HESPERIA, Calif. — A 3-year-old girl is in stable condition after she was ejected from a vehicle during a traffic collision, official said.

On May 18, 2018 at about 1:43 PM, Deputies from the Hesperia Station and rescue personnel from the **San Bernardino County Fire** Department responded to a two-vehicle traffic collision at the intersection of Sultana St. and Hickory Ave.

It was reported that a child had been ejected from one of the vehicles during the collision, and was suffering from injuries as a result.

First responders arrived on scene and located the victim, a 3-year-old female, who had been ejected. The adult female drivers of both vehicles involved had minor injuries that did not require immediate attention. The 3-year-old victim was suffering from major head injuries as well as unknown possible internal injuries. That victim was flown by medical helicopter to Loma Linda University Medical Center for advanced treatment and was reported to be in stable condition.

Deputies from the Hesperia Station, Traffic Division are conducting the investigation to determine the exact cause of the collision and will examine the vehicles restraint systems to determine if the juvenile was properly restrained at the time of the collision.

Investigators were able to determine that the vehicles involved, a 2011 Ford Edge SUV and a 2004 Scion collided in the intersection and the juvenile had been ejected from the Scion during the collision.

Sultana St. and Hickory Ave. were both closed in both directions during the investigation while investigators processed the scene and collected evidence.

Anyone with information is asked to call Deputy Taylor Lamson or Sergeant Doug Hubbard at the Hesperia Station.

Posted: May 18, 2018

VICTORVILLE – Twelve were displaced after a fire destroyed two apartment units in the 16000 block of Lariat Drive in the City of Victorville on Friday night.

San Bernardino County Fire Department firefighters responded to the commercial fire reported at around 9:00 p.m. Firefighters arrived within approximately four minutes of the report to find the apartment building with heavy smoke and fire showing from the second story. Firefighters immediately searched for any trapped occupants as they attempted to limit the spread of the fire. A second alarm was called due to the size of the building, fire involvement, and proximity to additional buildings. Several assisted with the fire including other San Bernardino County Fire Department stations in the High Desert, as well as the Apple Valley Fire District. “First units established an offensive fire attack with truck crews supporting their operation from the roof above,” said San Bernardino County Fire Department Public Information Officer Jeremy Kern. “A primary and secondary search was quickly found to be all clear in the fire building.”

Firefighters were able to quickly limit the spread of the fire and had the fire in control within around 30 minutes. Forty-six fire personnel responded to the scene including three truck companies, ten engines, one medic squad, two chief officers, one heavy rescue, and one investigator. No injuries were reported as a result of the fire. The Red Cross responded to assist those displaced, which consisted of twelve occupants from two families. The damage estimates are still unknown and the cause of the fire remains under investigation.
