**Subject:** PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT  
Big Bear Sports Ranch  
Southwest Corner of Erwin Ranch Road and Lakewood Drive and the  
Northeast Corner of Lakewood Drive and 11th Lane  
Approximately 13.25-Acres of Developed Land  
APNs: 0315-231-21-0000 & 0315-201-06-0000  
Big Bear City, San Bernardino County, California  
Converse Project No. 07-16-154-01

Dear Ms. Cohn:

Converse Consultants (Converse) is pleased to submit the attached report that summarizes the activities and the results of a Phase I Environmental Site Assessment (Phase I ESA) that was conducted at the referenced property (Property).

A summary of the assessment is presented in the Executive Summary, as well as in Sections 7.0, 8.0, and 9.0 of the report. Non-scope items are discussed in Section 11.0.

We appreciate the opportunity to be of service. Should you have any questions or comments regarding this report, please contact Douglas Krueger or Scott Nunes at (909) 796-0544 or Norman Eke at (626) 930-1260.

Converse Project No. 07-16-154-01
Executive Summary

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at the southwest corner of Erwin Ranch Road and Lakewood Drive and the northeast corner of Lakewood Drive and 11th Lane, in Big Bear City, San Bernardino County, California, referred to as the Property in this report. Converse was retained by the County of San Bernardino Real Estate Services Department to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Property, in conformance with the ASTM Standard E: 1527-05 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-05). This Phase I ESA was conducted during the period of July 25, 2007 to August 28, 2007.

The Property is located at the southwest corner of Erwin Ranch Road and Lakewood Drive and the northeast corner of Lakewood Drive and 11th Lane, in Big Bear City, San Bernardino County, California. The Property is located north of Eleventh Street, south of Erwin Ranch Road, east of State Highway 38 (Greenspot Blvd.), and west of Central Lane. Currently, the Property (Parcel A; APN 0315-231-21-0000) is located at the southwest corner of Erwin Ranch Road and Lakewood Drive and is developed with a main lodge with kitchen, five (5) cabins, a laundry room/bathroom, a maintenance shop/yard, an outdoor pavilion, eight (8) tennis courts, two and a half (2½) basketball courts, an outdoor roller hockey rink, a swimming pool, a sand volleyball court, a water well, a hockey storage shed, a tennis storage shed, a pool pump house/shed, and a climbing wall with an attached high rope obstacle course. Also, the Property known as Parcel B (APN: 0315-201-06-0000) is located at the northeast corner of Lakewood Drive and 11th Lane and is developed with a golf driving range and a soccer field.

The Property was not identified on the databases in the EDR report.

The Property and adjacent properties are not considered RECs.

Further assessment is not warranted at this time.
Information has been requested from the California Office of the State Fire Marshall (OSFM) and the City of Big Bear Lake (groundwater information), but was not received in time for inclusion in this report.
1.0 Introduction

1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at the southwest corner of Erwin Ranch Road and Lakewood Drive and the northeast corner of Lakewood Drive and 11th Lane, in Big Bear City, San Bernardino County, California, referred to as the Property in this report. Converse was retained by the County of San Bernardino Real Estate Services Department to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products on a property under Conditions that indicate an existing release, past release, or material threat of a release... into structures on the property or into the ground, groundwater or surface water of the property.

On January 11, 2002, Public Law 107-118 was signed. The Small Business Liability Relief and Brownfields Revitalization Act (SBLRBRA) directed the United States Environmental Protection Agency (EPA) to promulgate a rule defining due diligence for compliance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This rule, which is generally referred to as All Appropriate Inquiry (AAI) was adopted on November 1, 2005. The AAI rule states that ASTM E1527-05 complies with the EPA requirements for AAI. In some cases the ASTM 1527-05 is more stringent than AAI.

This Phase I ESA was completed in accordance with our proposal dated July 9, 2007. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E 1527-05 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Property owner representatives
- Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report
1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I assessment. Examples of non-scope issues include:

- Asbestos-containing building material
- Lead-base Paint
- Wetlands
- Cultural & Historic Resources
- Industrial Hygiene
- Health & Safety
- Mold
- Radon
- Lead in Drinking Water
- Regulatory Compliance
- Ecological Resources
- Endangered Species
- Indoor Air Quality
- Biological Agents

No non-scope issues were addressed in this report.

