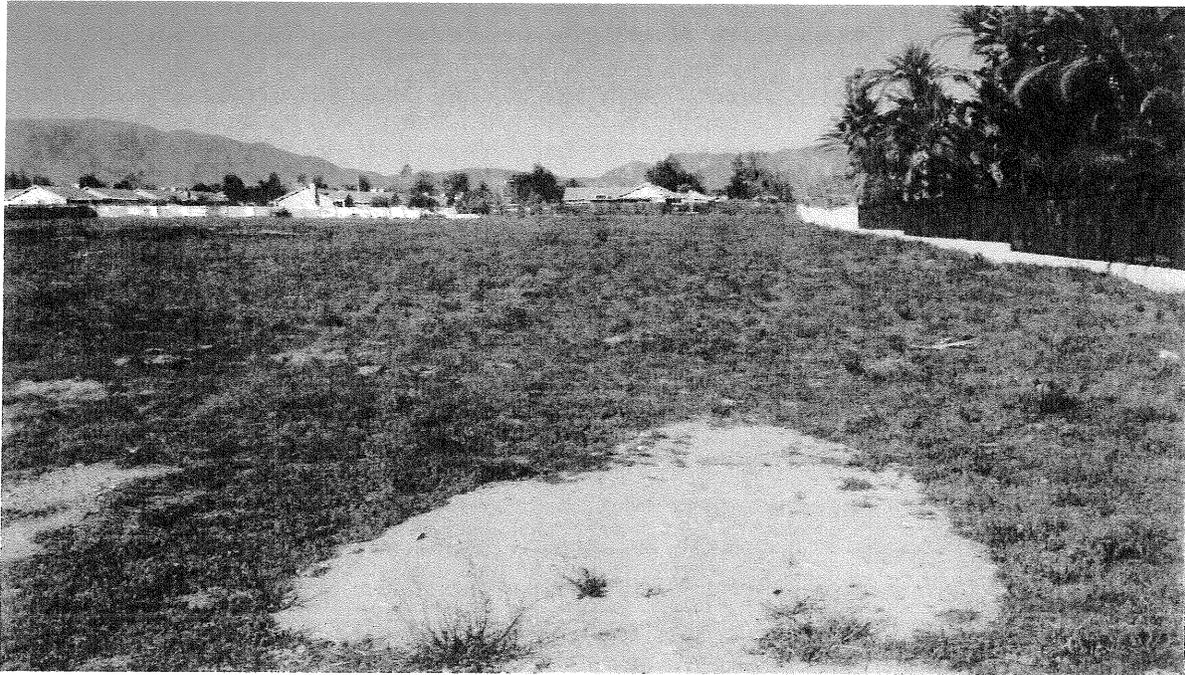

Photo 1. View of property looking north from the southeastern corner of the site

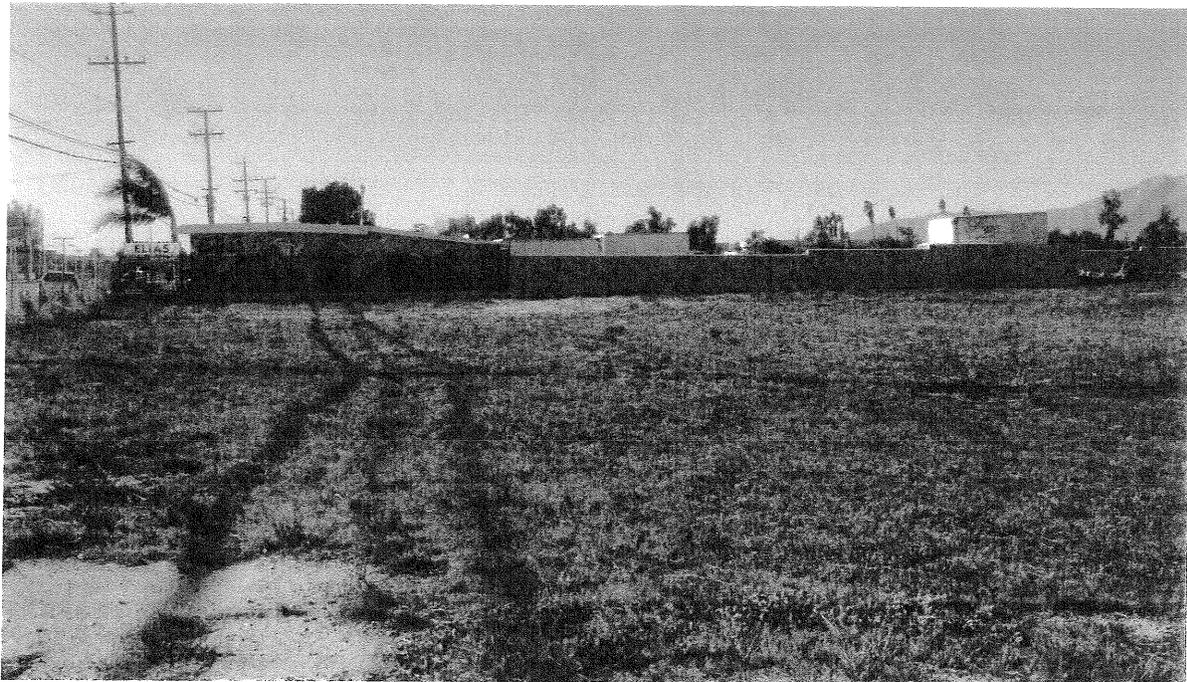

