

Compact Mobile Food Operations Construction Guidelines Prepackaged Food

Adopted by
San Bernardino County Department of Public Health Environmental Health Services

INTRODUCTION:

On September 23, 2022, Senate Bill 972 (SB 972) was signed by the Governor and becomes effective January 1, 2023. This bill modifies the California Retail Food Code (CRFC) to relax some structural and operational requirements for lower risk sidewalk food vending operations. SB 972 created a new category of Mobile Food Facilities termed Compact Mobile Food Operation (CMFO).

This document provides information on the structural requirements based on the CRFC for CMFOs that handle only prepackaged foods.

A valid Health Permit may be required to operate a CMFO that handles only prepackaged food items. Plan submittal may also be required for review and approval before a Health Permit will be issued. Use the Plan Submittal Checklist (starting on page 4) that indicates the information that must be included on the plans.

DEFINITIONS:

- A. **Commissary** means a health permitted food facility that services mobile food facilities where any of the following occur: food, containers, or supplies are stored; food is prepared or prepackaged for sale or service at other locations; utensils are cleaned; liquid and solid wastes are disposed, or potable water is obtained.
- B. **Compact Mobile Food Operation (CMFO)** means an unenclosed mobile food facility that operates from an individual or from a pushcart, stand, display, pedal-driven cart, wagon, showcase, rack, or other nonmotorized conveyance.
- C. **Cottage Food Operation (CFO)** means a registered or permitted area of a private home where the CFO operator resides and where cottage food products are prepared or packaged for direct or indirect sales.
- D. **Non-Potentially Hazardous Food (NON-PHF)** means a food that does not require time or temperature control. Examples include prepackaged chips, sodas, pretzels, cookies, popsicles. (See examples page)
- E. **Potentially Hazardous Food (PHF)** means a food that requires time or temperature control to limit pathogenic micro-organism growth or toxin formation. Examples include tamales, burritos, ice cream sandwiches. (See examples page)
- F. **Prepackaged Food** means any properly labeled processed food, prepackaged to prevent any direct human contact with the food product upon distribution from the manufacturer, a food facility, or other approved source.