1.3 Significant Assumptions

Converse made the following assumptions for this assessment:

- The Property was not covered on currently published groundwater contour maps. Therefore, the direction of regional groundwater is inferred to follow surface topography to the north-northeast.

1.4 Limitations and Exceptions

The following limitations or exceptions occurred during this assessment:

- Historical research was not completed prior to 1965. Remaining ASTM sources are deemed unlikely to yield significant data.
- No owner interview was received within the timeframe of this assessment.

1.5 Special Terms and Conditions

The following user was identified: Ms. Michelle Cohn (Client), County of San Bernardino Real Estate Services Department.

The Client was responsible for providing Attachments A & B of the proposal to those identified. Converse did receive a completed attachment ‘A’ (User Questionnaire) and attachment ‘B’ (Client/User/Owner Provided Information) from the identified user (Client).
1.6 Reliance

This report is for the sole benefit and exclusive use of the County of San Bernardino Real Estate Services Department in accordance with the terms and conditions attached to our proposal under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either expressed or implied, is made. This report should not be regarded as a guarantee that no further contamination beyond that which could be detected within the scope of this assessment is present at the Property.

The conclusions and recommendations presented in this report are based on the agreed upon scope of work. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation. Also, events may occur after the Property visit, which may result in contamination of the Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented. Any reliance on this report by Third Parties shall be at the Third Party's sole risk.
2.0 Property Description

2.1 Current Use(s) of the Property

The Property is owned by the Big Bear Sports Ranch and currently is developed land. A small portion of Parcel 'B' is undeveloped adjacent to the soccer field.

A Property location map and a field generated Property plan are provided in Appendix A. Pertinent Property photographs are provided in Appendix B.

2.2 Location and Legal Description

The Property is located west of Central Lane and south of Erwin Ranch Road, in Big Bear City, San Bernardino County, California. The Property is located approximately ¼-mile east of State Highway 38 (Greenspot Boulevard).

The San Bernardino County Assessor’s Parcel Numbers for the Property are 0315-201-06-0000 and 0315-231-21-0000. The legal description of the Property is described as the following:

0315-201-06-0000: PARCEL MAP 5549 PARCEL NO 2

0315-231-21-0000: PARCEL MAP 7772 PARCEL NO 1

2.3 Zoning Information

According to the County of San Bernardino, Building and Safety Department (Big Bear Satellite Office), the current zoning for the Property is BVRL5 (Bear Valley Rural Living) for APN: 0315-231-21-0000 and BVRS (Bear Valley Single Residential) for APN: 0315-201-06-0000.

2.4 Property Characteristics

The Property is an approximate 13.25-acre irregular shaped parcel of developed land.
2.5 Description of Property Structure(s)

There are thirteen (13) structures on the Property: a main lodge with kitchen, five (5) cabins, a laundry room/bathroom, a maintenance shop/yard, an outdoor pavilion, a hockey storage shed, a tennis storage shed, a pool pump house/shed, and a climbing wall with an attached high ropes obstacle course.

The following services were present at the Property at the time of the assessment.

- Electricity: Southern California Edison
- Gas: Southern California Gas Company
- Potable Water: Big Bear City
- Heating, Ventilation, Air Conditioning (HVAC): Roof Mounted Swamp Cooler on main lodge
- Sanitary Sewer: Big Bear City
- Solid Waste: Burrtec Waste Industries, Inc.
3.0 User/Owner Provided Information & Responsibilities

3.1 Requested Documents and Information

The ASTM E1527 specifies that the Property owner, key site manager and the User provide any helpful documents that may be available. In order to facilitate, and document, the collection of this information, Converse prepared a form titled Owner Interview and Helpful Information. Converse requests that the User complete the form.

The following documents and information were requested from the County of San Bernardino Real Estate Services Department. However, the County of San Bernardino Real Estate Services Department had no information.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Material Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness, and Prevention Plans; Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products
3.2 User Provided Information

Section 6 of ASTM E1527-05 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. Converse included the questionnaire as Attachment A to our proposal. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental cleanup liens filed or recorded against the Property
- Activity and land use limitations that are in-place on the Property or have been filed or recorded in a registry
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Property as long as it was not contaminated
- Commonly known or reasonably ascertainable information about the Property
- The degree or obviousness of the presence or likely presence of contamination at the Property, and the ability to detect this contamination by appropriate investigation

The following information was requested from the User; Ms. Michelle Cohn (Client) the County of San Bernardino Real Estate Services Department:

3.2.1 Environmental Cleanup Liens

The User did not have any information regarding environmental cleanup liens or title records.