Photo 2. View of Park Property looking west from the southeastern corner of the site.

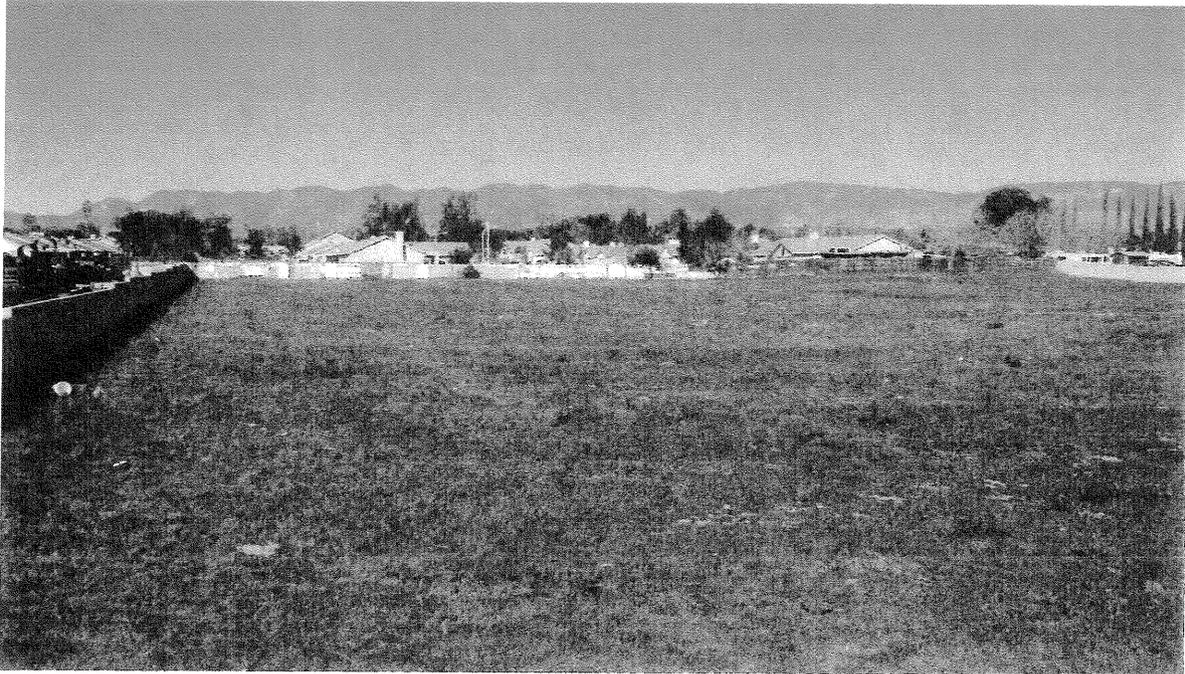

Photo 3. View of site looking north from the southwest corner of the property.

