

## Argument in Rebuttal to the Argument in Favor of Measure G

Vote No on Measure G, or you'll be paying for it until 2055! Supporters have not been upfront about how much this bond will cost: \$1.6 Billion! This \$750 million bond will cost taxpayers an additional \$850 million in interest payments. Bankers will make hundreds of millions of dollars and our schools will get the leftovers. That's why special interests hired a Sacramento consultant to push this measure.

Where does it stop? Taxpayers are still paying for the Measure M school bond. We're being told that schools still need repairs. So why didn't Measure M fix the problems? The school board mismanaged priorities and built luxuries like stadiums and pools without fixing classrooms. Hold them accountable and Vote No on G!

When it comes time to sell your house, potential buyers will see they would have two CVUSD bonds and one Chaffey College bond to pay. Seniors living on fixed incomes will be forced to pay this for decades.

This school board hasn't wisely managed taxpayer funds. Now they want a blank check. Recently a board member complained, "I feel like we just don't know what's going on." They have no plan! Repeatedly the school district has failed to budget for long term projects, and now they want a bailout.

Measure G puts more money into bankers' pockets than into classrooms. That's unacceptable at a time when families are struggling to pay bills. Let's not fall for their false promises and history of mismanagement.

Please vote NO on Measure G!