According to the San Bernardino County Assessor's Office, no environmental liens are recorded on this Property.

3.2.2 Activity and Use Limitations

The User did not have any information indicating they were aware of any AULs.

3.2.3 Specialized Knowledge or Experience

The User did not have any information indicating they had specialized knowledge or experience related to the Property or nearby properties.
3.2.4 Reason for Significantly Lower Purchase Price

The User has indicated to Converse that there is not a lower purchase price because of known or suspected contamination at the Property.

3.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not have any information about; past uses, specific chemicals at the Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Property.

3.2.6 Obviousness of Contamination

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-05.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

3.3 Continuing Obligations

In order to exert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-05 and AAI.
4.0 Records Review

4.1 Physical Setting

4.1.1 Geology

The Property is located approximately 6,778 feet above mean sea level with surface topography sloping towards the north-northeast (United States Geological Survey [USGS] Topographic Map, Big Bear City, California, 1971 (photorevised 1979) and Moonridge, California 1970 (photorevised 1988). Soil on the Property has been classified as slow drained loamy sand from the Pacifico series (United States Department of Agriculture [USDA] – Soil Conservation Service STATSGO data, 1974, EDR 2007).

4.1.2 Groundwater

According to the Western Municipal Water District, Cooperative Well Measuring Program, Fall 2006 Data, the nearest well to the Property is located approximately ¼-mile to the southwest of the Property (FRDS Well ID#3610061010: Well name, Lakewood Well ‘07”). Depth to groundwater records and the recorded depth in feet below ground surface (bgs) were not obtained within the timeframe of this assessment. A request for this information has been issued to the City of Big Bear Lake. The inferred direction of the regional groundwater flow is to the north-northeast based on the natural declination of surface topography.

4.1.3 Potable Water Supplier

Potable water is supplied by the Department of Water, City of Big Bear Lake.

4.2 Historical Review

4.2.1 Aerial Photograph and Map Review

Available historical aerial photographs (San Bernardino County Flood Control District) and USGS topographic maps, as described in Table 1, were reviewed. Historical Sanborn Fire Insurance (Sanborn) map coverage of the Property was requested from Environmental Data Resources (EDR), Inc. According to EDR, there is no Sanborn map coverage of the Property.

4.2.2 Building Permit Review

According to the County of San Bernardino, Building and Safety Division (Big Bear Satellite Office), the following building permits are on record for the Property (Parcel ‘A’) listed under the APN: 0315-231-21-0000:

- Tenant improvements in 1990
- Electrical upgrades for the water well in 2002

There were no building permits on record for the Property (Parcel ‘B’) under APN: 0315-201-06-0000. No historical addresses were found during this assessment.
4.2.3 Data Failure

The use of the Property has been confirmed back to 1965; therefore, there is data failure associated with this historical review.

4.2.4 Summary of Historical Property Use

The Property has been historically undeveloped land from as early as 1965 until approximately 1971. Thereafter, the Property has remained developed land to present.

4.2.5 Summary of Past Uses of Adjoining Properties

The historical uses of the adjoining properties to the north, south, east, and west appeared to be undeveloped land and rural residential properties from as early as 1965. State Highway 38 (Greenspot Blvd.) was noted to be present to the west of the Property as early as 1965.

4.2.6 Summary of Past Uses of the Surrounding Area

The historical uses of the surrounding area to the north, south, east, and west appeared to be undeveloped land and rural residential properties from as early as 1965.
4.3 Results of Environmental Records Sources Review

An Environmental Data Resources (EDR) report of Standard Environmental Record Sources (Records) was prepared specifically for the Property. The search included queries to the following databases for cases within specified ASTM search distances.

4.3.1 Property Listings

The Property was not identified on the databases in the EDR report.

4.3.2 Adjoining Properties

The adjoining properties were not identified on the databases in the EDR report.

4.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Property are as follows:

4.3.3.1 National Priority List (NPL)

The NPL list is an EPA listing of uncontrolled or abandoned hazardous waste sites undergoing long-term remedial action under the Superfund Act. No NPL site was identified within a one-mile radius of the Property.