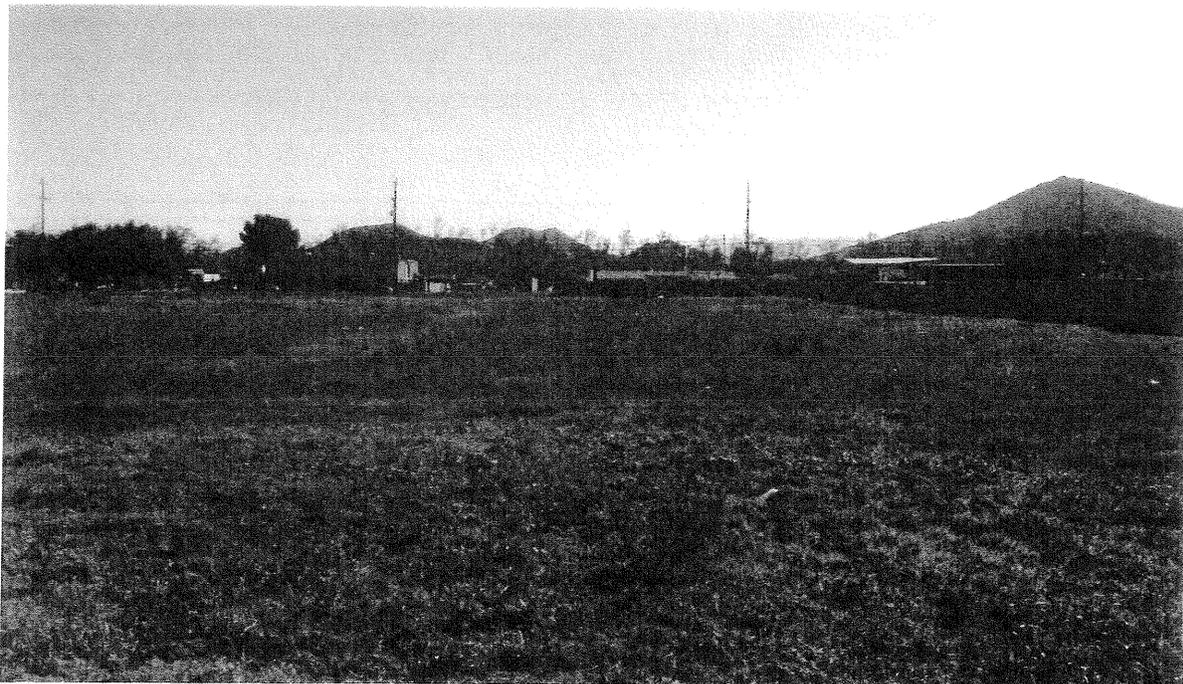

Photo 4. View of site looking south from northern property line.

Photo 5. View of the rear of Elias Pet Shop located adjacent to the southwest corner of the site.

