

Construction Waste Management Plan (CWMP)

Conversion Chart

C&D Conversion Information

Material Type	Pounds / CY	Tons / CY
Asphalt	1380	0.69
Cardboard	100	0.05
Carpet	84	0.04
Concrete	1855	0.93
Drywall	1620 - 2160	0.81 - 1.08
Mixed C&D Debris	900	0.45
Mixed Plastics	32	0.02
Plastic Pipes	341	0.17
Scrap Metal	906	0.45
Wood (chipped)	300	0.25
Stumps	1080	0.54

In the event that the contractors/subcontractors utilizes their own debris boxes as part of their scope of work, such contractors shall not be excluded from complying with the waste management plan and will provide the signatory of this plan with disposal weight and waste diversion data for their debris boxes.

In the event that site use constraints (such as limited space) restrict the number of debris boxes that can be used for collection of designated waste the project Superintendent will, as deemed appropriate, allocate specific areas onsite where individual material types are to be consolidated. These collection points are not to be contaminated with non-designated waste types.

Single Family Residential Only

National Association of Home Builders Construction Waste Estimates of a typical 2,000 sf home.

Material Type	Weight (lbs)	Volume (CY)
Cardboard	600	20
Drywall	2000	6
Plastic - PVC	150	1
Metal	150	1
Masonry	1000	1
Wood - Solid Dimensional	1600	6
Wood - Engineered	1400	5