4.3.3.2 Proposed NPL

The proposed NPL list is an EPA listing of proposed uncontrolled or abandoned hazardous waste sites. No proposed NPL sites were identified within a one-mile radius of the Property.

4.3.3.3 Federal Delisted NPL Sites

This is an EPA listing of sites which at one time were considered to be NPL sites but have been reviewed and removed from that list. This may be because they have been remediated or reevaluated based on additional information. No delisted NPL sites were identified within a one-mile radius of the Property.

4.3.3.4 Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) List

EPA maintains a list of sites that are either proposed or on the National Priorities List (NPL) and sites that are in the screening and assessment phase for possible inclusion on the NPL. No CERCLIS sites were identified within a ½-mile radius of the Property.
4.3.3.5 CERCLIS No Further Action Remedial Action Planned (CERCLIS-NRAP) List

EPA maintains a list of CERCLIS sites where following an initial investigation, no contamination was found, contamination was quickly removed, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. No CERCLIS-NFRAP site was identified within a ½-mile radius of the Property.

4.3.3.6 Resource Conservation and Recovery Act Information (RCRA) Corrective Actions List (CORRACTS)

EPA maintains a list of RCRA facilities that are undergoing "corrective action". Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred. No CORRACTS sites were identified within a one-mile radius of the Property.

4.3.3.7 RCRA non-CORRACTS Treatment, Storage, and Disposal (TSD) Facilities List

EPA maintains a list of RCRA TSD facilities. These facilities have permits to manage hazardous material. No TSD facilities were identified within a ½-mile radius of the Property.

4.3.3.8 RCRA Generators List

The EPA's RCRA Program identifies and tracks hazardous waste from the point of generation to the point of disposal. This is a database which lists facilities that generate, store, transport, treat, or dispose of hazardous waste. Small quantity facilities generate less than 1,000 kilograms per month of non-acutely hazardous waste. Large quantity facilities generated at least 1,000 kilograms per month of non-acutely hazardous waste or one kilogram per month of acutely hazardous waste.

No large or small quantity generators were identified within a ½-mile radius of the Property.

4.3.3.9 Emergency Response Notification System (ERNS) List

EPA publishes an annual listing of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center (NRC). This list is only searched for the target property. The Property was not identified on the ERNS List.

4.3.3.10 Federal Institutional Control/Engineering Control Registries

Institutional controls and engineering controls are forms of Activity and Use Limitations which are an explicit recognition that residual levels of hazardous substances or petroleum products may be present on the Property and unrestricted use of the Property may not be acceptable. Lists are maintained by EPA and various states. The Property was not identified on the lists.

4.3.3.11 Annual Workplan (AWP)

State database which identifies known hazardous substance sites targeted for cleanup. No AWP sites were identified within a one-mile radius of the Property.
4.3.3.12 Historic Cal-Sites Database

Listing of potential or confirmed hazardous substance release properties. No HIST Cal-Sites locations have been reported within a one-mile radius of the Property.

4.3.3.13 CA Bond Expenditure Plan (BEP)

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act fund. This database is no longer updated. No BEP sites were identified within a one-mile radius of the Property.

4.3.3.14 Toxic Pits Cleanup Act Sites (TOXIC PITS)

Identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. No TOXIC PIT sites were identified within a one-mile radius of the Property.

4.3.3.15 State Landfills

Solid Waste Facilities/Landfill Sites (SWF/LF) records from the Integrated Waste Management Board, Solid Waste Information System (SWIS) – Database of active and inactive landfills, incinerators, transfer stations, and disposal facilities. No SWF/LF, SWIS sites were identified within a ½-mile radius of the Property.

4.3.3.16 Waste Management Unit Database (WMUDS/SWAT)

List which tracks and inventories waste management units. No WMUDS/SWAT locations were identified within a ½-mile radius of the Property.

4.3.3.17 Hazardous Waste & Substances Sites List (CORTESE)

Database of sites which have been identified as leaking underground storage tank sites, landfills, or Cal-Sites. No CORTESE site was identified within a ½-mile radius of the Property.

4.3.3.18 Leaking underground Storage Tanks (LUST) Sites

An inventory of reported leaking underground storage tank incidents reported to the state. No LUST sites were identified within a ½-mile radius of the Property.

