

Be safe from the start...

A

Active Adult Supervision

Maintain active supervision when children are around water.

B

Barriers

Install fencing, latches and alarms.

C

Classes

Take CPR & Swimming Lessons.

Drowning is one of the leading causes of death for children under 5.

Water Safety Tips

#1

Never leave a child alone around a pool of water. It only takes a silent second for a submersion to occur.

#2

Wearing a U.S. Coast Guard approved life jacket in open water can support a child's safety.

#3

Water rings, bath seats, and arm floats are not replacements for adult support and supervision.

#4

Empty wading pools and buckets of water when not in use.

#5

Remove toys and items that would attract children to the pool.

For Swimming & CPR Lessons in your area **Dial 2-1-1** or visit **www.211sb.org**.