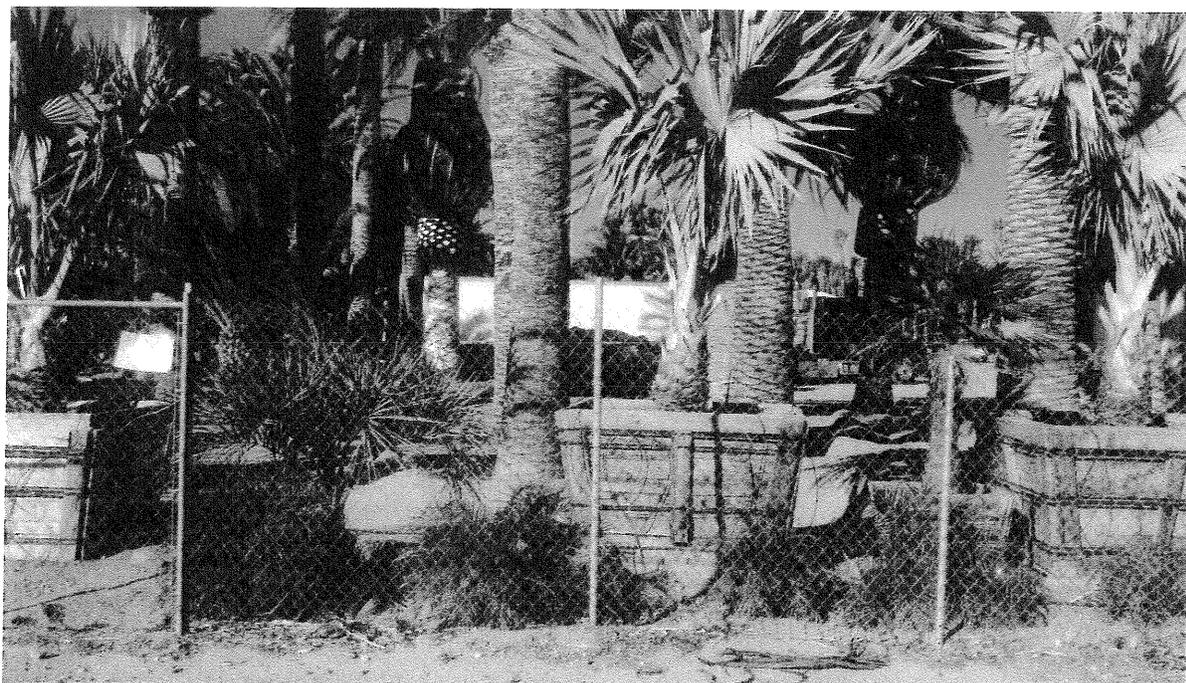

Photo 6. View of adjacent commercial truck storage yard from the eastern portion of the subject site

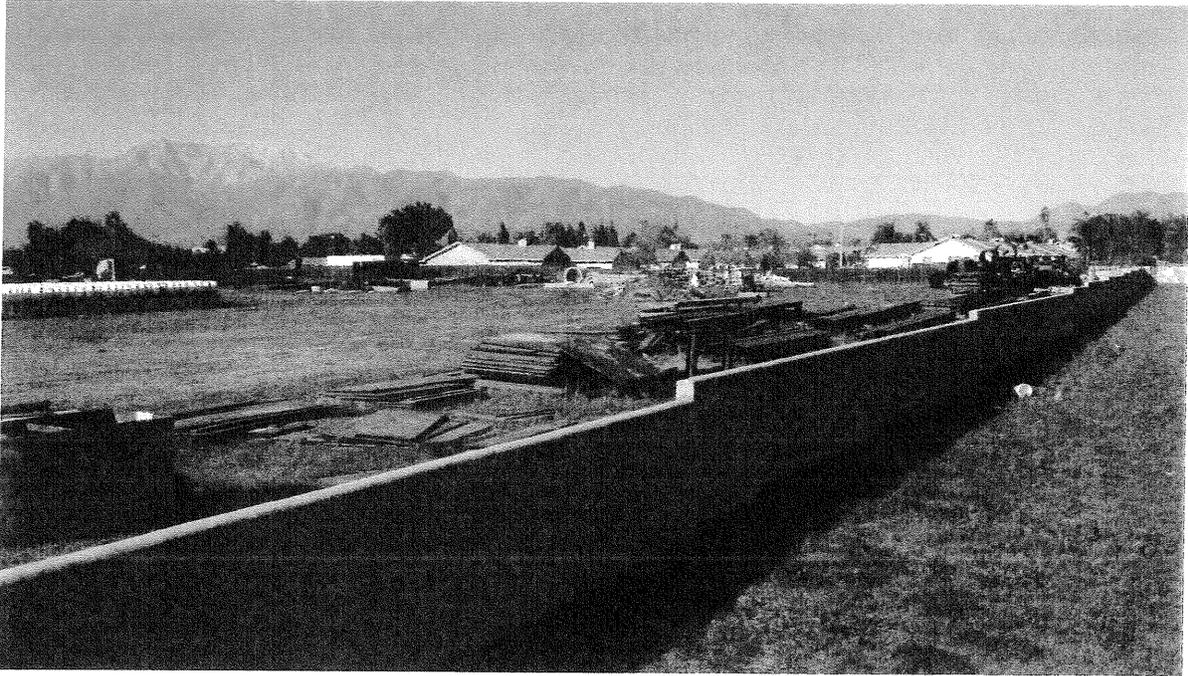

Photo 7. View of adjacent contractor's storage yard west of the subject site.