4.3.3.19 Historical and Active Underground Storage Tank (UST) Sites

A review of the Facility Inventory Database (CA FID UST), UST, Hazardous Substance Storage Container Database (HIST UST), and Statewide Environmental Evaluation and Planning System (SWEEPS UST) identified no historical or active UST site within a ¼-mile radius of the Property.

4.3.3.20 Aboveground Storage Tanks (ASTs)

List of AST sites registered with the State Water Resources Control Board. No AST sites were identified within a ½-mile radius of the Property.
4.3.3.21 Deed Restriction Listing (DEED)

List of sites which have been cleaned up under the TSC's Site Mitigation and Brownfields Reuse Program. The list generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit; only sites where deed restrictions that are active. No DEED sites were identified within a ¼-mile radius of the Property.

4.3.3.22 Facility and Manifest Data (HAZNET)

Database of sites which submit a hazardous waste manifest to DTSC. This list is only searched for the target Property. The Property was not identified as a HAZNET site.

4.3.3.23 Tribal Records

Records pertaining to LUST and UST sites on Indian land. No LUST sites were identified within a ¼-mile radius of the Property. No UST sites were identified within a ¼-mile radius of the Property.

4.3.4 Orphan Listings

Seven other off-site locations, including unmapped sites or 'orphan sites', of environmental concern identified by EDR included San Bernardino County hazardous material permits, HAZNET sites, aboveground storage tanks, and an emergency response. The potential for environmental impact to the Property from these off-site locations of concern appear to be low due to one or more of the following: type of regulatory listing and/or potential responsible parties have been identified.

4.4 Additional Environmental Record Sources

4.4.1 California Environmental Protection Agency (Cal-EPA), Department of Toxic Substances Control (DTSC)

No information regarding the Property was on file with the DTSC.

4.4.2 Cal-EPA, Santa Ana Regional Water Quality Control Board (RWQCB)

No information regarding the Property was on file with the RWQCB.

4.4.3 California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR)

Wildcat Map Sheet 'K' Reference Map Series, San Bernardino, Riverside, and Imperial Counties, 1986, was reviewed. No oil or gas wells are located on the Property or adjacent properties.
4.4.4 California Department of Forestry and Fire Protection (CDP), Office of State Fire Marshall (OSFM), Pipeline Safety Division

Information has been requested from the OSFM, but was not received in time for inclusion in this report.

4.4.5 South Coast Air Quality Management District (SCAQMD)

No information regarding the Property was on file with the SCAQMD.

4.4.6 San Bernardino County Fire Department (SBCFD), Hazardous Material Division

No information regarding the Property was on file with the SBCFD.
5.0 Property Reconnaissance

5.1 Methodology

On August 6, 2007, Converse visited the Property to determine present use and to identify environmental conditions at the Property. Our methodology involved walking the perimeters and center lines while noting observed evidence of present and potential environmental concerns.

A field-generated map is provided in Appendix A. Pertinent Property photographs are provided in Appendix B.

5.2 Limiting Conditions

Converse's findings are based on the Property conditions observed on Monday, August 6, 2007.

5.3 Interior Observations of Property

During our Property visit, Converse made the following observations of the interior of the Property:

<table>

</table>

In addition to the above items, Converse also made the following observations:

- Minor trash and debris (asphalt/concrete pieces and assorted wood) was observed on the eastern boundary (adjacent to Central Lane) of the Property (Parcel ‘B’).
5.5 Current Uses of Adjoining Properties

Based on our research and observations during our Property visit, the Property is bordered by the following:

<table>
<thead>
<tr>
<th>Direction</th>
<th>Current Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>North:</td>
<td>Erwin Ranch Road, followed by a single-family residential property.</td>

5.6 Current Uses of Surrounding Area

Based on our research and observations during our Property visit, the surrounding area of the Property consists of commercial properties and single-family residential properties.
No current or past uses were observed or identified on the Property visit, interviews, or records review that would indicate Recognized Environmental Conditions (RECs) in connection with current uses of the surrounding area.
6.0 Interviews

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 3.1 of this report:

6.1 Property Owner

An environmental questionnaire (i.e. owner interview) was provided to the County of San Bernardino Real Estate Services Department, C/O Mr. Reese R. Troublefield (Client) and the Big Bear Sports Ranch (Owner). According to Mr. Troublefield, Director of the County of San Bernardino Real Estate Services Department, there are no known RECs associated with the Property. No questionnaire was received from the owner within the timeframe of this assessment. No other pertinent information was provided.

