SCRN

Earned and maintained by more than 1,300 nurses, the Stroke Certified Registered Nurse (SCRN®) credential formally recognizes the attainment and demonstration of a unique body of knowledge necessary for the practice of stroke nursing.

Course Description

Certification in stroke nursing is a formal recognition of the attainment and demonstration of a unique body of knowledge necessary for the practice of stroke nursing. Neuroscience nursing is the diagnosis and treatment of actual or potential patient and family responses to nervous system function and dysfunction across the health care continuum. As LLUH continues on its journey as a comprehensive stroke center, the volume and complexity of our patients is changing drastically. The stroke nurse needs to be equipped with the right knowledge in both cutting edge therapies/technology and evidence based practice. Having this certification improves patient outcomes,
decreases length of stay and improves job satisfaction.

Suggested Study Text

AANN Comprehensive Review For Stroke Nursing

The American Association of Neuroscience Nurses (AANN) Comprehensive Review for Stroke Nursing is a comprehensive resource for nurses preparing for the SCRN exam and those looking for a review of current best practices for providing stroke care.

Suggested study material:

ISBN: 096257290X   ISBN: 0826127177

Space is limited.
Early registration is required.

Course Agenda

Agenda: Review Day 1

• Anatomy and Physiology
• Preventive Care
• Hyperacute Care
• Systems and Quality Care

Agenda: Review Day 2

• Acute Care
• Treatment Options
• Medications
• Post-acute Care