Photo 8. View of single family homes located north of the subject property.

Appendix D
Site Owner/Agent Interviews

**PHASE I Environmental Site Assessment
Interview Form**

Property Identification: APN 0252-051-69
Property Address: 17970 Valley Blvd, Bloomington CA
Interviewer: Michael Perry
Person Interviewed: Mr. Koji Kuwada (310) 516-3590
Date of Interview: December 22, 2011

Interview Questions:

How long have you lived at this address or owned the property?

Mr. Kuwada stated he was the property owner's representative and that the property is vacant with no one ever living there. He stated that the property was purchased in approximately 2003.

What are the main operations that occur on this site?

No operations have occurred at the site. The site has been used as a contractor's storage yard. This included the storage of K-rails, concrete piping, barricades, and other construction materials and equipment.

What activities have occurred on the property?

The representative was un-aware of any previous activities occurring at the site and that to his knowledge it was always open space/vacant or used for material equipment storage.

Are you aware of any past spills at this fueling area?

Mr. Kuwada stated he was unaware of any fueling occurring on the subject property and that he was not aware of any fuel spills or hazardous material spills occurring on the site.

Are you aware of any spills or hazardous materials activities on this property?

Mr. Kuwada stated he was unaware of any spills occurring on the subject property.

Are you aware of any USTs located or used on the property?

Mr. Kuwada stated he was unaware of any AGSTs or USTs located on the subject property.

Do you know of others who may have knowledge of the property?

Mr. Kuwada stated he did not know the previous owners or have any knowledge of others more aware of the property than himself.

**PHASE I Environmental Site Assessment
Interview Form**

Property Identification: APN 0252-051-70
Property Address: 18028 Valley Blvd. Bloomington CA
Interviewer: Michael Perry
Person Interviewed: Mr. Park (909) 721-7303
Date of Interview: December 22, 2011

Interview Questions:

How long have you lived at this address or owned the property?

Mr. Park stated he has owned the property for about 10 years but the property is vacant and no one has lived there.

What are the main operations that occur on this site?

The property has always been vacant property since he owned it.

What activities have occurred on the property?

The property has always been vacant property since he owned it.

Are you aware of any past spills at this fueling area?

No fueling has occurred on the subject property according to Mr. Park, and he is unaware of any spills on the subject property

Are you aware of any spills or hazardous materials activities on this property?

Mr. Park, is unaware of any spills on the subject property

Are you aware of any USTs located or used on the property?

Mr. Park, stated he was unaware of any AGSTs or USTs located on the subject property.

Do you know of others who may have knowledge of the property?

Mr. Park stated the property was purchased from a trust and did not know of any previous owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 11/29/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 03/12/2012
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 10/14/2011

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/08/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 60	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011	Telephone: 202-343-9775
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 10/13/2011
Number of Days to Update: 34	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (415) 947-8000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/13/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

	Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2010	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/19/2011	Telephone: 916-255-1136

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009	Telephone: 860-424-3375
Date Made Active in Reports: 09/11/2009	Last EDR Contact: 11/22/2011
Number of Days to Update: 16	Next Scheduled EDR Contact: 03/05/2012
	Data Release Frequency: Annually

NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	1118 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34117-A4 FONTANA, CA
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