6.2 Tenant/Occupant

Converse conducted an interview with Mr. Chuck Brodbeck (Maintenance Superintendent). According to Mr. Brodbeck, the Big Bear Sports Ranch started in 1971 as a tennis camp founded and owned by Mr. William Frantz and evolved over time into a multi-sport camp. Mr. Brodbeck has worked at the facility for over nine years and knows of no known RECs associated with the Property. No other pertinent information was provided.

6.3 State or Local Government Officials

Converse conducted an interview with Ms. Elizabeth Galvan (Auditor/Controller-Recorder) of the San Bernardino County Recorder's Office. All records are recorded by name or company's name only, documents are not recorded by address or parcel number. According to their records no liens exist for the current owner of the Property (Big Bear Sports Ranch). According to the San Bernardino County Assessor's Office, no environmental liens are recorded on this Property.
7.0 Findings

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

- The Property is an approximate 13.25-acre irregular shaped parcel of developed land. The Property is owned by the Big Bear Sports Ranch.

- According to historical information, the Property (Parcel ‘A’) appeared to have been undeveloped land from at least 1965 until development in 1971.

- According to historical information, the Property (Parcel ‘B’) appeared to have been undeveloped land from at least 1965 until sometime prior to 2005.

- Six (6) 55-gallon metal drums full of Plexichrome latex coating (used to paint tennis courts) were observed in the maintenance yard. No leaks, stains, or odors were observed.

- Several empty 55-gallon metal and cardboard drums were observed in the maintenance yard and on Parcel B along the eastern boundary (adjacent Central Lane). No leaks, stains, or odors were observed.

- Two (2) 55-gallon metal drums partially full of asphalt patch were observed next to the maintenance yard. No leaks, stains, or odors were observed.

- Several empty 5-gallon plastic paint buckets (latex tennis court paint) were observed in the maintenance yard. No leaks, stains, or odors were observed.

- Six (6) partially full 2-gallon plastic gasoline containers (used for maintenance equipment) were observed in the maintenance storage shed. No leaks, odors, or stains were observed.

- Converse observed two (2) self-contained marine lead batteries in the maintenance yard on a wooden table. No leaks, stains, or odors were observed.

- An active 125-foot water well is located on Parcel ‘A’ adjacent to Lakewood Drive. If the well is not to be utilized, then Converse recommends the groundwater well be properly removed/abandoned according to applicable state and/or local rules and regulations prior to redevelopment.
• Minor trash and debris (asphalt/concrete pieces and assorted wood) was observed on the eastern boundary (adjacent to Central Lane) of the Property (Parcel 'B').

• The Property was not identified on the databases in the EDR report.

• The adjoining properties were not identified on the databases in the EDR report.
8.0 Opinion

No Recognized Environmental Conditions were noted in the findings of this report.

No significant data gaps were identified that affect the ability of the Environmental Professional (EP) to identify RECs and there were no unusual circumstances where greater certainty is required regarding RECs.
9.0 Conclusions

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-05 at the southwest corner of Erwin Ranch Road and Lakewood Drive and the northeast corner of Lakewood Drive and 11th Lane, in Big Bear City, San Bernardino County, California. Any exceptions to or deletions from this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property.

No further assessment is warranted at this time.

Information has been requested from the OSFM and the City of Big Bear Lake (groundwater information), but was not received in time for inclusion in this report.
10.0 Deviations and Limitations

The following deviations and limitations from the ASTM Standard Practice in conducting this Phase I ESA are as follows:

- Historical research was not completed prior to 1965. Remaining ASTM sources are deemed unlikely to yield significant data.

- No owner interview was received within the time frame of this assessment.
11.0 Additional Non-Scope Services

There are environmental issues outside the scope of the ASTM E1527-05 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate..."

No non-scope issues were addressed in this report.
12.0 Signatures of Environmental Professionals

I declare that, to the best of my professional knowledge and belief, that I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Scott M. Nunes
Senior Manager

This Phase I ESA was completed under the supervision of the above Environmental Professional. A complete list of preparers, and their responsibilities for this assessment, is provided in the following section (Section 13.0, List of Preparers).
13.0 List of Preparers

Norman S. Eke
Managing Officer

B.A., Liberal Studies, Environmental Studies Emphasis, University of California, Santa Barbara, 1988
Cal-OSHA Certified Asbestos Consultant, #96-2093

Managing Officer of the California environmental offices of Converse Consultants. Mr. Eke has 18 years of experience with Phase I & II Environmental Site Assessments (ESAs), remediation, asbestos surveys, emergency response, hazardous waste transportation, hazardous materials management, compliance and permitting. Current duties include business development, client maintenance, technical review and approval of proposals and reports.

Principal area of responsibility for this ESA report: Quality Assurance/Quality Control and Technical Review.

Scott M. Nunes
Senior Manager

B.A., Geography/Ecosystems, University of California, Los Angeles, 1987
Registered Hazardous Substances Professional (RHSP)
Certified Hazardous Materials Manager (CHMM)
Registered Environmental Manager (REM)
Certified Lead-Related Inspector/Assessor #1085
Cal-EPA Registered Environmental Assessor, #05227
Cal-OSHA Certified Asbestos Consultant, #92-0547

Mr. Nunes is the Senior Manager of the environmental department of the Redlands office. Mr. Nunes has over 19 years experience with Phase I and Phase II ESAs, asbestos surveys, lead-based paint surveys, as well as hazardous material audits, completing business plans, and AQMD permitting. Current duties at Converse include project management, business development, and conducting/managing ESAs and asbestos and lead-paint surveys.

Principal area of responsibility for this ESA report: Project Management and Technical Review.
Douglas W. Krueger  
Staff Environmental Scientist

B.A., Environmental Studies, California State University San Bernardino, 2003  
40-Hour OSHA Health and Safety Training-Hazardous Waste Workers, December 2006

Mr. Krueger has conducted Phase I and assisted with Phase II Environmental Site Assessments (ESA’s), Update Phase I ESA’s, and Transaction Screen Process Reports (TSP’s) on fallow agricultural land, undeveloped land, commercial, industrial, and residential sites throughout Southern California. Mr. Krueger’s Phase II experience includes soil and water sampling for residual agricultural chemicals, total petroleum hydrocarbons, PCBs, metals, volatile organic compounds, and semi-volatile organic compounds. In addition, Mr. Krueger has assisted in hazardous materials management along with quarterly groundwater sampling, asbestos and lead-based paint surveys, and underground tank removals.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY, EXRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

2050 ERWIN RANCH ROAD
BIG BEAR CITY, CA 92314

COORDINATES

Latitude (North): 34.249700 - 34° 14' 58.9"
Longitude (West): 116.805900 - 116° 48' 21.2"
Universal Transverse Mercator: Zone 11
UTM X (Meters): 517872.5
UTM Y (Meters): 3798664.5
Elevation: 6778 ft. above sea level

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update**: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**FEDERAL RECORDS**

**NPL**: National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

**Proposed NPL**: Proposed National Priority List Sites
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

- **Date of Government Version**: 04/20/2007
- **Date Data Arrived at EDR**: 05/03/2007
- **Date Made Active in Reports**: 07/05/2007
- **Number of Days to Update**: 63

**DELISTED NPL**: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

- **Date of Government Version**: 04/20/2007
- **Date Data Arrived at EDR**: 05/03/2007
- **Date Made Active in Reports**: 06/25/2007
- **Number of Days to Update**: 53
GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56
Source: EPA
Telephone: 202-586-4267
Last EDR Contact: 05/21/2007
Next Scheduled EDR Contact: 08/20/2007
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/27/2007
Date Data Arrived at EDR: 03/21/2007
Date Made Active in Reports: 04/27/2007
Number of Days to Update: 37

Last EDR Contact: 06/20/2007
Next Scheduled EDR Contact: 09/17/2007
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 03/21/2007

Last EDR Contact: 06/04/2007
Next Scheduled EDR Contact: 09/03/2007
Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

DOD: Department of Defense Sites
This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 11/10/2006
Date Made Active in Reports: 01/11/2007
Number of Days to Update: 62