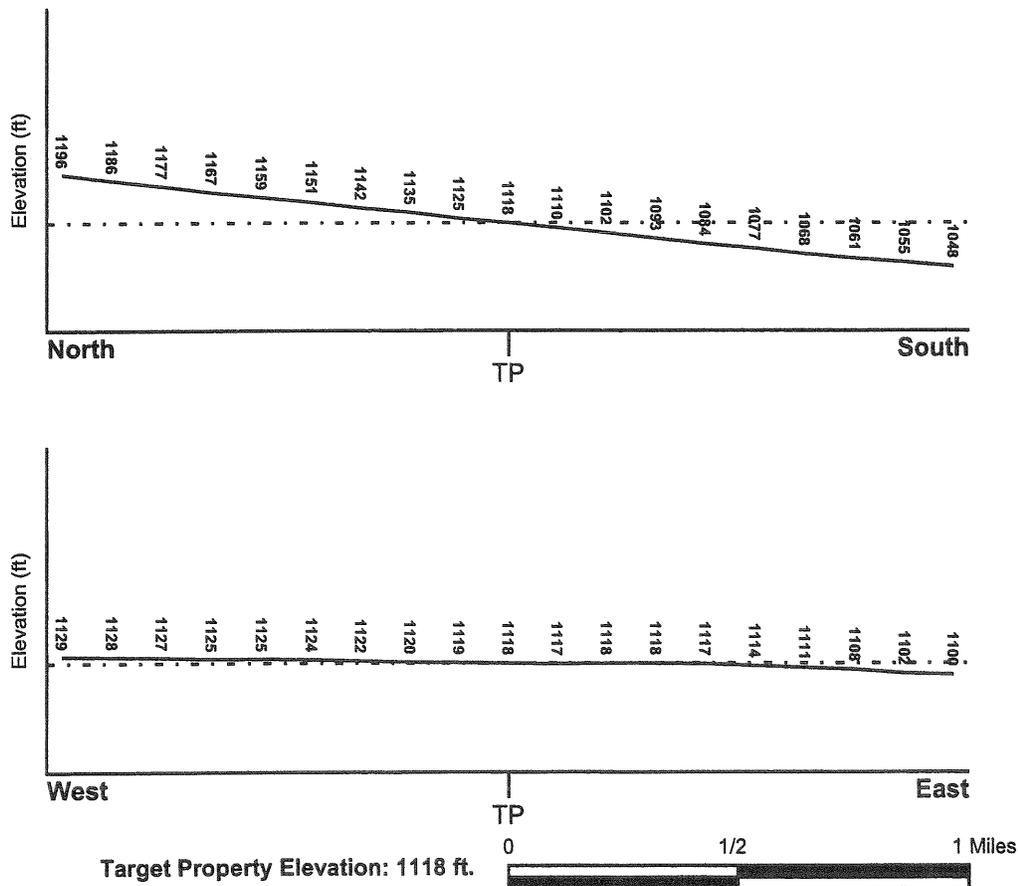

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN BERNARDINO, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06071C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> FONTANA	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Appendix F
San Bernardino County, Fire Department Correspondence

CUPA
San Bernardino County Fire Department • Hazardous Materials Division
 620 S. E St., San Bernardino, CA 92415-0153 • (909) 386-8468 FAX (909) 386-8460

REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Department (County Fire) files any record relating to contamination or reports of spills at a particular site. A Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by County Fire, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and EPCRA or CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, that can be a useful tool in providing a history of compliance or non-compliance.

Once County Fire has completed its records search, a Certified Hazardous Materials Records Search Finding Report will be prepared and issued, which will detail all County Fire records associated with a particular site by type, date, location, and status where applicable. (Any files identified in a Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.)

If the completed records search reveals no County Fire record of hazardous material activity at the site, a Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description, and if possible attach a map to this request form.

DISCLAIMER: While all attempts are made to provide accurate, current, and reliable information, County Fire recognizes the possibility of human error. Therefore, County Fire, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of a Certified Hazardous Materials Records Search Finding Report and provides a Certified Hazardous Materials Records Search Finding Report "as is", with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall County Fire be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. County Fire therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

RELEASE AND INDEMNIFICATION: In consideration for the issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge County Fire, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of County Fire, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report.

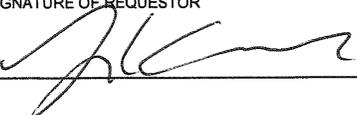

In further consideration for County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless County Fire, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report brought by any third party.

* * *

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request a Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$130.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Dept. I understand that research exceeding one hour will be billed at the rate of \$130.00 for each additional hour spent by County Fire in completing this request.
- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.