FUDS: Formerly Used Defense Sites
The listing includes locations of Formerly Used Defense Sites properties where the U.S. Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 09/20/2006
Date Made Active in Reports: 11/22/2006
Number of Days to Update: 63

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addressed by Cooperative Agreement Recipients and brownfield properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/04/2007
Date Data Arrived at EDR: 04/04/2007
Date Made Active in Reports: 09/26/2007
Number of Days to Update: 51

CONSENT: Superfund (CERCLA) Consent Decrees
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 08/23/2006
Date Data Arrived at EDR: 03/06/2007
Date Made Active in Reports: 04/10/2007
Number of Days to Update: 35

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/27/2007
Date Data Arrived at EDR: 03/27/2007
Date Made Active in Reports: 04/27/2007
Number of Days to Update: 31
UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low, however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Telephone: 800-424-9346
Last EDR Contact: 06/09/2004
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Source: EPA
Telephone: 202-566-3250
Last EDR Contact: 07/09/2007
Next Scheduled EDR Contact: 09/17/2007
Data Release Frequency: Annually

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Source: EPA
Telephone: 202-260-5521
Last EDR Contact: 07/30/2007
Next Scheduled EDR Contact: 10/15/2007
Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
Last EDR Contact: 08/19/2007
Next Scheduled EDR Contact: 09/17/2007
Data Release Frequency: Quarterly

FTTS INSPI: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Source: EPA
Telephone: 202-566-1667
Last EDR Contact: 09/17/2007
Next Scheduled EDR Contact: 09/17/2007
Data Release Frequency: Quarterly
**GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING**

**SSTS: Section 7 Tracking Systems**
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

**CDL: Clandestine Drug Labs**
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumsitises. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System
  RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA
pertaining to major violators and includes administrative and civil actions brought by the EPA. For administrative
actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of
the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources
made it impossible to continue to update the information contained in the database.

  Date of Government Version: 04/17/1995

**DEED:** Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year
by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately
350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain
some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's)
EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate
further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL));
State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor
provides similar information to the information that was available in CalSites, and provides additional site information,
including, but not limited to, identification of formerly-contaminated properties that have been released for
reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses,
and risk characterization information that is used to assess potential impacts to public health and the environment
at contaminated sites.

**EDR PROPRIETARY RECORDS**

**Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Other Database(s)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT Manifest: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.
Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4941

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWII: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE
Target Property County: SAN BERNARDINO, CA
FEMA Flood Electronic Data: YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property: 06071C8050F
Additional Panels in search area: 06071C7320F, 06071C7315F, 06071C8030F

NATIONAL WETLAND INVENTORY
NWI Quad at Target Property: NOT AVAILABLE
NWI Electronic Data Coverage: Not Available

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:
  Search Radius: 1.25 miles
  Status: Not found

AQUIFLOW
Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

*1995 site-specific hydrogeological data gathered by CERCIUS, Inc., Belleville, Ill. All rights reserved. All of the information and opinions presented are those of the sitewide EPA report(s), which were compiled as part of the Comprehensive Environmental Response Compensation and Liability Information System (CERCIUS) investigation.
GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY
The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PACIFICO
Soil Surface Texture: loamy sand
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: MODERATE
Depth to Bedrock Min: > 10 inches
Depth to Bedrock Max: > 20 inches

**OTHER SOIL TYPES IN AREA**

Based on Soil Conservation Service STATSGO data, the following additional subordinate soil types may appear within the general area of target property.

**Soil Surface Textures:** sandy loam
- gravely - coarse sandy loam
- gravely - loam
- fragmental material
- stony - sandy loam
- loamy fine sand
- very gravelly - loamy coarse sand
- very cobbly - loam

**Surficial Soil Types:** sandy loam
- gravely - coarse sandy loam
- gravely - loam
- fragmental material
- stony - sandy loam
- loamy fine sand
- very gravelly - loamy coarse sand
- very cobbly - loam

**Shallow Soil Types:** gravelly - sandy loam
- fine gravelly - loamy coarse sand

**Deeper Soil Types:** loamy sand
- gravelly - sandy loam
- very gravelly - loamy coarse sand
- unweathered bedrock
- fragmental material
- fine sandy loam
- very gravelly - loam
EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.
PHYSICAL SETTING SOURCE RECORDS SEARCHED

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1976 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
